Comparison with the corresponding period in the previous year

The Group recorded a revenue of RM7.565 million for the current quarter, a decrease of 34% as compared to RM11.471 million of the corresponding quarter in the previous year due to a decrease in the number of machines sold. The decrease in gross margin was mainly due to the significant decrease in revenue whilst certain fixed operating costs such as payroll costs remain unchanged. The Covid-19 has in a way made cost of doing business costlier and eroded margin as a result of additional costs such as quarantine costs as well as higher travelling costs incurred for the service engineers coupled with other covid-related costs incurred in order to adhere to SOPs.

The increase in other operating income in the current quarter was attributed to the gain on fair value adjustment of other investments as compared to the corresponding year quarter.

The decrease in administrative expenses was mainly due to reversal of impairment loss on trade receivables of RM367K during the current quarter as well as a write-off and write-down of inventories amounted to RM208K was made in prior year.

Financial period-to-date against preceding year corresponding financial period

The Group recorded a revenue of RM22.698 million for the period-to-date, a decrease of 47% as compared to RM43.008 million reported in the previous financial period due to a decrease in the number of machines sold. The prolonged lockdown in many countries has also made travelling of our service engineers to certain countries impossible and this has delayed the recognition of our revenue on machines shipped to overseas. The decrease in gross margin was mainly due to the significant decrease in revenue whilst certain operating costs remain fixed and unchanged.

The increase in other operating income was mainly attributed to the fair value gain from other investments during the current financial period.

B2. Variation of results against preceding quarter

Revenue for the current quarter of RM7.565 million recorded an increase of 41% against preceding quarter as Q4 saw more delivery of machines made mainly attributed to the relaxation of MCO imposed by the Government onto the industrial players. No significant variance in GP margin was noted between these two quarters.

The decrease in other operating income in current quarter was mainly due to lower fair value gain from other investments as compared to the preceding quarter.

The decrease in administrative expenses was mainly due to reversal of impairment loss on trade receivables of RM367K during the current quarter as well as a write-off and write-down of inventories amounted to RM208K was made in prior year.
