The adoption of the new and revised FRSs, amendments to FRSs and the Issues Committee ("IC") Interpretations has resulted in changes of certain accounting policies and classification adopted by the Group as well as presentation of financial statements as described hereunder:

#### (a) FRS 101, Presentation of Financial Statements (Revised)

Prior to 1 January 2010, the components of a set of financial statements consisted of a balance sheet, income statement, statement of changes in equity, cash flow statement and notes to the financial statements.

Upon the adoption of the revised FRS 101, a set of financial statements shall now comprise a statement of financial position, statement of comprehensive income, statement of changes in equity, statement of cash flows and notes to the financial statements. The statement of comprehensive income consists of profit or loss for the period and other comprehensive income. All non-owner changes in equity previously presented in the consolidated statement of changes in equity are now presented in the statement of comprehensive income as components in other comprehensive income.

The comparative financial information on the consolidated statement of comprehensive income have been re-presented as summarised below so that it is in conformity with the revised standard:-

#### (b) FRS 139 - Financial Instruments: Recognition and Measurement

The adoption of FRS 139 has resulted in financial instruments of the Group to be categorised and measured using the accounting policies summarised below:-

#### (i) Initial recognition and measurement

A financial instrument is recognised in the financial statements when, and only when, the Group becomes a party to the contractual provisions of the instruments. A financial instrument is recognised initially at its fair value. In the case of a financial instrument not categorised as fair value through profit or loss, the financial instrument is initially recognised at its fair value plus transaction costs that are directly attributable to acquisition or issue of the financial instrument. An embedded derivative is recognised separately from the host contract and accounted for as a derivative if, and only if, it is not closely related to the economic characteristics and risks of the host contract and the host contract is not categorised as fair value through profit or loss. In the event that the embedded derivative is recognised separately, the host contract is accounted for in accordance with the policy applicable to the nature of the host contract. (ii) Financial assets

#### Loans and receivables

Loans and receivables category comprises trade and other receivables and

cash and cash equivalents. Financial assets categorised as loans and receivables are subsequently measured at amortised cost using the effective interest method. This category of financial assets is classified as current assets unless the maturities are greater than twelve months in which case they are classified as non-current assets.

#### Available-for-sale financial assets

Available-for-sale financial assets comprise investment in equity securities and unquoted investment that are not held for trading. Available-for-sale financial assets are measured at fair value with gain or loss recognised in other comprehensive income. (iii) Financial liabilities

Financial liabilities of the Group comprise trade and other payables and borrowings. All financial liabilities are subsequently measured at amortised cost using effective interest method.

Following the adoption of FRS 139, the changes to accounting policies relating to recognition and measurement of the Group's financial instruments are as follows:-

#### (i) Other investments

Prior to 1 January 2010, other investments were stated at cost and are written down when the directors consider that there is a decline other than temporary in the value of such investments. With the adoption of FRS 139, such investments are now categorised as available-for-sale financial assets and measured at fair value through other comprehensive income.

FRS 139 has been applied prospectively in accordance with the transitional provisions of the standard. In accordance to the transitional provisions for first-time adoption of FRS 139, adjustments arising from re-measuring the financial instruments as at 1 January 2010 were recognised as adjustments of the opening balance of retained profits or other appropriate reserves. Comparatives are not adjusted. Since FRS 139 is applied prospectively, its adoption does not affect the profit or loss for the preceding year corresponding quarter ended 31 March 2009.

The effects on adoption of FRS 139 on the opening reserves of the Group and other items of the consolidated statement of financial position as at 1 January 2010 are as follows:-

	Balance as at		
	1 January 2010		
	before the	Effects on	Balance as at
	adoption of	adoption of	1 January 2010
	FRS 139	FRS 139	after the
Available-for-sale investments	3,589	37	-
Fair Value Reserve	-	37	37

The adoption of other new and revised FRSs, IC Interpretations and amendments to FRSs and IC Interpretations has no financial impact on the current interim financial statements or on the consolidated financial statements of the previous financial year.
