B3. Commentary on Prospects

The Malaysia economy registered a stronger growth in the second quarter of 2022 and is expected to continue its recovery on the back of ongoing policy support. On international economic environment, the ongoing geopolitical tensions and various trade sanctions contributed to elevated commodity prices resulted in supply chain issues and hence, led to higher costs and inflation globally. The local and global economic growth expected to moderate as a result of major central banks around the world has begun to tighten monetary policies to contain inflation, which has triggered fears of a recession.

The Group observed the market conditions, in line with the Malaysia government's main focus on empowering the digital economy and believe the ICT spenders will likely to come from the government sector, and for private sector will be spending more on essential services such as cyber security services.

Premised on the above and coupled with the marked acceleration in the adoption of digitalisation, the Group remains focused on executing its strategies to achieve better financial performance through strengthens its products and services to meet the current requirements and needs of the market. Barring any unforeseen circumstances, our Board of Directors is confident that that the group will weather oncoming challenges and is cautiously positive about the group's prospects for the next financial year ending 30 June 2023.
