The increase in profit before taxation approximately by 73% compared to the immediate preceding quarter was mainly due to the increase in revenue, improved margin and cost savings in Administrative expenses during the current quarter.

B3. Prospects

The market sentiment remains uncertain with the recent exposés surrounding financial debacles at home coupled with the escalating trade war between certain influential economic powerhouses.

With the ringgit sliding down to its lowest level since November 2017, the profitability of the Group is expected to be affected in the coming quarters as most of its supplies are transacted in USD.

Having said that, the tax holiday following the zerorisation of the Goods and Services Tax (GST) would encourage discretionary spending and private consumption that could bring some relief to the Group.

The Board of Directors would exercise extra caution in conducting their duties during these periods and are optimistic of the Group's long term prospect.

B4. Profit forecast

No profit forecast has been issued by the Group previously in any public document.
