### **B2. Material Changes in the Current Quarter's results compared to the results of the immediate Preceding Quarter (Cont'd)**

The total revenue of RM108.0 million recorded for the current quarter was lower as compared to the revenue in the preceding quarter of RM109.2 million mainly due to lower revenue contribution from Trading and M&E Engineering Services in the current quarter.

### **B3. Prospects**

Most, if not all, companies, including OCK, experienced the negative effects brought about by the current global COVID-19 pandemic, in varying degrees, particularly in the second quarter of the year due to the mandatory shut down. OCK envisages that the market will remain challenging and volatile, mainly caused by factors triggered by the pandemic. Nevertheless, moving forward, OCK is optimistic that its businesses will quickly turn around and be on its growth path again. As we embrace the new norm in business dealings, adaptability will be essential to grow the business in the near future.

The demand for network services is expected to increase as the various restrictions imposed by the authorities pertaining to the pandemic are being eased. The Group is also very cognisant of the possibility of re-imposition of lockdowns globally if these reported second or third wave were to worsen. Re-imposition or otherwise, telecommunication operators are moving towards tower sharing to reduce their respective capital expenditure. OCK will be at the forefront to fulfil these demand for tower sharing.

#### **TOWERCO**

OCK is poised to adopt a two-prong strategy to grow its telecommunication tower business whereby the number of telecommunication towers under its portfolio will be increased as well as to further expand its existing regionally. OCK will also continue to entrench its position as one of the largest providers of telecommunication network services in Malaysia.

To date OCK has a telecommunication tower portfolio of more than 4,200 towers across Myanmar, Vietnam and Malaysia. Its towerco recurring revenue stream provides a commendable contribution to the Group. With that said, the Group's recurring income from this segment will continue to grow as OCK continues to increase its tower portfolio across the region.

In Vietnam, OCK is the largest independent telecommunication towerco with over 2,700 telecommunication sites. The Group has a pipeline of targeted telecommunication sites to be acquired in 2020 as part of its brownfield expansion plans in Vietnam.

In Myanmar, OCK provides telecommunication infrastructure and resource supply services to its clients with a track record of completing and owning more than 1,000 telecommunication sites. The Group is aggressively building and acquiring more sites in this greenfield telecommunication market.

In Malaysia, OCK has made a strong tower portfolio growth in FYE2019 as compared to previous years, owning close to 500 telecommunication sites to date. This year in 2020, albeit the limited impact from the COVID 19 Pandemic effect, OCK will still continue its growth plan at a slower pace and will also continue to add additional towers into its local portfolio.

**B3. Prospects (Cont'd)**

**5G**

OCK is proud to announce that the Group has developed a smart pole proven to be able to support the large scale rollout of the 5G network. To date, the Group has 2 demo telecommunication sites erected in Langkawi as part of Malaysia's 5G trials and participated in the deployment of four 5G telecommunication sites in Sarawak. As a turnkey telecommunication network solutions provider, OCK is ready in terms of technical know-how and equipment solutions to support this next wave of technological expansion.

Despite the negative outlook of the global markets, OCK remains optimistic of the telecommunication industry as a whole. OCK is positive of the implementation of the RM21.6 billion NCFP in Malaysia which is already benefitting OCK with a fairly large order pipeline.

With 5G expected to be launched in the 2H 2020, OCK is in a prime position to secure more projects. With the implementation of 5G, the functionality is vast which includes smart solutions to various industries such as smart city, smart agriculture, smart traffic solutions and many more. The Group has positioned itself to capture future opportunities arising from this advancement through the partnership with China United Network Communications Group Co Ltd as they have proven track record in implementing smart city platforms and applications in a few cities in China which can be tailored to the Malaysian market's needs.

**GREEN ENERGY SOLUTIONS**

In line with the Government's initiatives for the green renewable energy sector, the Group is enhancing its solar renewable energy segment via acquisition of solar farms to fortify its secondary recurring income stream. OCK is actively participating in the Government's initiatives on large scale solar projects. As a turnkey solutions provider in the solar business, OCK is well equipped with engineering, procurement and construction capabilities to build as well as own solar farms.

One of OCK's aspirations is to reduce the carbon footprint as it continues to expand its businesses. The solar renewable energy segment provides OCK with the platform to do so, as well as build a secondary recurring income base via our solar farms through greenfield and brownfield opportunities.
