The adoption of these revised Standards and Amendments has not affected the amounts reported in the financial statements of the Group for the current period and prior years.

The directors anticipate that the abovementioned Standards and Amendments will be adopted in the annual financial statements of the Group when they become effective and that the adoption of these Standards and Amendments will have no material impact on the financial statements of the Group in the period of initial application except as discussed below:

MFRS 9 Financial Instruments

MFRS 9 (IFRS 9 issued by IASB in July 2015) introduces new requirements for the classification and measurement of financial assets and financial liabilities and for derecognition.

Key requirements of MFRS 9:

- all recognised financial assets that are within the scope of MFRS 139 Financial Instruments: Recognition and Measurement are required to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. All other debt investments and equity investments are measured at fair values at the end of subsequent accounting periods. In addition, under MFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of equity instruments (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss.

- with regard to the measurement of financial liabilities designated as at fair value through profit or loss, MFRS 9 requires that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability, is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Previously, under MFRS 139, the entire amount of the change in the fair value of the financial liability designated as at fair value through profit or loss was presented in profit or loss.

- in relation to the impairment of financial assets, MFRS 9 requires an expected credit loss model, as opposed to an incurred credit loss model under MFRS 139. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.

- the new general hedge accounting requirements retain the three types of hedge accounting mechanisms currently available in MFRS 139. Under MFRS 9, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about an entity's risk management activities have also been introduced.

The Directors are currently assessing the impact of adoption of MFRS 9 and have not made any accounting policy decision. Thus, the impact of adopting the new MFRS 9 on the Group's annual financial statements cannot be determined now until the process is completed.

MFRS 15 Revenue from Contracts with Customers

In May 2015, MFRS 15 was issued which establishes a single comprehensive model for entities to use in accounting for revenue arising from contract with customers. MFRS 15 will supersede the current revenue recognition guidance including MFRS 118 Revenue, MFRS 111 Construction Contracts and the related interpretations when it becomes effective.

The core principle of MFRS 15 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Standard introduces a 5-step approach to revenue recognition.

Step 1: Identify the contract with a customer
Step 2: Identify the performance obligations in the contract
Step 3: Determine the transaction price
Step 4: Allocate the transaction price to the performance obligations in the contract
Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Under MFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer. Far more prescriptive guidance has been added in MFRS 15 to deal with specific scenarios. Furthermore, extensive disclosures are required by MFRS 15.

The Directors are currently assessing the impact on adoption of MFRS 15 on the amounts reported and disclosures in the financial statements. However, it is not practicable to provide a reasonable estimate of the effect of MFRS 15 until the Group completes a detailed review.

MFRS 16 Leases

MFRS 16 specifies how an MFRS reporter will recognise, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognise assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with MFRS 16's approach to lessor accounting substantially unchanged from its predecessor, MFRS 117.

At lease commencement, a lessee will recognise a right-of-use asset and a lease liability. The right-of-use asset is treated similarly to other non-financial assets and depreciated accordingly and the liability accrues interest. The lease liability is initially measured at the present value of the lease payments payable over the lease term, discounted at the rate implicit in the lease if that can be readily determined. If that rate cannot be readily determined, the lessees shall use their incremental borrowing rate.

The Directors anticipate that the application of MFRS 16 in the future may have an impact on the amounts reported and disclosures made in the Group financial statements. However, it is not practicable to provide a reasonable estimate of the effect of MFRS 16 until the Group performs a detailed review.

3. COMMENTS ABOUT SEASONAL OR CYCLICAL FACTORS

The Group's business operations cover primarily the express delivery and logistics services. The revenue of the Group will normally be affected by the numerous public and festive holidays during the quarter and period under review.
