^{*} Above prices and net asset value per unit are shown as ex-distribution.

Note: (1) Annualised return is the actual return of the Fund for the respective financial periods/years, computed based on net asset value per unit and net of all fees, annualised over one year.

- (2) Management expense ratio is calculated based on the total fees and expenses incurred by the Fund divided by the average fund size calculated on a daily basis.
- (3) Portfolio turnover ratio ("PTR") is computed based on the average of the total acquisitions and total disposals of investment securities of the Fund divided by the average fund size calculated on a daily basis. The PTR decreased by 0.08 times (88.9%) as compared to 0.09 times for the quarter ended 31 December 2008 mainly due to decrease in investing activities.

- (c) Annualised returns for the financial period 13 July 2005 (date of commencement) to 31 December 2005

The Fund's performance above is calculated based on net asset value per unit. Annualised return for ABF Malaysia Bond Index Fund ("ABFMY1") for a period is computed on the absolute return for that period annualised over one year.

Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Manager's Report For The Period 1 January 2009 to 31 March 2009

Dear Unitholders

We are pleased to present you the Manager's Report and the unaudited quarterly accounts of ABF Malaysia Bond Index Fund ("the Fund" or "ABFMY1") for the financial period 1 January 2009 to 31 March 2009.

Investment Objectives

ABF Malaysia Bond Index Fund is a fixed income exchange traded fund ("ETF") which is a listed bond fund that is passively managed against the given benchmark, which is iBoxx® ABF Malaysia Bond Index ("the Benchmark Index" or "iBoxx® Index"). The returns of the Fund will be expected to correspond closely to the performance of the Benchmark Index.

iBoxx® ABF Malaysia Bond Index is a basket index that expresses relative changes in value compared to the beginning of the respective period. The Benchmark Index is based on consolidated bid quotes and rebalanced monthly on the last calendar day of each month. The Benchmark Index is a combination of Government, sovereign and sub-sovereign debt securities subject to per-determined credit rating requirements.

Details of the index component as at 31 March 2009 are as follows:

circulation remain unchanged at 481,921,800 units. This is in line with the Fund's objective of passive management while achieving returns corresponding closely to the performance of Benchmarks index. The net asset value per unit of the Fund was valued at RM 1.0764, decreased by -3.30% as compared to RM 1.1131 as of 31 December 2008. The closing price of the Fund quoted at Bursa Malaysia as of 31 March 2009 decreased by -2.00% from RM 1.098 to RM 1.076.

As of 31 March 2009, the Fund registered an annualized return of -6.07%, decreased by -36.40% as compared to 30.33% as of 31 December 2008. The annualized return is totally capital growth in nature. However, the Fund underperformed its benchmark, the IBoxx @ ABF Malaysia Bond Index by -1.34% for the financial period under review. The iBoxx index registered a return of -4.73% as of 31 March 2009, decreased by -35.79% from 31.06% as of 31 December 2008.

There were no significant changes in the state of affairs of the Fund during the financial period under review. There were also no unit split and circumstances that materially affected the interest of the unitholders within the same period review.

During the financial year under review, the Fund declared a final distribution of 2.00sen per unit on 6 January 2009 as illustrated in the table below.

The Fund has declared distribution on 6 January 2009 as follows:

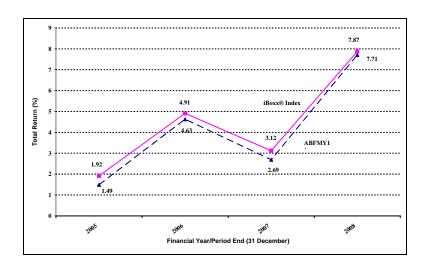

2.00 sen per unit final income distribution*	Changes in the unit price prior and subsequent to the final income distribution	Before income distribution on 6 January 2009 (RM)	After income distribution on 6 January 2009 (RM)

Market Review

The Malaysian Government Securities (MGS) market in the month of January 2009 continued its strong performance with yields trending lower consequent to the more than expected Overnight Policy Rate (OPR) cut of 75 basis points (bps) vis-à-vis market's expectation of between 25-50bps. The weak economic data flow further support the performance of the MGS market as investors hold back any switching out of MGS and continue holding government securities.

MGS market witnessed a sharp turn in sentiment in February 2009 with yields trending higher on the long end of the curve as market players are concerned about the size of the second stimulus package that is yet to be announced in March. Market turned bullish for a short while following the unexpected 50bps cut in OPR, but the trend was quickly reversed amid increased MGS supply fears.

For the month of March 2009, Malaysia's local yield curve flattened, as the shorter-ended 3 year benchmark yield leaped to 2.84%, while on the other hand the 5 year and 10 year benchmark yields plunged to 3.46% and 3.71% respectively. Of note, the 10 year/3 year spread nosedived to 87bps. The delay of the initially-planned auctions of 20 year and 10 year securities continued to cause a major rally in the longer tenured benchmarks as the 5 year and 10 year benchmark yields plummeted 14bps and 27bps respectively. The drop in their yields would have been more, if not for the Zeti's statements which led to some reversal in the rally. Bank Negara Malaysia (BNM) Governor Zeti said that BNM would now focus on access to financing rather than slash interest rates further, citing that interest rates are currently at a historical low.

On top of that, statements that BNM will not follow the footsteps of other major economies in buying government bonds also bogged down the prices of benchmarks. Despite the suggestion that there would not be more easing of monetary policy, we opine that BNM will continue to monitor the severity of Malaysia's Gross Domestic Product (GDP) growth contraction and formulate a more effective monetary policy stand.

Market Outlook

In the near term for MGS segment of the bond market, the recent adjustment to the expanded government auction plans, which effectively reduced the supply duration, has dampened the supply risks which was a principal concern following the mini-budget announcement. The announcement of a new auction calendar for the remainder of 2009 had shifted issuances from the long-end of the curve to the front-end. We believe the reason for this announcement was to encourage a flattening bias. The announcement to date seems to have exerted pressure on the yields of shorter end MGS while lifting the pressure off the long end. Notwithstanding, we are of the opinion that domestic liquidity is adequate to meet the increase in supply of MGS without causing a meltdown in the bond market.

Investment Strategy

The investment strategy of the fund is of a passive one, whereby the Manager aims, by way of representative sampling, to achieve a return on the Fund Assets that closely tracks the returns of the Benchmark Index. As such, the Fund will continue to invest selectively within its scope (i.e. RM denominated sovereigns, quasi-sovereigns and supranational debt securities) in more liquid issues in order to achieve a return that tracks the Benchmark Index i.e. the iBoxx ABF Malaysia Index while minimising transaction costs.

Rebates and soft commissions

It is our policy to pay all rebates to the Fund. However, soft commissions received for goods and services such as fundamental database, financial wire services, technical analysis software and stock quotation system incidental to investment management of the Fund are retained by the Manager. For the period under review, the Manager has received soft-commissions.

NOTES TO THE FINANCIAL STATEMENTS

1. **GENERAL INFORMATION**

ABF Malaysia Bond Index Fund ("the Fund") was established pursuant to a Deed dated 12 July 2005 as amended by Deeds Supplemental thereto ("the Deed"), between AmInvestment Services Berhad as the Manager, HSBC (Malaysia) Trustee Berhad as the Trustee and all unitholders.

The Fund was set up with the objective for investors who seek an "index-based" approach to investing in a portfolio of Ringgit Malaysia denominated Government and quasi-Government debt securities. As provided in the Deed, the "accrual period" or financial year shall end on 31 December and the units in the Fund were first offered for sale on 13 July 2005.

2. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The financial statements have been prepared under the historical cost convention modified by the revaluation of investments in accordance with applicable Financial Reporting Standards in Malaysia and the Securities Commission's Guidelines on Unit Trust Funds.

The new and revised Financial Reporting Standards ("FRSs") that were first effective for and first adopted by the Fund in the current financial year were either not relevant or did not give rise to any significant change to the accounting policies of the Fund. At the date of authorisation of these financial statements, the following new and revised FRSs and Interpretations were issued but not yet effective and have not been adopted by the Fund:

FRS	Effective for financial periods beginning on or after
FRS 4: Insurance Contracts	1 January 2010
FRS 7: Financial Instruments: Disclosures	1 January 2010
FRS 8: Operating Segments	1 July 2009
FRS 139: Financial Instruments: Recognition and	
Measurement	1 January 2010
IC Interpretation 9: Reassessment of Embedded Derivatives	1 January 2010
IC Interpretation 10: Interim Financial Reporting and	
Impairment	1 January 2010

The Fund is exempted from disclosing the possible impact, if any, to the financial statements upon the initial application of FRS 7 and FRS 139 by virtue of exemptions provided under Paragraph 44AB and 103AB respectively of the standards.

3. SIGNIFICANT ACCOUNTING POLICIES

Investments

Investments are stated at market value on a portfolio basis in accordance with the provisions of the Deed, market value is determined based on prices provided by the index provider, International Index Company Limited ("IIC"), plus accrued interest. The difference between the adjusted cost and market value is treated as unrealised gain or loss and is recognised in the statement of income and expenditure. Adjusted cost of investments relates to the purchase cost plus accrued interest, adjusted for amortisation of premium and accretion of discount, if any, calculated on the straight-line method over the period from the date of acquisition to the date of maturity of the respective securities as approved by the Manager and the Trustee. Unrealised gains or losses recognised in the statement of income and expenditure is not distributable in nature.

On disposal of investments, the net realised gain or loss on disposal is measured as the difference between the net disposal proceeds and the carrying amount of the investments. The net realised gain or loss is recognised in the statement of income and expenditure.

Income Recognition

Interest on fixed income securities and short-term deposits is recognised on an accrual basis.

Income Tax Expense

The tax effects of transactions are recognised, using the 'balance sheet' method and all taxable temporary differences are recognised. As at 31 March 2009, there were no significant temporary differences.

Functional and Presentation Currency

Functional currency is the currency of the primary economic environment in which the Fund operates that most faithfully represents the economic effects of the underlying transactions. This is Ringgit Malaysia which reflects the currency of the economy in which the Fund competes for funds and subscribes and redeems units. The Fund has also adopted Ringgit Malaysia as its presentation currency.

Cash Flow Statement

The Fund adopts the direct method in the preparation of the cash flow statement.

Cash equivalents are short-term, highly liquid investments with maturity of seven days or less from the date of acquisition and are readily convertible to cash with insignificant risk of changes in value.

Payables

The amounts are stated at cost which is the fair value of the consideration to be paid for services received.

Financial Assets And Liabilities

Financial assets and financial liabilities carried on the statement of assets and liabilities include cash at banks, investments, including deposits and placements with licensed institutions, receivables and payables. The accounting policies on recognition and measurement of these items are disclosed in the respective accounting policies.

Financial instruments are classified as assets or liabilities in accordance with the substance of the contractual arrangement. The accounting policies on the recognition of interest, gains and losses relating to financial instruments classified as assets, are disclosed in the respective accounting policies.

Tax expense for the financial period	-	-

11. **DISTRIBUTION EQUALISATION**

Distribution equalisation represents the average amount of undistributed net income included in the creation or release price of units. This amount is either refunded to unitholders by way of distribution and/or adjusted accordingly when units are released back to Trustee.

12. **INCOME DISTRIBUTION**

Distribution to unitholders is from the following sources:

	1-1-2009 to 31-3-2009 RM	1-1-2008 to 31-3-2008 RM
Undistributed net income brought forward - realised	9,904,916	-

13. CASH AND CASH EQUIVALENTS

Cash and cash equivalents included in the cash flow statement comprise the following amounts:

	31-3-2009 RM	31-3-2008 RM
Short-term deposits with licensed banks under short-term money market deposits (Note 4) Cash at bank	8,930,782 354,547	9,452,491 354,760
	9,285,329	9,807,251

14. MANAGEMENT EXPENSE RATIO AND PORTFOLIO TURNOVER RATIO

The Fund's management expense ratio ("MER") is as follows:

	1-1-2008 to 31-3-2008 %	1-1-2008 to 31-3-2008 %
Manager's fee	0.10	0.16
Trustee's fee	0.07	0.07
License fee	0.02	0.02
Trust expenses	0.01	0.01
Total MER	0.20	0.26

The portfolio turnover ratio, calculated by dividing the average of total acquisitions and total disposals of investment securities by the average net asset value of the Fund calculated on a daily basis, 0.01 times for the financial period 1 January 2009 to 31 March 2009 (0.09 times for the financial period 1 January 2008 to 31 March 2008).

15. **SEGMENTAL REPORTING**

In accordance with the objective of the Fund, substantially all of the Fund's investments are made in the form of fixed income securities in Malaysia. The Manager is of the opinion that the risk and rewards from these investments are not individually or segmentally distinct and hence the Fund does not have a separate identifiable business or geographical segments.

16. TRANSACTIONS WITH FINANCIAL INSTITUTIONS

Details of transactions with financial institutions for the financial period 1 January 2009 to 31 March 2009 are as follows:

Financial institutions	Transaction value	
	RM	%
Citibank Berhad CIMB Bank Berhad	8,098,866 5,118,677	61.27 38.73
Total	13,217,543	100.00

The above transaction values are in respect of Ringgit Malaysia denominated Government and quasi-Government debt securities. Transactions in these fixed income securities do not involve any commission or brokerage.

17. **RISK MANAGEMENT**

The Fund is exposed to a variety of risks that included market risk, interest rate risk, credit risk, liquidity risk, single issuer risk, regulatory risk, management risk and stock risk.

Risk management is carried out by closely monitoring, measuring and mitigating the above said risk, careful selection of stocks for investment coupled with stringent compliance to investment restrictions as stipulated by the Securities Commission Act, Securities Commission's Guidelines on Exchange Traded Funds and the Deed as backbone of risk management of the Fund.

Market Risk

Market risk relates to investments in quoted/unquoted securities where movements of share prices can rise or fall for a number of reasons including industry trends, economic factors, changes in company's operations, management and financial performance as well as market perceptions on a particular company.

Market risk is managed through portfolio diversification and asset allocation whereby the securities exposure is monitored/reduced in the event of anticipated market weaknesses.

Interest Rate Risk

Interest rate risk will affect the value of the Fund's investments, given the interest rate movements, which are influenced by regional and local economic developments as well as political developments.

Interest rate moves in the opposite direction of bond prices. When interest rates rise, bond prices will fall and vice versa. When interest rate trend is anticipated to rise, the Fund Manager will reduce the exposure to fixed income securities.

Domestic interest rates on deposits and placements with licensed financial institutions are determined based on prevailing market rates. The Fund has a policy to ensure that the rates obtained are competitive.

Credit Risk

Credit risk applies to debt instruments such as term deposits, bonds and debentures. The issuer of such instruments may not be able to fulfil the required interest payments or repay the principal invested. These risks may cause the Fund's investments to fluctuate.

The Fund Manager manages the risk by setting internal counterparty limits and undertaking internal credit evaluation to minimise such risk.

Liquidity Risk

The Fund maintains sufficient level of liquid assets, after consultation with the Trustee, to meet anticipated payments and cancellation of units by unitholders. Liquid assets comprise cash deposits with licensed institutions and other instruments, which are capable of being converted into cash between 5 to 7 days. The Fund's policy is to always maintain a prudent level of liquid assets so as to reduce liquidity risk.

Single Issuer Risk

Internal policy restricts the Fund from investing in securities issued by any issuer of not more than a certain percentage of its net asset value. Under such restriction, the risk exposure to the securities of any issuer is managed based on internal/external ratings.

Regulatory Risk

Any changes in national policies and regulations may have an effect on the capital market.

Management Risk

Poor management of a fund may cause considerable losses to the fund that in turn may affect the contribution by a unitholder.

Stock Risk

Risk that is specific to a stock and is not correlated with the specific risks of other stocks.

18. FAIR VALUE OF FINANCIAL INSTRUMENTS

All assets and liabilities of the Fund are carried at fair values. The accounting policies on recognition and measurement of the fair value for the Fund's investments are disclosed in their respective accounting policies.

The fair value for the amount due to the Manager and Trustee, cash at bank, sundry receivables and sundry payables and accruals approximate their respective carrying amounts as at the balance sheet date due to the relatively short-term maturity of these financial instruments.
