B1) Review of Performance (Cont'd)

Cumulative Period (Cont'd)

The decrease in revenue was mainly due to lower order from the sale of medical gloves which was down by RM31.78 million during the period under review as a result of lower average selling price and lower demand from customers. The decrease in gloves revenue, was however offset with the increase in revenue from fabrication and automation segment which was up by RM17.28 million. Fabrication and automation segment posted higher revenue mainly due to:-

- (i) Fabrication business: higher number of orders from textile machines maker and customers who are contract manufacturer and disk drive manufacturer.
- (ii) Sheet metal and automation business: higher number of orders in sheet metal business.

Meanwhile, sale of solar energy was consistent at RM0.53 million.

The Group recorded pre-tax loss of RM21.34 million for the cumulative quarter ended 31 December 2022 as compared to pre-tax loss of RM13.37 million in the corresponding cumulative quarter. Fabrication and automation segment reported lower pre-tax loss by RM6.14 million mainly due to lower mark-to-market loss on quoted shares of RM2.51 million (Q3 FY2022: RM3.60 million) couple with lower fair value adjustment on share options of RM0.30 million (Q3 FY2022: RM4.13 million). Glove segment reported pre-tax loss of RM24.83 million for cumulative quarter as compared to RM9.06 million pre-tax profit in the corresponding cumulative quarter mainly due to decrease in the gross profit and gross profit margin in tandem with the decrease in sales volume and lower average selling price of gloves. Other segment reported pretax profit of RM7.55 million for the current cumulative quarter as compared to RM11.93 million pre-tax loss in the corresponding cumulative quarter. This was mainly due to RM9.19 million share of profit in associates for Q3 FY2023 (Q3 FY2022: RM18.54 million share of losses in associates), coupled with the lower loss on dilution of interest in associates of RM Nil (Q3 FY2022: RM4.59 million), offset with lower gain on bargain purchase from investment in associate of RM Nil (Q3 FY2022: RM13.62 million).

B3) Prospects

Fabrication and automation business

The manufacturing sector is forecasted to rebound in 2022, driven by steady improvement in both the export and domestic-oriented industries as global economies are recovering from the COVID-19 pandemic. The Group continues to adopt prudent approach towards the manufacturing operations with focus on operational efficiency to drive down cost and sustain growth momentum.

The Group has achieved RM43.73 million unaudited revenue as of to-date. Judging from the remaining backlog orders to be delivered amounting to RM19.15 million, the Group expects the coming FY2023 annual revenue from this segment will be better than RM35.53 million achieved in FY2022.

Glove business

In the near team, the glove business outlook is expected to be challenging in view of the normalisation of gloves demand, declining glove average selling prices and rising production cost structure. The Group shall focus its efforts on securing new large orders, improving utilisation rate of production lines and placing greater emphasis on cost management to ensure that the Group's performance is improving.

At the moment, the Group has 10 production lines with annual capacity of 2 billion pieces of gloves. Thus far, the Group has obtained relevant certifications, licenses and qualifications, including CE marking certification and US FDA 510(k) certification. Recently, the Group also obtained halal certificate from the Department of Islamic Development Malaysia to ensure the gloves meet the Halal compliance for the Muslim community whilst protecting the health and safety of the public. With the required qualifications in place, the Group intends to focus more on targeted and effective marketing strategies to expand its geographical market and increase the sales gradually.

Over the longer-term, glove demand is expected to remain on a growth path as a result of a shift in glove usage due to higher healthcare standards and hygiene awareness in both the medical and non-medical sectors. The Group remains positive on the glove industry and will continue to focus efforts on transformation into automation to increase productivity and efficiency.
