17. Commentary Of Prospects

The semiconductor industry outlook for 2015 is projected to grow ranging from lowest of 6.5% up to 11%. The grow in semiconductor is continued to fuel by the strong demand for smartphones and portable devices such as solid-state drives ("SSD") and NAND flash in ultra mobile devices.

Key ASIC was expected to launch two (2) new ultra mobile products expected in Q2 and Q3 this year, namely K-Drive and K- Card to take advantage of the growing demand for these products but due to teething problem, K-Card launching has been delay until the end of 3rd quarter. Such delay has impacted the expected revenue for the Group during the 2nd quarter and the Management has taken active steps in resolving the issues. K-Drive is essentially a portable Wi-Fi personal backup device that doesn't require any internet connection to backup personal data anytime, anywhere and seamlessly. Meanwhile, K-Card is our own in-house brand for our Wi-Fi SD card that turn non Wi-Fi devices into Wi-Fi enable device.

As a result of lower revenue recorded than expected, the Group's cash flow is under pressure. The Company is taking necessary steps to address this. Notwithstanding the above, the Company is working on action plans to improve the cash flow position and the revenue with the launch of the products described above.
