QUARTERLY REPORT

Notes on the quarterly report for the financial period ended 30 September 2020

Part A - Explanatory notes pursuant to Malaysian Financial Reporting Standard 134 ("MFRS 134") Interim Financial Reporting

A1. BASIS OF PREPARATION

The interim financial statements are unaudited and have been prepared in accordance with the requirements of MFRS134: Interim Financial Reporting, IAS 34: Interim Financial Reporting and Rule 9.22 and Appendix 9B of the ACE Market Listing Requirements of Bursa Malaysia Securities Berhad ("Bursa Securities") ("ACE LR").

A2. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and methods of computation applied in the unaudited condensed interim financial statements are consistent with those adopted and as disclosed in the Group's annual report for the financial year ended 31 December 2019.

The Group has adopted the new and revised Malaysian Financial Reporting Standards ("MFRSs"), amendments to published standards and IC Interpretations that became mandatory for the current reporting period. The adoption of these new and revised MFRSs, amendments to published standards and IC Interpretations does not result in significant changes in the accounting policies of the Group.

A3. AUDITORS REPORT ON PRECEDING ANNUAL FINANCIAL STATEMENTS

There was no audit qualification on the annual financial statements of JAG for the financial year ended 31 December 2019.

A4. SEASONAL AND CYCLICAL FACTORS

The Group's business operations were mainly attributable (i.e., contributing approximately 90% of its total revenue) from its manufacturing and trading segments involving recycling and recovery activities, which are affected by the cyclicality of the semiconductor. The semiconductor industry, in turn, is cyclical and dependent on its end user industries, in particular the electrical & electronic industries. The demand for semiconductors typically mirrors the trend in the demand for personal computers, mobile phones and other electronic equipment.

As the availability of electrical and electronic waste ("E-waste") for recycling and manufacturing services is dependent on the volume of E-waste discharged by semiconductor manufacturers, the E-waste recycling industry is also dependent on the trends in the semiconductor industry.

A5. UNUSUAL ITEMS AFFECTING ASSETS, LIABILITIES, EQUITY, NET INCOME OR CASH FLOWS

There were no unusual items affecting assets, liabilities, equity, net income or cash flows during the current financial quarter and period under review.

B1. REVIEW OF PERFORMANCE

3rd Quarter 2020 vs 3rd Quarter 2019

The Group recorded increased in revenue of 6.7% in current financial quarter as compared to previous corresponding financial quarter ended 30 September 2019. The disposal of investment held in investment holding division of RM9.4 million (refer to Note A9) contributed to the increase in revenue as well as corresponding cost of investment had been recognised as direct cost in the current financial quarter.

In respect of the performance of Total Waste Management ("TWM") division, revenue recorded at RM37.7 million in current financial quarter as compared to RM43.9 million in previous year corresponding financial quarter (refer to Note A9), marked a decreased of 14.1%. This is mainly due to lower sales of precious metals such as silver, nickel, tin and platinum. However, the TWM division reported an improvement of profit before interest and tax ("PBIT") of RM4.6 million in current quarter as compared to RM2.7 million in previous corresponding financial quarter by 70.4%. This was mainly due to higher sales of precious metals with better margin products during the financial quarter. Furthermore, the appreciation of commodity prices had directly contributed to the profitability of the division.

The Group reported increased in other income in current financial quarter. It was mainly due to the fair value adjustment on the quoted investment held by the Group. The market value of quoted investments closed higher as at 30 September 2020 as compared to immediate preceding quarter 30 June 2020, thus it resulted in fair value gain on investment held in current financial quarter ended 30 September 2020.

The decreased in other operating expenses was due to the absence of impairment loss on property development division which were recognised in previous corresponding financial quarter. With the improved performance of TWM division, it will attract higher tax payable for the Year of Assessment 2020, and as a result additional provision of tax payable had been projected in the account leading to higher taxation in the current quarter.

Financial Period 30 September 2020 vs Financial Period 30 September 2019

The Group recorded increased in revenue of 10.9% in current financial period as compared to previous corresponding financial period ended 30 September 2019. The improvement of revenue was contributed by increased in revenue in TWM division as well as the investment holding division.

Although TWM division operations was temporary halted during the first phase of Movement Control Order ("MCO") from 18 March 2020 to 21 April 2020, the cumulative financial performance of the TWM has improved compared to previous corresponding financial period ended 30 September 2019. This was mainly due to higher sales of precious metals with better margin during the financial period. Furthermore, the appreciation of commodity prices had directly contributed to the profitability of the division.

The increase in direct cost was mainly due to the recognition of correspondence cost of investment in relation to the disposal of quoted investment in investment holding division. The increased of other income mainly due to recognition of fair value adjustment on quoted investment held by the Group resulted from higher closing price at 30 September 2020 compared to closing price as at 31 December 2019.

B3. PROSPECTS FOR THE FINANCIAL YEAR ENDING 31 DECEMBER 2020

Moving forward, financial year 2020 will be a challenging period for many market participants as the global economy has been significantly affected by the Covid-19 pandemic.

The price of commodities especially precious metals such as gold, silver, platinum and palladium had been on a market uptrend since March 2020 up to current date of this report. B3. PROSPECTS FOR THE FINANCIAL YEAR ENDING 31 DECEMBER 2020 (CONTINUED)

The manufacturing and trading division of the Group continues to be the major revenue and profit contributor in financial year 2020. In order to remain competitive in the waste management industry, sourcing for materials or waste is the biggest challenge for full recovery plant licensed holders. The Management believes that the approach, know-how and advanced waste management facility maintained by the Group will sustain the market position of the Company. Furthermore, the continuing efforts of the R&D team to acquire more know-how will certainly strengthen the competitive advantage of the Company.

For the property development division, the real estate outlook in 2020 would likely remain subdued. However, Bank Negara Malaysia reduced interest rate three times in 2020, which will create a cheaper mortgage loan, and in turn benefit home purchasers. The Group will continue to position itself as a boutique developer. The Management will review, monitor and analyse the on-going projects as well as market conditions to ensure the projects meet the demand of the market.

The Group has not provided any profit forecast or profit guarantee and thus this is not applicable to the Group.
