#### B3. Commentary on prospects

The outlook for the solar photovoltaic industry in Malaysia remains optimistic with the Government's firm commitment toward the development of the renewable energy ("RE") industry under its Energy Transition Outlook announced on 9 March 2023 where the power sector is expected to increase its renewable energy capacity to 31% by 2025 and 40% in 2035, with solar energy slated to become the dominant RE source in the system.

In late 2022, the Government announced to impose a 20 sen/kWh Imbalance Cost Pass-Through mechanism surcharge from the previous 3.7 sen/kWh on medium voltage (MV) and high voltage (HV) commercial and industrial (C&I) users. The increase in tariff rate is expected to accelerate the adoption of solar energy as efficient energy by companies, which augurs well for the solar PV industry.

The Ministry of Natural Resources, Environment and Climate Change ("NRECC") has announced several revisions to the Corporate Green Power Programme ("CGPP"), including the latest application period commencing on 9 May 2023 to the earlier of 31 December 2023 or until the quota has been fully taken up. The additional quota of 200MW brings the total quota for the CGPP to 800MW from the initial quota of 600MW. The Energy Commission has stated that such a quota aligns with the Malaysian Government's target to increase the share of renewable energy in the country's installed capacity to 31% by 2025. The Group is looking forward to securing more projects with the opening application of CGPP.

The Malaysian Government's decision to allow the export of RE will enable the country to capitalise on the robust demand in the region, particularly Singapore where the demand for imported RE is the strongest in the region. The expected higher return from the RE export market will spur the installation of local RE generation capacity, which bode well for the local RE players. Pending details on the RE export framework from the government, the lifting of RE export ban present opportunity to the Group to explore new export markets and offer comprehensive RE solutions to clients beyond Malaysia.

As at 31 March 2023, the unbilled order book stood at RM550 million, which will be progressively recognised in the financial years ending 31 March 2024 and 2025. The Group will continue to grow its order book, capitalising on the recent release of 800 MW quota for solar PV assets under the CGPP, and remains upbeat on the industry outlook, underpinned by a robust job pipeline in private large-scale power plants, residential, commercial & industrial projects. Under the Powervest programme, the Group has secured a cumulative capacity of 74.5 megawatts from multiple corporate power purchase agreements, which is expected to contribute RM32.7 million annual recurrent revenue to the Group upon full completion within the next 12 to 18 months. On the supply side, the solar panel price gradually declines as the material prices are heading toward a declining trend.

Barring any unforeseen circumstances, the Board is of the view that the Group's overall performance would remain satisfactory for the coming financial year.
