B DISCLOSURE REQUIREMENTS AS SET OUT IN APPENDIX 9B OF THE ACE MARKET LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD

B1 Review of performance

In the current quarter ended 31 March 2016, ABT Group registered a total comprehensive loss of approximately RM 28.828 million on the back of a revenue of RM 9.518 million. There is no preceding year corresponding period comparison due to the change in the financial year end from 31 January to 31 March. The Group's revenue as at 31 March 2016 was as a result of active investments in marketable securities in Malaysia and Australia. The Group's incubation division continued to maintain its strategic investments in marketable securities of synergistic companies, which are considered medium to long term investments, and the division is actively reviewing incubation activities with these companies.

The Group's comprehensive loss is as a result of the marking to market of our medium to long term investment. As these investments are principally marketable securities, investment values have been severely impacted due to the currnet prevailing poor stock exchange sentiment. The regional market uncertainty stems from numerous key factors such as the economic slowdown of China which has effected the trade balance in the region as well as weakness in confidence resulting from the turbulence faced by the capital markets in North Asia, which has cast a shadow over the economic outlook of the Southeast Asia region. The fluctuations of the local currency have netted an outflow of foreign fund investment in the country's capital market and made planning for business operations difficult to predict and forecast. The currency volatility is further exasperated due to the unclear signals given by the US Treasury on the continued probability of an interest rate hike, which could have a ripple effect in raising cost of debt financing internationally.

The Group is confident that value of its incubation division will yield positive and improved results over time. Management is presently focused in enhancing the business operations of the incubate companies.

Current

Dresseding

Due to the volatility of high technologies and start-ups, gestation periods are expected to be long drawn and as such tangible earnings will take time.

B2 Variation of results against immediate preceding quarter

| | quarter | quarter |
|-------------------------------|-------------------------|----------------------------|
| | 31 March 2016 RM'000 | 31 December 2015 RM'000 |
| Revenue | 2,943 | 91 |
| Profit/(Loss) before taxation | (10,415) | 7,076 |

The revenue in the current quarter was generated from potfolio investment whilst the revenue in the preceeding quarter was generated from Green Technology products. Loss registered in the current quarter mainly due to mark to market of investment securities, impairment of investment in unquoted shares and impairment of plant & equipment. Loss for the preceeding quarter was due to marking to market of investment securities.

B3 Prospects

Given the present bearish economic climate, the Group expects the remainder of the financial year to be very challenging. Nevertheless, management expects some tangible sales results from the Effective Microorganism (EM) project which should provide a small but stable revenue stream for EM incubatee. Performance from its investments in the synergistic companies is expected to face market pressure however, management anticipates that these investments will improve in the medium to long term.

B4 Profit forecast, profit guarantee and internal targets

The Group did not provide any profit forecast, profit guarantee or made public any internal targets for the period under review.

B5 Income tax expense

Certain statutory income of its incubatees are exempted from income tax pursuant to the respective capital gains, pioneer status and foreign exempt income. As such, the effective tax rate for the group is lower than the statutory tax rate for the current quarter and financial year to date.

B6 Group's borrowings and debt securities

The Group has no borrowings or debt secutities

B7 Material litigation

As at this reporting date, neither the Company nor its subsidiary companies are engaged in any litigation or arbitration, either as plaintiff or defendant, which has a material effect on the financial position of the Company or its subsidiary companies and the Board is not aware of any proceedings pending or threatened, or of any fact likely to give rise to any proceedings, which might materially and adversely affect the position or business of the Company or its subsidiary companies.

There is no dilution in the earnings per share of the Company as the average market values of the warrants as at 31 March 2016 together with the exercise price were higher than the market value of the ordinary shares. Accordingly, there was no assumed full conversion of the warrants into ordinary shares which could result in the dilution of the Company's earning per share.
