18. Prospects

Major economies of the world continue to show recovery with the United States ("US") and China leading the way. This is mainly due to policies managing the Convid-19 pandemic and the various historically large stimulus packages being implemented by these countries. Despite the increasing pace of vaccination particularly in the US, the pandemic concerns including new variants remain as the infection rate continue to rise and stay at high levels in many parts of the world including India, Europe, South America, Africa and Malaysia. These developments are bound to impact adversely on the economic growth trajectory.

The Group is striving to rectify the situation by reviewing, revisiting and realigning our next steps and strategies to ensure the continuity of the business. Besides, the Group will also work to seek more opportunities beyond these businesses to mitigate the risks and find a way to overcome this hurdle together. The Board of Directors will continuously assess the impact of COVID-19 on its operations and financial performance of the Group for the financial year 2021.
