## **INTERIM FINANCIAL REPORT FOR THE THIRD QUARTER ENDED 31 JANUARY 2023**

#### **B3.** Commentary on Prospects

With the utilisation of IPO proceeds as disclosed in Note B14 and our Prospectus, the Group's expansion plan is expected to contribute positively in the future.

The Group has completed its Acquisition of New Building which is a piece of industrial land with existing and ready built factory as well as office in Balakong industrial area on 27 September 2022. In addition, the Group has upgraded its manufacturing capacities and increase its use of automation by acquiring new and improved machineries that provides higher efficiency, precision and output. The relocation of the Group's manufacturing operation to the New Building provides the Group an opportunity to redesign its manufacturing processes and systems as well as identify and reduce inefficiencies in the use of production space.

The Malaysian government is continuously taking initiatives to reduce the high non-revenue water ("NRW") rates and to promote higher efficiency and sustainability by improving the water treatment plants across the country. These efforts include upgrading its water flowmeter and building new water treatment plants to overcome water shortage issue. There are several upgrading projects for NRW and billing works as well as replacement of water instrumentations which are open for tender and Cosmos has tendered for some of these projects. The Group anticipate that these projects will contribute positively to the business once these tenders are secured.

The Organisation of the Petroleum Exporting Countries ("OPEC") has raised its 2023 global oil demand growth forecast in its first upward revision for months, due to China's relaxation of COVID-19 restrictions, and trimmed supply forecasts for Russia and other non-OPEC producers, pointing to a tighter market.

(Source: <a href="https://www.reuters.com/business/energy/opec-raises-forecast-china-led-oil-demand-growth-2023-2023-02-14/">https://www.reuters.com/business/energy/opec-raises-forecast-china-led-oil-demand-growth-2023-2023-02-14/</a>)

In view of the positive outlook in the global oil demand for 2023, the Group remains positive with the market demand for the fabricated metal products which is mainly driven by oil demand. Having said that, most global economies are facing elevated inflation and tighter monetary policy which will weigh in on the global growth. In spite of the reopening of China's economy which is expected to have some positive spill over effect to the global economy, the balance of risks to global growth outlook remains tilted to the downside.

The uncertainty in the global economy remains a concern for management. Nevertheless, the management remains cautiously optimistic and shall proactively manage any challenges the Group may face in the future.
