1QFY2025 YoY

For the current quarter ended 30 September 2024 ("1QFY2025"), the Group's revenue came in at RM9.96 million versus RM10.68 million a year ago. While softer demand for test contacting sockets impacted performance, the Group mitigated this through our test interface products division and Kunshan manufacturing facility.

1QFY2025 PBT stood at RM0.56 million compared to RM3.16 million in the previous year corresponding quarter. Meanwhile, net profit for the current quarter under review was at RM0.32 million vis-à-vis RM3.08 million in the prior year. This was due to a combination of factors, including a shift in product mix, higher foreign exchange losses, increased depreciation from the new facility and lower interest income. It is noteworthy to mention that the joint venture ("JV") with Shenzhen HFC Co., Ltd. ("Shenzhen HFC"), via the JV entity, HFC Tech Sdn. Bhd. ("HFC Tech") has begun to bear fruit and contributed positively to the Group's earnings in the current quarter under review.

B2 Financial review for current quarter compared with immediate Preceding Quarter

1QFY2025 QoQ

On a quarter-on-quarter ("QoQ") basis, the Group's revenue rose 5.8% QoQ to RM9.60 million in 1QFY2025 from RM9.41 million in the immediate preceding quarter. The improvement stemmed from higher revenue from our Kunshan manufacturing facility. 1QFY2025 PBT and net profit stood at RM0.56 and RM0.32 million respectively versus RM0.55 million and RM0.62 million in 4QFY2024. This was primarily due to higher foreign exchange losses incurred in the current quarter under review at RM0.53 million as compared to RM0.01 million in the immediate preceding quarter. Adjusting for the foreign exchange movement, PBT and net profit for 1QFY2025 would have been higher on a QoQ basis.

B3 Prospects for financial year ending 30 June 2025.

According to the World Semiconductor Trade Statistics ("WSTS"), the global semiconductor sales in 2024 and 2025 are expected to reach \$611.2 billion and \$687.4 billion, indicating a 16.0% and 12.5% growth respectively. This is primarily driven by the memory and logic sectors, which certainly augurs well for the industry as well as the Group. We remain laser focused on the execution of our 6 growth drivers (Organic Growth, China Manufacturing Facility, Test Engineering Solutions Business, Merger and Acquisition and Partnerships, Game-Changing New Products, and Monetising Intellectual Properties by Licensing) as well as JF 4.0 transformation.

Our 6 growth engines have been gaining healthy traction and we expect this positive momentum to continue in FY2025. This includes driving growth through mergers and acquisitions ("M&A"). We have recently announced the proposed acquisition of two synergistic companies that will enable us to broaden our offerings, widen our market reach and further cement the Group's position in the semiconductor value chain both at the back-end and the front-end. These earnings-accretive acquisitions, with their profit guarantees, will ultimately strengthen our customer value propositions and enhance the Group's income stream.

Separately, the JV with Shenzhen HFC also made good progress with machine installation completed and production is expected to commence soon. Over in China, the demand outlook is positive where the utilization at our China facility continues to pick up. On balance, we remain optimistic about the long-term prospects of the Group underpinned by the factors outlined above. The Board expects the FY2025 financial performance to be satisfactory, barring any unforeseen circumstances.

B4 Profit forecast, profit guarantee and internal targets

The Group does not provide any profit forecast, profit guarantee or internal targets in any publicly available document or announcement.
