NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD ENDED (" FPE") 30 SEPTEMBER 2018

A. EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARDS (MFRS134):

A1. Basis of preparation

The interim financial statements are unaudited and have been prepared in accordance with MFRS134: Interim Financial Reporting and Appendix 9B of the ACE Market Listing Requirements of Bursa Malaysia Securities Berhad ("Bursa Securities") ("Listing Requirements").

The interim financial statements should be read in conjunction with the Audited Financial Statements of the Company for the financial year ended ("FYE") 31 December 2017 and the accompanying explanatory notes attached to the interim financial report.

A2. Summary of significant accounting policies
Adoption of new and amended standards

During the financial period, the Group and the Company have adopted the following amendments to MFRSs issued by the Malaysian Accounting Standards Board ("MASB") that are mandatory for current financial period:

Annual Improvements to MFRSs 2014–2016 Cycle

- Amendments to MFRS 1
- Amendments to MFRS 128

Amendments to MFRS 2	Classification and measurement of Sharebased payment Transactions
Amendments to MFRS 4	Applying MFRS 9 Financial Instruments with MFRS 4 Insurance Contracts
MFRS 9	Financial Instruments (IFRS 9 issued by IASB in July 2014)
MFRS 15	Revenue from Contracts with Customers
Amendments to MFRS 15	Clarifications to MFRS 15
Amendments to MFRS 140	Transfers of Investment Property
IC Interpretation 22	Foreign Currency Transactions and Advance Consideration

Except for the adoption of MFRS 9 and MFRS 15 as further explained below, the adoption of the above amendments and IC Interpretation to published standards did not have any significant impact on the current period or any prior period and is not likely to affect future periods.

<u>MFRS 9 *Financial Instruments' replaces MFRS 139 'Financial Instruments: Recognition and Measurement*</u>

MFRS 9 retains but simplifies the mixed measurement model in MFRS 139 and establishes three primary measurement categories for financial assets: amortised cost, fair value through profit or loss and fair value through other comprehensive income ('OCI'). The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are always measured at fair value through profit or loss with an irrevocable option at inception to present changes in fair value in OCI (provided the instrument is not held for trading). A debt instrument is measured at amortise

cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest.

For liabilities, the standard retains most of the MFRS 139 requirements. These include amortised cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The main change is that, in cases where the fair value option is taken for financial liabilities, the part of fair value change due to anentity's own credit risk is recorded in other comprehensive income rather than the income statement, unless this creates an accounting mismatch.

MFRS 9 introduces an expected credit loss ('ECL') model on impairment for all financial assets that replaces the incurred loss impairment model used in MFRS 139. The ECL model is forward-looking an deliminates the need for a trigger event to have occurred before credit losses are recognised.

The Group has applied the simplified approach to measuring expected credit losses which uses a life time expected loss allowance for all trade receivables and contract assets. The Group's provision matrix is based on its historical credit loss experience with trade receivables and contract assets of similar credit risk characteristics, adjusted for forward-looking factors specific to the category of debtors and the economic environment.

On the date of initial application, MFRS 9 did not affect the classification and measurement of the Group's financial assets and financial liabilities. As permitted by the transitional provisions of MFRS 9, the Group has elected not to restate comparative figures and thus if there are any adjustments, these adjustments shall be recognised in the opening retained earnings of the current period.

MFRS 15 *Revenue from Contracts with Customers*

The Group has adopted MFRS 15 in the current period. The core principle in MFRS 15 is that an entity recognised revenue to depict the transfer of promised goods and services to customers for an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Revenue is recognised when a customer obtains control of goods or services, i.e. when the customer has the ability to direct the use of and obtain the benefits from the goods or services.

Based on the Group's assessment, the effects of applying the new standard on the Group's financial statements are as follows:

Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The core principle in MFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to the customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The timing and amount of revenue recognised for the sales of good under MFRS 15 does not have any impact on the current accounting policy.

A2. Summary of significant accounting policies (cont'd)
Adoption of new and amended standards (cont'd)
Standards issued but not yet effective (cont'd)

The Group and the Company intend to adopt above MFRSs when they become effective.

The initial application of the above mentioned MFRSs is not expected to have any significant impact of the financial statements of the Group and of the Company except as mentioned below:

i) Annual improvements to MFRSs 2015 – 2017 Cycle (amendments to MFRS 3 *Business Combinations*, MFRS 112 *Income Taxes* and MFRS 123 *Borrowing Cost*).

ii) MFRS 16 *Leases*

MFRS 16, which upon the effective date will supersede MFRS 117 *Leases*, introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. Specifically, under MFRS 16, a lessee is required to recognise a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. Accordingly, a lessee should recognise depreciation of the right-of-use asset and interest on the lease liability, and also classifies cash repayments of the lease liability into a principal portion and an interest portion and presents them in the statement of cash flows. Also, the right-of-use asset and the lease liability are initially measured on a present value basis. The measurement includes non-cancellable lease payments and also includes payments to be made in optional periods if the lessee is reasonably certain to exercise an option to extend the lease, or not to exercise an option to terminate the lease. This accounting treatment is significantly different from the lessee accounting for leases that are classified as operating leases under the predecessor standard, MFRS 117.

iii) MFRS 17 *Insurance Contracts*

MFRS 17 which will supersede MFRS 4 *Insurance Contracts* is effective for annual reporting periods beginning on or after 1 January 2021 with earlier application permitted as long as MFRS 9 and MFRS 15 are also applied. An entity identifies as insurance contracts those contracts under which the entity accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder. MFRS 17 requires to separate specified embedded derivatives, distinct investment components and distinct performance obligations from the insurance contracts, as well as to divide the contracts into groups that an entity will recognise and measure. MFRS 17 also includes an optional simplified measurement approach, or premium allocation approach, for simpler insurance contracts.

iv) MFRS 119 *Plan Amendment, Curtailment or Settlement*

Amendments to MFRS 119 'Employee Benefits' requires an entity to remeasure the net defined benefit liability(asset) when there is a plan amendment, curtail mentor settlement, to determine past service cost or again or loss on settlement. The amendments specify that when an entity remeasures the net defined benefit liability(asset), the entity determines the current service cost and net interest for the remainder of the annual reporting period using the assumptions used for the remeasurement and net interest for the remainder of the annual reporting period on the basis of the remeasured net defined benefit liability(asset). The amendments further clarify how the requirements on accounting for a plan amendment, curtailment or settlement affect the asset ceiling requirements.

An entity shall apply Amendments to MFRS 119 prospectively and earlier application is permitted.

v) Amendments to References to the Conceptual Framework in MFRS Standards (amendments to MFRS2 'Share-Based Payment', MFRS3 'Business Combinations', MFRS101 'Presentation of Financial Statements', MFRS108 'Accounting Policies, Changes in Accounting Estimatesand Errors', MFRS 134 'Interim Financial Reporting', MFRS 137 'Provisions, Contingent Liabilities and Contingent Assets', MFRS 138 'Intangible Assets', IC Interpretation 19 'Extinguishing Financial Liabilities with Equity Instruments' and IC Interpretation 22 'Foreign Currency Transactions and Advance Consideration')
