b) Financial risk management

The Group has exposure to the following risks from its use of financial instruments :-

- Credit risk
- Liquidity and cash flow risk
- Market risk
- Operational risk

ACCOUNTANTS' REPORT**31. Financial instruments (Cont'd.)****b) Financial risk management (Cont'd.)****i) Credit risk**

Credit risk is the risk of a financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Group's exposure to credit risk arises principally from its receivables from customers.

Trade receivables*Risk management objectives, policies and processes for managing the risk*

The credit risk is controlled by the application of credit approvals, limits and monitoring procedures. Credit risks is minimised and monitored via strictly limiting the Group's associations to business partners with high credit worthiness. The Group also has an internal credit review which is conducted if the credit risk is material. Trade receivables are monitored on an ongoing basis via Group management reporting procedures.

At each reporting date, the Group assesses whether any of the trade receivables are credit impaired.

The gross carrying amounts of credit impaired trade receivables are written off (either partially or fully) when there is no realistic prospect of recovery. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. Nevertheless, trade receivables that are written off could still be subject to enforcement activities.

There are no significant changes as compared to previous year.

Exposure to credit risk, credit quality and collateral

As at the end of the reporting period, the maximum exposure to credit risk arising from trade receivables is represented by the carrying amounts in the statement of financial position.

The trade receivables are not secured by any collateral or supported by any other credit enhancements.

Concentration of credit risk

The following shows the total amount due from the top five receivables as at the reporting date, which represents approximately 95% (31.10.2021 – 84%, 31.10.2020 – 97%, 31.10.2019 – 98%) of the total trade receivables.

ACCOUNTANTS' REPORT**31. Financial instruments (Cont'd.)****b) Financial risk management (Cont'd.)****i) Credit risk (Cont'd.)**Trade receivables (Cont'd.)*Recognition and measurement of impairment losses*

The Group uses an allowance matrix to measure the expected credit losses ("ECL") of trade receivables from individual customers, which comprise a very large number of insignificant balances outstanding.

To measure the ECLs, trade receivables have been grouped based on credit risk and days past due.

Where a trade receivable has a low credit risk, it is excluded from the allowance matrix and its ECL is assessed individually by considering historical payment trends and financial strength of the receivable.

The following table provides information about the exposure to credit risk and ECLs for trade receivables as at the financial period/year which are grouped together as they are expected to have similar risk nature :-

Trade receivables that are neither past due nor impaired are creditworthy customers with good payment record with the Group. None of the Group's trade receivables that are neither past due nor impaired have been renegotiated during the financial period/year.

Trade receivables that are past due but not impaired are due to the management is of the view that these debts will be collected in due course.

Cash and cash equivalents

The cash and cash equivalents are held with banks and financial institutions. As at the end of the reporting period, the maximum exposure to credit risk is represented by their carrying amounts in the statement of financial position.

These banks and financial institutions have low credit risks. In addition, some of the bank balances are insured by government agencies. Consequently, the Group is of the view that the loss allowance is not material and hence, it is not provided for.

As at the end of the reporting period, the maximum exposure to credit risk is represented by their carrying amounts in the statement of financial position.

As at the end of the reporting period, the Group did not recognised any allowance for impairment losses.

ii) Liquidity and cash flow risk

Liquidity risk is the risk that the Group will not be able to meet their financial obligations as they fall due. The Group's exposure to liquidity risk arises principally from its various payable and borrowings.

The Group maintain a level of cash and cash equivalents deemed adequate by the management to ensure, as far as possible, that it will have sufficient liquidity to meet their liabilities when they fall due.

It is not expected that the cash flows included in the maturity analysis could occur significantly earlier or at significantly different amounts.

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and other prices that will affect the Group's financial position or cash flows.

Currency risk

The Group is exposed to foreign currency risk on sales and purchases that are denominated in a currency other than the functional currency of the Group. The currencies giving rise to this risk are primarily Euro ("EUR"), Renminbi ("RMB") Singapore Dollar ("SGD") and US Dollar ("USD").

Risk management objectives, policies and processes for managing the risk

The exposure to currency risk is monitored by the management and it is not expected to have a material impact on the financial performance of the Group.

Interest rate risk

The Group's fixed rate borrowings are exposed to a risk of change in their fair value due to changes in interest rates. The Group's variable rate borrowings are exposed to a risk of change in cash flows due to changes in interest rates. Short-term investments such as deposits with licensed bank are not significantly exposed to interest rate risk.

Risk management objectives, policies and processes for managing the risk

The Group's policy is to borrow principally on the floating rate basis but to retain a proportion of fixed rate debt. The objectives for the mix between fixed and floating rate borrowings are set to reduce the impact of an upward change in interest rates while enabling benefits to be enjoyed if interest rates fall.

iii) Market risk (Cont'd.)

Interest rate risk (Cont'd.)*Cash flow sensitivity analysis for variable rate instruments*

At the reporting date, if interest rates had been 100 basis points lower/higher, with all other variables held constant, the Group's profit net of tax would have been RM605 (31.10.2021 – RM1,490, 31.10.2020 – RM243, 31.10.2019 – RM47) higher/lower, arising mainly as a result of lower/higher interest expense on floating rate borrowings. The assumed movement in basis points for interest rate sensitivity analysis is based on the currently observable market environment.

iv) Operational risk

The operational risk arises from the daily activities of the Group which includes legal, credit reputation and financing risk and other risks associated to daily running of its business operations.

Such risks are mitigated through proper authority levels of approval limits, clear reporting structure, segregation of duties, policies and procedures implemented and periodic management meetings.

In dealing with its stewardship, the directors recognise that effective risk management is an integral part of good business practice.

The directors will pursue an ongoing process of identifying, assessing and managing key business areas, overall operational and financial risks faced by the business units as well as regularly reviewing and enhancing risk mitigating strategies with its appointed and key management personnel.

c) Fair value information

The carrying amounts of the Group's financial assets and financial liabilities as at the end of the reporting period approximately their fair values due to their short-term nature or that they are floating rate instruments that are re-priced to market interest rates on or near the end of the reporting period.

The carrying amounts of the non-current portion of the lease liabilities are reasonable approximation of fair value due to the insignificant impact of discounting.
