The increase mainly attributable to the Telco revenue experienced steady growth in the business volume and traffic minutes. On the other hand, the retail revenue drop slightly due to slow growth in customer base.

Despite an increase in revenue, the Group's loss before tax increased by RM2.52 million as compared to the preceding year's corresponding quarter and this was mainly due to reduced margins, as the business felt the effects of the recent economic slowdown. The operating expenses increased for this reporting quarter mainly due to the additional provision of doubtful debts.

The reported loss of the previous quarter were substantially higher attributable to the provision of doubtful debts and impairment of the telecommunication equipment provided.

In the Telco sector, the revenue increased by 35% to RM35.52 million as compared to RM26.26 million from the previous quarter. The increase was mainly due to the increase in wholesale traffic volumes.
