B3 Prospects

Due to recent postage hike, some customers have opted to re-evaluate their printing and distribution requirements which include the use of e-statements. The Group has introduced its newly developed e-Statement products to its existing customers and is able to offer simultaneously both physical and electronic version of statement. Ultimately we see the migration as an opportunity due to higher margin arising from lower capital expenditure as compared to physical printing.

We expect volume of a segment of data printing to increase in coming year due to the recent regulatory changes.

The contribution from software application development will be reduced significantly as we had just completed a project. More deliverables from the project will be minimal.

A more favourable trend is expected in the 2nd half of 2011 with the initiatives and changes of market trends.
