PART B: ADDITIONAL INFORMATION REQUIRED BY THE MAIN MARKET LISTING REQUIREMENTS OF BURSA SECURITIES

B1. Review of Performance

Performance of the current quarter (2Q 2014) vs corresponding quarter (2Q 2013) by segment

(Note: All 2Q 2013 comparatives have been presented to conform with the current year's reported results).

GHL group's financial performance showed a marked improvement with group turnover growing +178.7% yoy to RM45.30 million as compared to RM16.26 million in the same period last year. Net profit after tax similarly grew +95.7% to RM3.04 million (2Q13 – RM1.56m). The financial results include the full quarter's contribution from e-pay Asia Limited ("e-pay") in 2Q14. As stated previously, GHL group's growth strategy is to rapidly grow its TPA business regionally and to significantly enlarge its merchant base. The acquisition of e-pay effectively jump started GHL's TPA business as e-pay has direct contracts with numerous merchants for the provision of prepaid top-ups and bill collection services. Similarly, GHL itself is growing its TPA business by contracting directly with merchants for the provision of credit card payments. This credit card TPA business is relatively new; it was first launched in Thailand at the end of the first quarter and in Malaysia and the Philippines, GHL is awaiting final bank and regulatory approvals before it can commence activity.

The performance of the individual segments are as follows.

Shared Services

Shared services division turnover showed a decline in 2Q14 of -11.5% yoy to RM8.16 million (2Q13 – RM9.21m) due to lower hardware and card sales. Banks bought fewer EDC hardware in the quarter and timing differences deferred some card sales to later quarters. The reduction in EDC hardware sales is however, congruent with GHL group's strategy favouring annuity rental income rather than outright sale of hardware to banks.

Solution Services

Solution services revenue were marginally down in 2Q14 to RM2.99 million (2Q13 – RM3.08m) as the result of lower software maintenance revenue. While this was offset by higher one off hardware and software sales during the quarter, the net effect was nevertheless a small decline in revenues.

Transaction Payment Acquisition (TPA)

TPA revenues increased significantly to RM34.16 million (2Q13 – RM3.97m) due to the inclusion of a full quarter's contribution from e-pay, which was acquired as a subsidiary in February 2014. e-pay predominantly generates TPA revenue through its direct contractual relationships with Telco companies and merchants for the provision of prepaid top-ups and bill payments.

As indicated in the geographic segment analysis below, TPA activities arising from credit card acceptance has recently been launched in Thailand and is pending Bank and regulatory approvals in Philippines and Malaysia.

B1. Review of Performance (Continued)

Performance of the current quarter (2Q 2014) vs corresponding quarter (2Q 2013) by geographical segment

2Q 2014 revenue increased +178.7% yoy with growth being recorded in all three of our main operating subsidiaries in Malaysia, Thailand and Philippines. GHL's Australian operations remain insignificant at this juncture. The largest contributors to GHL group's net profit were Malaysia and the Philippines. Thailand operations recorded a small EBIT loss of RM0.04 million for this quarter. Given the stagnant demand caused by the current political uncertainty in Thailand, the subsidiary tightly contained its operating expenditures. Overall, GHL group recorded a net profit after tax in the quarter of RM3.04 million vs RM1.56 million in 2Q 2013.

With e-pay's full quarter financial results reflected in this quarter, Malaysia operations accounted for 85.1% of group revenues for 2Q2014 (2Q2013: 66.0%). Excluding TPA, which was mostly derived from e-pay, Malaysia's revenues from both Shared Services and Solution Services were down yoy due to lower EDC hardware and card sales as well as lower software maintenance fees collected during 2Q 2014 vs a year ago. This reflects lower demand from the banks in terms of the outright purchase of EDC hardware and the deferment of some card sales. Malaysia is in advanced discussions with an acquiring bank to launch a TPA business centred around credit card acceptance. It is likely that this new TPA business will commence by 4Q this year.

Philippine operations were the second largest contributor to Group revenue, accounting for 9.8% of 2Q 2014 total revenues. This second quarter saw revenues improve +12.5% yoy to RM4.42 million (2Q 2013 – RM3.93m) supported by higher growth in annuity income derived from the rental and maintenance of EDC terminals as well as higher non-recurring software sales from the Solution Services segment. The Group is presently laying the ground work to commence TPA on a wider scale and is presently awaiting approval from the bank regulators for a TPA arrangement similar to that signed with the Thailand bank earlier this year.

Thailand saw 2Q revenue increase +44.4% yoy to RM2.03 million (2Q 2013 RM1.41m) mostly due to an opportunistic sale of EDC terminal sales to a bank. Business has been negatively impacted by the political uncertainty in the country which continues to cause major corporations and banks to defer expenditure on payment infrastructure. In addition some contracts involving the government have been stalled pending the execution of required legislation. The TPA business commenced cautiously in the start of the 2Q as the group felt it prudent to scale back on marketing and sales programs in order to save costs given the uncertainty surrounding the country's political impasse. These programs will be extended once the political environment becomes clearer and banks and merchants start to re-grow the economy.

B1. Review of Performance (Continued)

Performance of the first half-year (1H 2014) vs the corresponding period (1H 2013) by segment

GHL group's turnover for the first half-year grew +107.8% yoy to RM70.06 million as compared to the equivalent last year (1H 2013 - RM33.72m). This was primarily due to the significant increase in TPA revenue derived from e-pay's operations. GHL group's net profit after tax improved by +28.8% yoy to RM4.58 million (2Q13 YTD – RM3.56m).

Shared services and Solution services declined yoy, due mainly to Malaysia operations where EDC hardware sales and card sales in 1H14 dropped sharply against the same period last year. Both the Philippine and Thailand operations showed yoy revenue improvements of 12.5% and 44.4% respectively.

B1. Review of Performance (Continued)

With the inclusion of e-pay's operations, the Group's annuity based revenues has risen significantly to 92.8% as compared to 73.6% previously. This is completely congruent with GHL group's strategy of reducing over time, non-annuity income from EDC hardware and software sales to recurrent revenue from on-going rental and maintenance contracts as well as TPA revenue.

B2. Current Year's Prospects

The Group is in a fundamentally stronger position in 2014 as compared to 2013. The e-pay acquisition has boosted the Group's TPA business revenue stream and e-pay is expected to continue to contribute strongly to the Group's TPA business line. The Group's revenue in the first 6 months of 2014 grew by +107.8% yoy.

The Group is in the process of integrating e-Pay's operations into the GHL group. The acquisition of e-pay has significantly expanded our footprint in Malaysia by roughly adding a further 18,000 point of sales. Apart from integration costs, the Group has already commenced formulating and implementing strategies to leverage cross selling opportunities that exists between the point of sales of both companies.

The political turmoil in Thailand has continues to cause concern and several of our banking and merchant partners have adopted a wait and see stance. A few months on, since the announcement of the military coup, the Group has seen small signs of normalcy returning and is hopeful that conditions will continue to improve further.

In the first-half year of 2014, the Group invested resources in developing the sales channels and systems to grow GHL's TPA business in the three main markets that it operates in namely; Malaysia, Thailand and Philippines. This investment in people and systems has temporarily increased overheads ahead of revenue to be generated from future sales and this timing mis-match is reflected in the group's results. Also in some countries, GHL has to await the approval of banks and regulatory authorities before it can implement the TPA initiative and this has delayed TPA implementation. Regardless, the Group has identified the TPA initiative as the main engine of growth for the near to medium term. The Group is committed to serving the smaller merchant segment that has hitherto been largely unserved throughout the ASEAN region. GHL intends to be clearly seen as the leading merchant acquirer for credit cards and other payment products in ASEAN in the near term.

GHL Group expects 2014 prospects to remain positive. The investments made in growing new businesses this year will also strengthen our position overall in the years ahead.
