The Group registered a profit after tax of RM1.77 million for the six months ended 30 June 2019 as compared to a loss after tax of RM12.11 million for the preceding six months ended 30 June 2018. This was mainly due to the net fair value gain on financial assets of RM1.65 million as compared to a net fair value loss on financial assets of RM12.23 million in the preceding six months ended 30 June 2018.

For the current quarter under review, the Group posted a lower profit after tax of RM0.43 million as compared to RM1.71 million of the corresponding quarter in 2018. This was mainly due to decrease in dividend income and net fair value loss on financial assets of RM0.12 million in the current quarter under review.

2. Material change in quarterly results before taxation for the current quarter compared with the immediate preceding quarter

the Company	430	1,341	(68)

The Group recorded a profit before tax of RM0.49 million in the second quarter of 2019 as compared to RM1.38 million in the immediate preceding quarter. This was mainly due to decrease in the market value in quoted investments held by the Group for the current quarter under review.

3. Current prospects and progress on previously announced financial estimate

(a) Current prospects

Volatility in the global market remained high during the second quarter of 2019 mainly due to the ongoing trade conflicts between U.S. and China; the heightened geostrategic tension in the Middle East; and the increasing possibility of a slowdown in the major economies including the U.S., China and Germany. Given the increasing anxiety, there is a trend to invest in gold. On the domestic front, the Malaysian stock market is still under performing as compared to most major stock markets as at end of June 2019. This is despite the better clarity of government policies and increased foreign direct investments (FDI) for Q1 2019. Going forward, in an environment of volatile market conditions, we would remain cautious and vigilant, while continuously reviewing our risk-reward matrix in building up a resilient public investment portfolio.

On our private investment, while we did not close any new deals during the second quarter of 2019, we are in negotiations on a few deals which we expect to close by end of this year. On another note, we have completed an exit from a small investment in an Indonesian business after the end of the reporting quarter with a reasonable return. Nevertheless, at this juncture, we do not foresee any further divestment for this year as all our private investments are still in the early to growing years.

(b) Progress and steps to achieve financial estimate, forecast, projection and internal targets previously announced

There was no financial forecast previously announced by the Group.
