A11. Material Events Subsequent to the End of the Interim Period

There was no material event subsequent to the current quarter ended 30 September 2009 that has not been reflected in this quarterly report.

A12. Changes in the Composition of the Group

There were no changes in the composition of the Group for the current quarter ended 30 September 2009.

A13. Contingent Liabilities

Save for the corporate guarantee granted by LNG in favour of financial institutions for credit facilities granted to its subsidiary companies, neither LNG nor its subsidiary companies have any contingent liabilities as at 30 September 2009 which, upon becoming enforceable, may have a material effect on the financial position of LNG or its subsidiary companies. Accordingly, the Company is contingently liable to the extent of the credit facilities utilised by its subsidiary companies amounting to approximately RM1,991,000 as of the end of the financial period.

A14. Capital Commitments

The Group does not have any material capital commitment as at 30 September 2009.

B. EXPLANATORY NOTES PURSUANT TO CHAPTER 9, APPENDIX 9B OF THE LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD FOR THE ACE MARKET

B1. Performance Review

The current global economic downturn has severely affected the connectors and semiconductor industries which support the electrical and electronics (E&E) industries. Weakening global demand for consumer E&E goods such as personal computers, cell phones, consumer electronics, information technology products and automobiles has resulted in a sharp drop in connector and semiconductor industry sales for the first half of 2009.

The severity of this global economic recession is unprecedented in our Group's operating history. Though the Group has faced recessions in the past, the recessions were mainly contained within certain parts of the world. The Group had weathered past recessions due to its good mix of export markets in Europe, Japan, Malaysia and USA. Should one export market face a recession, the other markets were able to provide a safety net for the Group to rely on for its sales. The current financial turmoil, however, is a global phenomenon whereby all our customers in different industry sectors and geographical regions are affected simultaneously.

For the third quarter of 2009, the connector, semiconductor and E&E industries performed better than the first two quarters as consumer confidence and demand improved. Overall industry performance was still weaker compared to the previous corresponding year of 2008. Given these economic conditions, the Group's revenue for the current period was still affected significantly due to the sharp downturn experienced in the first and second quarter of 2009.

B1. Performance Review (cont'd)

As a result, the Group's revenue for the current financial period ended 30 September 2009 of RM19.132 million is lower than the revenue in the prior corresponding financial period ended 30 September 2008 of RM25.100 million. The profit before tax for the period ended 30 September 2009 amounted to RM1.138 million, which is also lower than the profit before tax of RM4.589 million for the previous year's corresponding financial period.

The Group achieved a revenue of RM7.599 million for the current quarter ended 30 September 2009, which is lower than the revenue for the quarter ended 30 September 2008 of RM8.384 million. The profit before tax for the current quarter ended 30 September 2009 decreased to RM0.849 million from RM1.223 million in the quarter ended 30 September 2008.

There are no other material factors which have affected the revenue and profit before tax of the Group for the current period/quarter.

B2. Comment on Material Change in Profit Before Tax

The pre-tax profit of RM0.849 million for the current quarter was higher than the pre-tax profit of RM0.230 million in the preceding quarter due to higher revenue generated in the current quarter.

B3. Current Year Prospects

Given the poor economic factors and the weak performance for the connector, semiconductor and electronics and electrical industries for the first half of the year, the Group's revenue and operating profits were affected. Hence, the Directors are of the opinion that the performance of the Group will also be weaker in the financial year ending 31 December 2009 compared to the previous financial year. The connector, semiconductor and electronics and electrical industries have shown marginal improvement in the third quarter, and are expected to improve further over the next few quarters.

In the meantime, the Group will implement the following strategies to mitigate the current downturn:

- (i) Invest in research and development into designing and fabricating fine pitch high speed connector moulds that will be used in high speed servers.
- (ii) Collaborations with our key customers in development of new fine pitch connector moulds and toolings to manufacture fine pitch connectors.

B4. Variance of Actual Profit from Profit Forecast

Not applicable.

B5. Income Tax Expense

	Current Quarter RM'000	Period To Date RM'000
Income Tax	95	163
Deferred Tax	(10)	12
	85	175

The effective tax rate of the Group is lower than the statutory tax rate of 25% due to the utilisation of reinvestment allowance to partially offset the taxable profit of the Group.

B6. Profit/(Loss) on Sale of Unquoted Investments and/or Properties

There were no disposals of unquoted investment and/or properties for the current quarter and the financial period to date.

B7. Particulars of Purchase or Disposal of Quoted Securities

There were no acquisitions or disposals of quoted securities for the current quarter and the financial period to date.

B8. Status of Corporate Proposals

There is no outstanding uncompleted corporate proposal as at the date of this quarterly report.

B9. Borrowings and Debt Securities

The Group's borrowings, all of which are secured and denominated in Ringgit Malaysia, as at the end of the reporting quarter are as follows:

	Short term RM'000	Long term RM'000	Total RM'000
Term loan	341	-	341
Hire-purchase	851	825	1,676
Total	1,192	825	2,017

B10. Off Balance Sheet Financial Instruments

During the financial period, the Group entered into forward foreign exchange contracts to hedge exposures to currency risk for receivables which are denominated in currencies other than the functional currency of the Group.

As at 13 November 2009 (the latest practicable date which is not earlier than 7 days from the date of issue of the quarterly report), the Group had entered into forward foreign exchange contracts with the following notional amounts and maturities:

	Currency	Amount in foreign currency ('000)	Notional Amount (RM'000)
Forward foreign exchange contracts: Within 1 year	USD	17	59

Transactions in foreign currencies are converted into Ringgit Malaysia at rates of exchange ruling at the date of transactions unless hedged by forward foreign exchange contracts, in which case the rates specified in such forward foreign exchange contracts are used. Monetary assets and liabilities in foreign currencies at the balance sheet date are translated into Ringgit Malaysia at rates of exchange ruling at that date unless hedged by forward foreign exchange contracts, in which case the rates specified in such forward foreign exchange contracts are used. All gains or losses arising from the settlement of foreign currency transactions and from translating foreign monetary assets and liabilities are taken into the income statements.

The Group does not foresee any significant credit and market risks posed by the above off balance sheet financial instruments.

There is also no cash requirement risk as the Group uses fixed forward foreign exchange contracts as its hedging instrument.

B11. Material Litigations

The Group is not engaged in any material litigation either as plaintiff or defendant and the directors do not have any knowledge of any proceedings pending or threatened against the Group as at the date of this quarterly report.

B12. Dividends

On 17 November 2009, the Company declared an interim tax-exempt dividend of 5% equivalent to 0.5 sen per share in respect of financial year ending 31 December 2009, to be paid on 17 December 2009 to all holders of ordinary shares whose names appeared in the Record of Depositors at the close of business on 8 December 2009.

B13. Earnings Per Share

Basic earnings per ordinary share

The calculation of basic earnings per share for the current quarter and financial period to date is based on the profit attributable to equity holders of the Company and the weighted average number of ordinary shares in issue, excluding treasury shares, in the respective periods as follows:

	Current Quarter	Period To Date
Profit attributable to equity holders of the Company (RM'000) Weighted average number of ordinary	764	963
shares in issue (units)	187,371,772	187,371,772
Basic earnings per ordinary share (sen)	0.41	0.51

Diluted earnings per ordinary share

There is no dilution in the earnings per share of the Company as the market price of the Company's ordinary shares as at balance sheet date is lower than the exercise price.
