The Group recorded a higher revenue of RM29.70 million for the current quarter as compared to the immediate preceding quarter due to high project billings for the current quarter under review following post pandemic recovery in the economy.

The Group recorded a higher profit before tax of RM3.44 million, compared to profit before tax of RM0.35 million in the immediate preceding quarter due to profit contribution from higher revenue during the current quarter under review.

#### 3 Prospects

The Group's key operations are focussed in the ICT business segment for FY2023.

For the current quarter ending 31 December 2022 under review, the ICT business recorded significant revenue growth due to the post-pandemic rolling out of projects in the Malaysian economy.

Despite the improved revenues for its ICT business and reported oversupply in the semiconductor chip market, DGB continues to experience long delivery lead times for high end network equipment, disappointingly still being quoted up to 12 months, from typically two months pre-pandemic. We can hope this situation will improve progressively as supply chains continue to regularise across industries.

The ICT businesses of EXCEL and FINTHER have separately begun to contribute positively to the Group's revenue and profit for the current quarter under review. Meanwhile, the Group is continuing to integrate the businesses of DGB, EXCEL and FINTHER in the ICT segment over the next few quarters and the Group's results will remain positive for the rest of FY2023.
