For the quarter under review, the Group's revenue decreased by RM70.74 million or -49.33% to RM72.65 million from RM143.39 million compared to the preceding year's quarter ended 30 June 2023. The decrease in revenue was primarily attributed to the completion of all LSS4 projects, which were still actively ongoing in the corresponding quarter of the previous year.

However, the profit before tax was higher mainly driven by improved margins in the commercial and industrial business segment, and electricity sales contributions from three LSS4 plants owned by the Group.

### **B3.** Commentary on prospects

The outlook for the renewal energy ("RE") industry in Malaysia remains optimistic underpinned by the Government's aggressive effort to increase its RE capacity to 70% of Malaysia's total energy mix, with an aspiration to achieve net zero by 2050. Further, the power sector is expected to increase its RE capacity to 31% by 2025 and 40% in 2035, with solar energy slated to become the dominant RE source in the system.

The recent introduction of the Corporate Renewable Energy Supply Scheme ("CRESS") would liberalise the green power market benefiting both RE generators and RE consumers in the immediate term. CRESS is a step towards the liberalisation of the energy market in Malaysia with the introduction of an open grid access system whereby third parties can supply or purchase electricity via the grid network system with a predetermined system access charge. The move would drive the growth of corporate power purchase agreements and boost penetration of RE. Solar EPCC players stand to gain from CRESS as it is anticipated to increase their project intake from the commercial and industrial sectors.

As at 31 July 2024, the unbilled order book stood at RM469 million, which will be progressively recognised in the financial years ending 31 March 2025 and 2026. The Group will continue to grow its order book, capitalising on the imminent awards of EPCC contracts for CGPP projects. Looking beyond CGPP, the 2 gigawatts LSS5 quota, coupled with the additional 800 megawatts quota allocations under NEM 3.0 and NEDA, presents further avenues to expand the Group's project pipeline. Under the Powervest programme, the Group has secured a cumulative capacity of 100 MWp from multiple corporate power purchase agreements, which is expected to contribute RM42.7 million annual recurrent revenue to the Group upon full completion within the next 12 to 18 months.

Barring any unforeseen circumstances, the Board is of the view that the Group's overall performance would remain satisfactory for the coming financial year.
