B. ADDITIONAL INFORMATION REQUIRED BY THE ACE MARKET LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD

B1. Review of Group Performance

The Group recorded revenue of RM23.7 million for current financial period, of which engineering, procurement, construction & commissioning ("EPCC") services contributed more than 95% of the Group's total revenue. The Group's profit before taxation("PBT") for the current financial period under review was RM2.7 million. This represents an increase of 111.3% and 108.7% respectively as compared to revenue and PBT achieved in same quarter of previous corresponding period. This is largely attributed to increase in number of projects and their contract sum in current quarter. Administrative expenses during the financial period were mainly due to staff cost amounting to RM0.9 million incurred during the period.

During the financial period under review, the Government had implemented four (4) different phases of National Recovery Plan ("NRP") which are currently being enforced across all the States in Malaysia. Nevertheless, our Group continued to operate on full scale whilst practicing internal standard operating procedures ("SOP") to safeguard the employees and subcontractors' health and to curb the spread of COVID-19.

B2. Comparison with Immediate Preceding Quarter Results

	Current Quarter 30.09.21 RM'000	Preceding Quarter 30.06.21 RM'000	
Revenue	23,725	25,162	
Profit before tax	2,738	2,342	

Profit before tax was higher in current quarter as compared to immediate preceding quarter despite lower revenue recorded in current quarter mainly due to higher gross profit recorded resulted from better project mix.

B3. Prospects

The government of Malaysia ("Government") is working towards increasing the use of renewable energy ("RE") resources, including mini-hydro, biomass, biogas and solar as an initiative to reduce carbon dioxide (CO₂) emission. In relation thereto, the Energy Commission of Malaysia had, on 12 March 2021, announced the awards of 823.06 MW of solar quota pursuant to the LSS programme under the "Malaysian Electricity Industry to Attract RE Investment" (dubbed as LSS@MEnTARI) which is the fourth LSS programme and is for Peninsular Malaysia. This LSS@MEnTARI involves the largest total solar quota awarded thus far as compared to the previous LSS1, LSS2 and LSS3 programmes which ranged between 250 MW and 500 MW.

This will provide us with opportunities to provide EPCC of solar PV systems and power plants. We will continue to leverage on our core competency and experience in providing end-to-end services for potential solar PV projects. In addition, we also provide RE and environmental consulting services to customers who are in the preparation phase of their bidding of solar PV projects under LSS programmes.

Since the start of FY2022, we had secured new EPCC contracts with a combined value of RM135.0 million, of which it consists of 2 EPCC contracts for the development of large scale solar photovoltaic ("LSSPV") power plants under the LSS@MEnTARI programme and some Rooftop Solar PV systems contracts under the Net Energy Metering ("NEM") and Self Consumption ("SELCO") programme. The new contract wins bring the current outstanding orderbook to RM282.0 million and is expected to contribute positively to the Group's top and bottom line over the next three years.

B3. Prospects (cont'd)

We will also continue to strengthen our core competency in EPCC by expanding locally (i.e. through the establishment of sales and technical support offices, and purchase of new equipment and tools to support our EPCC projects) and internationally (i.e. starting with setting up a sales and technical support office in Vietnam in the near term to explore business opportunities in the southern part of Vietnam).

Apart from EPCC services for solar type of RE power plants, we have also ventured into providing EPCC services for biomass RE power plants to diversify our source of revenue. The achievement of this venture has been encouraging as proven by the award of 2 EPCC contracts in relation to the development of a 10 MW and a 2 MW biomass RE power plants, both of which are located in Terengganu.

In addition, we are also in the midst of developing a 1.2 MW biogas power plant in Kelantan, upon commissioning of which in 2023 will provide our Group with a new revenue stream that is recurrent in nature from the sale of electricity produced by the power plant to the state's power grid.

Our Group does not foresee any material adverse effect on the financial position or business of our Group arising from the implementation of NRP as we are allowed to operate with strict compliance to SOP. However, the Group will continue to monitor the situation to assess and address the impact of current development of COVID-19 disease on its business and financial position.

Barring any unforeseen circumstances, the Board is cautiously optimistic that the Group's performance will remain satisfactory for the remaining period to the end of the financial year ending 30 June 2022.
