B3. Prospectus and Outlook

Following the announcement by the government of the National Recovery Plan, a fourphase exit strategy detailing the path towards the reopening and resumption of economic sector amidst the ongoing Covid-19 pandemic, all economic sectors has since reopened, subject to compliance with SOPs.

Despite our business growth is related to macro-economic activities and government policy, with our business strategy focusing on the packaging and electrical and electronic ("**E&E**") industry, we are able to achieve positive growth and maintain profitability. On the return to post pandemic normalcy, the Malaysia's manufacturing output in this quarter achieved growth as a result of domestic-led recovery and export growth, especially for the needs in packaging and spiking demands for E&E products.

We anticipated the challenges from the disruption of global supply chains and the surge of commodity prices by actively engaging our current suppliers, sourcing alternatives and overstocking our inventory.

We mitigate the impact of labour shortage by investing into machineries with high efficiency and productivity.

We continually raise our profile domestically and internationally. By being very close to our customers' product development, we are able to provide our customers with superior product and better customer services. We believe our strategy will give us a strong foundation for the future expansion, especially in the moment with less Covid-19 related restriction.
