**QUARTERLY REPORT ON RESULTS FOR THE FOURTH QUARTER ENDED 31 DECEMBER 2023****A. NOTES TO THE INTERIM FINANCIAL REPORT (cont'd)**

---

**A13 Financial instruments****i) Derivatives**

As at 31 December 2023, the Group's outstanding derivatives are as follows:-

	RM'000
Forward exchange contracts - at fair value	
- Current assets	<u>809</u>

Derivatives consist of forward exchange contracts which are used to hedge the exposure to currency risk. The Group does not apply hedge accounting. As at 31 December 2023, the Group had contracts with financial institutions due within 1 year to buy RM80,666,000 and sell USD17,450,000 at contractual forward rates.

The fair values of forward exchange contracts were quoted by the financial institutions, which normally measured the fair values using present value technique by discounting the differences between contractual forward prices and observable current market forward prices using risk-free interest rate (i.e. Level 2).

**ii) Gains/(Losses) arising from fair value changes of financial liabilities**

There were no gains/(losses) arising from fair value changes of financial liabilities for the current quarter and period ended 31 December 2023.

**iii) Fair value**

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

The inputs to valuation techniques used to measure fair value are categorised into the following levels of fair value hierarchy:-

- (i) Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- (ii) Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- (iii) Level 3 - unobservable inputs for the asset or liability.

As at end of the current quarter under review, the carrying amounts of receivables, cash and cash equivalents and payables which are short-term in nature or repayable on demand are reasonable approximations of fair values.

The fair value of long term loans are measured using present value technique by discounting the expected future cash flows using observable current market interest rates for similar liabilities (i.e. Level 2). The fair values measured are considered to be reasonably close to the carrying amount reported as the observable current market interest rates also approximate to the effective interest rates of term loans.

The fair value of forward exchange contracts were quoted by the financial institutions, which normally measured the fair values using present value technique by discounting the differences between contractual forward prices and observable current market forward prices using risk-free interest rate (i.e. Level 2).

There were no transfers between levels of fair value hierarchy during the current quarter under review.

The decline in revenue was mainly driven by softening demand from Automated Board Inspection ("ABI") amidst the global economic slowdown.

Profit before tax ("PBT") for the quarter dropped by RM23.0 million or 43.9% to RM29.3 million from RM52.3 million in the preceding quarter on lower revenue and unfavorable product mix.
