#### **B3** Prospects

The Group achieved another quarter of impressive YoY growth, with significant momentum across project-based revenue streams. Notably, we have successfully onboarded one of the top banks in the country, extending our reach to five of the top six banks nationwide. We are optimistic that our project-based revenue will maintain its strong trajectory throughout the year, driven by several potential data centre technology refresh contracts on the horizon. This is further spurred by the rising demand for cybersecurity solutions as our clients increasingly seek AI-based solutions for threat prevention, detection, and threat hunting.

Our Digital Applications and Cloud Services segment is also beginning to make more significant contributions, with several new projects scheduled for implementation this year, positioning this segment for substantial growth. The momentum in project-based revenue is expected to naturally drive growth in our recurring revenue, as clients typically enter into service and maintenance contracts following project completion. During Q1 2024, we were finalising several service and maintenance contracts due for renewal and anticipate a pickup in recurring revenue in the coming guarters.

The data centre market in Malaysia is booming, fueled by substantial investment from global data centre providers and hyperscalers. We aim to position Cloudpoint as a key player in this rapidly expanding landscape. We are investing in enabling Cloudpoint to become a comprehensive and end-to-end solutions provider for data centre and cloud services. Cloudpoint aims to offer our customers a seamless experience from sourcing, building, and managing their infrastructures through a single provider.

As our customers increasingly incorporate Artificial Intelligence ("AI") into their core business operations, Cloudpoint will seek opportunities to collaborate with partners to offer AI-based solutions across digital applications, cybersecurity, infrastructure, and data centre. With the explosion of generative AI ("Gen AI"), we foresee many Gen AI use cases in the space we serve. With our strong track record, trend foresight and solid financial footing, Cloudpoint is well positioned to capture market opportunities in the hottest sectors of the technology industry.
