B3. PROSPECT AND OUTLOOK

The global oversupply of gloves affecting our customers is expected to continue and no significant market recovery is expected to occur until late 2024, due to excessive capacity expansion by glove manufacturers during the Covid-19 pandemic. Capacity rationalisation leading to a slowdown in glove manufacturers' expansion is expected to have a negative impact on the Group, as project-driven revenue remains the Group's top revenue contributor.

Notwithstanding the current negative sentiment, global glove consumption is expected to increase in the long term as awareness and use of gloves increases, especially in emerging markets with low glove consumption where gloves are essential, particularly in the healthcare sector.

However, as the business environment remains challenging in the near future, the Group will continue to focus on better cost management and operational efficiency to mitigate the impact of the negative business environment. The Group expects performance in FY2023 and FY2024 to be very challenging. The Group will continue to improve and innovate to weather this challenging period while implementing sustainable business practices.
