Comparison with the corresponding period in the previous year

The Group recorded a revenue of RM12.740 million for the current quarter, an increase of 137% as compared to RM5.370 million of the corresponding quarter in the previous year due to increase in sale of machines during the current quarter. Gross margin improved as a result of the increase in revenue during the current quarter while certain operating costs remained fixed.

The decrease in other operating income in the current quarter was due to lower gain on fair value adjustment of other investments as compared to corresponding quarter in the previous year.

The decrease in administrative expenses was mainly contributed by the reversal of impairment loss on trade receivables of RM235K.

Financial period-to-date against preceding year corresponding financial period

The Group recorded a revenue of RM30.003 million for the period-to-date, an increase of 98% as compared to RM15.133 million reported in the previous financial period due to increase in sale of machines in current financial period. The increase in gross margin was attributed to increase in revenue during the current period-to-date while certain operating costs remained fixed.

The increase in other operating income was mainly attributed to the fair value gain derived from other investments during the current period.

B2. Variation of results against preceding quarter

Revenue for the current quarter of RM12.740 million recorded an increase of 48% as compared to preceding quarter as the number of machines sold is more than the preceding quarter.

Decrease in other operating income in the current quarter was mainly due to the lower gain on fair value adjustment in other investments recorded as compared to the gain in the preceding quarter.
