B1 Review of performance

The Group achieved revenue of RM28.36 million for the period under review against RM22.73 million in the corresponding period of preceding year, representing an increase of 25%. The increase in revenue against the same quarter last year was mainly due to increase in sales from Machine Vision System (MVS). Sales from MVS have recorded an increase of 82% against the corresponding period of preceding year. The increase in sales recorded is mainly due to positive acceptance of our new products.

The Group achieved a profit before tax of RM6.89 million against profit before tax of RM10.26 million in the corresponding quarter, representing a decrease of 33%, mainly due to increase in selling and distribution expenses and decrease in other operating income such as grant related income and gain on disposal of property, plant and equipment. Correspondingly, the Group recorded a profit after tax of RM6.48 million against profit after tax of RM9.80 million in the corresponding quarter.

B2 Variation of results against immediate preceding quarter

Sales from MVS and ABI have recorded an increase of 362% and 47% respectively against the immediate preceding quarter.
