- IC Interpretation 18: Transfers of Assets from Customers

The Directors expect that the adoption of the above FRSs, Amendments and IC Interpretations will not result in any significant changes in the accounting policies and will not have any significant effect on the financial position, performance and disclosures in the financial statements of the Group and the Company in the period of initial application except for the following:

- FRS 3 (Revised) introduces significant changes to the accounting for business combinations, both at the acquisition date and post acquisition, and requires greater use of fair values. In addition, all transaction costs, other than share and debt issue costs, will be expensed as incurred. This revised Standard will be applied prospectively and therefore, may impact the accounting for future transactions or arrangements.
- FRS 127 (Revised) requires accounting for changes in ownership interests by the Group in a subsidiary, while maintaining control, to be recognised as an equity transaction. When the Group losses control of a subsidiary, any interest retained in the former subsidiary will be measured at fair value with the gain or loss recognised in profit or loss. The revised Standard also requires all losses attributable to the minority interests to be absorbed by the minority interests instead of by the parent. This revised Standard will be applied prospectively and therefore, may impact the accounting for future transactions or arrangements.
- Amendments to FRS 7 requires enhanced disclosures about fair value measurements and liquidity risk, which includes disclosures of fair value measurements by level of a fair value measurement hierarchy and a separate liquidity risk analysis for derivative and non-derivative financial liabilities.

Malaysian Financial Reporting Standards (MFRS Framework)

In presenting its first MFRS financial statements, the Group will be required to restate the financial position as at 1 January 2012 to amounts reflecting the application of MFRS Framework.

The Group has started a preliminary assessment of the differences between FRS and accounting standards under the MFRS Framework and is in the process of assessing the financial effects of the differences. Accordingly, the financial position as disclosed in these financial statements for the year ended 31 December 2011 could be different if prepared under the MFRS Framework.

B. Notes pursuant to Chapter 9, Appendix 9B of the ACE Market Listing Requirements of Bursa Malaysia Securities Berhad

B1. Performance review

Operating environment

The operating environment remained challenging during the fourth quarter of 2011. The connector and semiconductor industries generally are facing a slowdown in growth for the second half of 2011 due to the weaker global economic environment.

Global growth conditions have deteriorated and are expected to dip further in early 2012 as exports to the Western countries decline and financial uncertainties persist.

Financial performance

The Group's revenue for the current financial year ended 31 December 2011 of RM33.735 million was lower than the revenue in the prior corresponding financial year ended 31 December 2010 of RM36.647 million. The profit before tax for the year ended 31 December 2011 amounted to RM4.085 million, representing a decrease of 31.0% from RM5.919 million recorded in the previous year's corresponding financial period.

The Group achieved a revenue of RM6.864 million for the current quarter ended 31 December 2011, which was 29.9% lower than the revenue for the quarter ended 31 December 2010 of RM9.788 million. The profit before tax for the current quarter ended 31 December 2011 decreased by 90.8% to RM0.205 million from RM2.230 million in the quarter ended 31 December 2010.

Precision engineering segment

Revenue for the precision engineering segment increased slightly by 6.7% compared to previous financial year. During the financial year, this segment achieved a higher volume of business due to higher new connector mould orders from our customers which have on-going development of new connector products for the consumer electronics industry.

However, revenue for this segment in the fourth quarter dropped by 19.9% as compared to previous year's corresponding quarter. The decrease was mainly due to lower orders from customers as a result of slowdown in the global economy which started in the second half of 2011.

B1. Performance review (cont'd)

Precision plastic injection moulding segment

Revenue for the precision plastic injection moulding segment declined by 20.0% and 40.0% compared to the previous year's corresponding period and quarter respectively. The decline was due to a slowdown in orders for precision plastic connector parts from our customers due to the slowdown experienced by the industry.

Profit before tax and margins

Gross profit for the year decreased by 20.4% to RM6.784 million from RM8.522 million in the year ended 31 December 2010. The decline was mainly attributable to lower sales volume in the precision plastic injection moulding segment and higher overheads in both segments.

Gross profit for the quarter declined to RM0.741 million compared to RM2.979 million in the previous year's corresponding quarter mainly due to lower volume of sales in both the precision engineering and precision plastic injection moulding segments. Gross margins for the quarter declined as a result of lower sales whilst production overheads were mainly fixed and semi-variable.

There were no other material factors which have affected the revenue and profit before tax of the Group for the current quarter and financial year to date.

B2. Comment on material change in profit before tax

The change in profit before tax as compared to the preceding quarter was insignificant. The Group recorded a profit before tax of RM0.205 million for the current quarter as compared to RM0.169 million achieved in the preceding quarter ended 30 September 2011.

B3. Future prospects

The global economy outlook in 2012 has become more uncertain and challenging due to the waning global demand and ongoing financial turbulence.

The prospects for both the precision engineering and precision plastic injection moulding segments in 2012 remain tough and challenging following the weak and highly uncertain global economic conditions. Orders from customers had slowed down in the second half of 2011 and are expected to persist in the first half of 2012. The Group may experience a lower revenue as compared to the last financial year.

B4. Statement by the Board of Directors on revenue or profit estimate, forecast, projection or internal targets

The Group did not announce any revenue or profit estimate, forecast, projection or internal targets.

B5. Variance of actual profit from profit forecast or profit guarantee

The Group did not announce any profit forecast or profit guarantee.

B6. Income tax expense

	Current quarter RM'000	Year to date RM'000
Income tax	(163)	565
Deferred tax	67	(2)

The effective tax rate of the Group was lower than the statutory tax rate of 25% due to the utilisation of reinvestment allowance to partially offset the taxable profit of the Group.

B7. Status of corporate proposals

There is no outstanding uncompleted corporate proposal as at the date of this quarterly report.

B8. Borrowings and debt securities

The Group's borrowings, all of which are secured and denominated in Ringgit Malaysia, as at the end of the reporting quarter were as follows:
