The Group has three reportable segments, as described below, which are the Group's strategic business units. The strategic business units offer different products and services, and are managed separately because they require different technology and managing management strategy. For each of the strategic business units, the Group's Managing Director reviews internal management reports on at least a quarterly basis. The following summary describes the operation in each Group's reportable segments.

• Plantation Inputs Development, manufacturing and marketing of agricultural products

and services based on agro-technology.

• Rubber Estate Rubber planting, estate management and production of rubber cup

lumps for sale to rubber processing factories.

• Household Goods Manufacturing and marketing of plastic-related products.

There are varying levels of integration between reportable segments, namely the plantation inputs, rubber estate and household goods. This integration includes marketing activities and transfer of raw materials.

Performance is measured on segment revenue that is reviewed by the Group's Managing Director who is the Group's chief operating decision maker. Segment revenue is used to measure performance as management believes that such information is the most relevant in evaluating the results of the segments.
