#### Segmental Analysis

RMB:RM

The revenue increased mainly because of General Construction segment started the operations in 2021. However, it was offset by the decrease in Interconnect segment from USA. Despite General Construction recorded operating profit of RM2.6 million, higher loss before tax was recorded mainly due to the one-off other expenses of RM20.5 million incurred in Interconnect segment arising from written off and impairment of debt as a result of disposal of China operation, development cost and fixed assets written off/impairment.

Other income mainly consists of interest income, rental income, government grant, unrealised forex exchange gain, gain on extinguishment of debt and (gain)/loss from disposal of subsidiary.

## B3 PROSPECTS FOR THE FINANCIAL YEAR 2022

The Company continues to expose to external risks such as COVID-19 pandemic which affected the global economy particularly when there are multiple variants of the virus circulating globally.

It is still uncertain about any sign of easing international trade war tensions that affects global supply chain. The global supply chain is also affected by the continuing worldwide port congestion and China's strict lockdown policy that may affect the supplying of components.

In addition, there is an ongoing fluctuation in commodity price particularly the copper price hikes due to disruption in copper production on the supply side. The fluctuation also affected our other material costs. All these have already affected and will continue to affect our operations and orders.

The Group started new business with the introduction of construction business in 2021. The Company believes that it will serve as an avenue to improve and broaden our earning base and reduce the reliance on its existing businesses to achieve improved financial performance.
