* Above prices and net asset value per unit are not shown as ex-distribution.

Note:

- (1) Total return is the actual return of the Fund for the respective financial period/years computed based on the net asset value per unit and net of all fees.
- (2) Distribution yield is calculated based on the total distribution for the years divided by the closing quoted price.
- (3) Management expense ratio ("MER") is calculated based on the total fees and expenses incurred by the Fund divided by the average fund size calculated on a daily basis. The MER decreased by 0.10% as compared to 1.17% per annum for the financial year ended 31 December 2017 mainly due to decrease in expenses.
- (4) Portfolio turnover ratio ("PTR") is calculated based on the average of the total acquisitions and total disposals of investment securities of the Fund divided by the average fund size calculated on a daily basis. The PTR decreased by 0.01 times (25.0%) as compared to 0.04 times for the financial year ended 31 December 2017 mainly due to decrease in investing activities.

 (b) Effective from 6 July 2009, the FTSE Bursa Malaysia Large 30 Index (“FBM30Index”) has been renamed FTSE Bursa Malaysia KLCI (“FBM KLCI”).

The Fund performance is calculated based on the net asset value per unit of the Fund. Average total return of the Fund and its benchmark for a period is computed based on the absolute return for that period annualised over one year.

Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Fund Performance

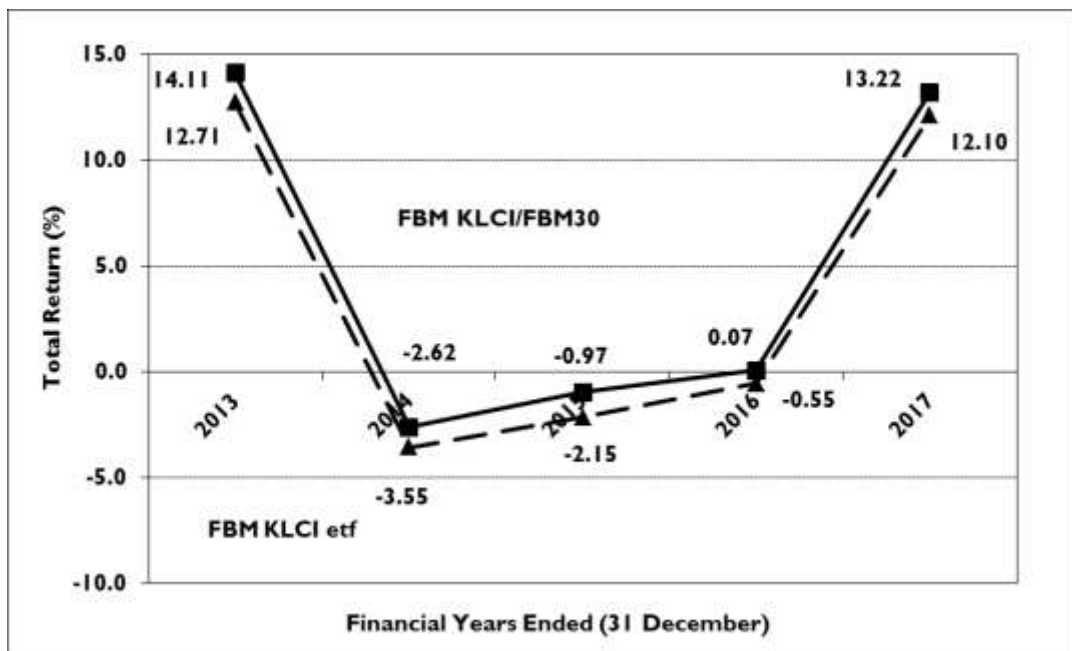

For the financial period under review, the Fund registered a return of 3.89% which was entirely capital growth in nature.

Thus, the Fund’s return of 3.89% has underperformed the benchmark’s return of 4.39% by 0.50%.

As compared with the financial year ended 31 December 2017, the net asset value (“NAV”) of the Fund increased by 3.89% from RM3,123,423 to RM3,244,879. The NAV per unit of the Fund increased by 3.89% from RM1.8681 to RM1.9407, while units in circulations remain unchanged at 1,672,000 units.

The closing price of the Fund quoted on Bursa Malaysia increased by 4.88% from RM1.8450 to RM1.9350.

The line chart below shows comparison between the annual performances of FBM KLCI etf and its benchmark, FBM KLCI/FBM30 Index, for the financial years ended 31 December.

Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Strategies and Policies Employed	<p>For the financial period under review, the Manager had been indexing using complete or partial replication. This will generally result in the Fund investing all or substantially all of its assets in the constituents of the benchmark index. In managing the Fund, the Manager aims to achieve performance, over time, with a correlation of 95% or better between the Fund's portfolio NAV and the benchmark index.</p> <p>The Manager will be responsible to monitor the correlation and if, in the Manager's belief, the current portfolio is not tracking the benchmark index and that it will lead to correlation below the objective of 95%, then the Manager may judiciously rebalance the portfolio to improve correlation or to rectify the divergence. Except for index changes, where rebalancing of the portfolio may have to take place prior to, upon or after the index changes, rebalancing of the portfolio will be carried out, no more than once a month.</p> <p>Where the Manager deems appropriate, the Manager may allow a Participating Dealer that has been pre-approved, to tender Zero Strike Call Options equivalent in value to an In-Kind Creation Basket or multiples thereof, in exchange for ETF units, to facilitate the liquidity provision process.</p>

Cross Trades	<p>There are no cross trades for the Fund during the financial period under review.</p>																																												
Distribution/unit splits	<p>There was no income distribution and unit split declared for the financial period under review.</p>																																												
State of Affairs of the Fund	<p>There has been neither significant change to the state of affairs of the Fund nor any circumstances that materially affect any interests of the unitholders during the financial period under review.</p>																																												

Rebates and Soft Commission	<p>It is our policy to pay all rebates to the Fund. Soft commission received from brokers/dealers is retained by the Manager only if the goods and services provided are of demonstrable benefit to unitholders of the Fund.</p> <p>During the financial period under review, the Manager had received on behalf of the Fund, soft commissions in the form of fundamental database, financial wire services, technical analysis software and stock quotation system incidental to investment management of the Fund. These soft commissions received by the Manager are deemed to be beneficial to the unitholders of the Fund.</p>
Market Review	<p>The KLCI closed 4.0% m.o.m higher in Jan 18. Foreigners were strong net buyers in Jan with RM3.4 bil net inflow (Dec 17: RM0.96 bil), may be attracted by the undervalued Ringgit. Bank Negara hiked OPR by 25bps and crude oil price rise 3.3% m.o.m, have contributed to the strengthening of the Ringgit by 3.9% m.o.m against the USD.</p> <p>Over in the FX space, the Ringgit benefited from the greenback's weakness and expectations of the rate hike to trade down to 3.8985 towards the end of January. The Ringgit has strengthened 3.66% YTD and is one of the biggest gainers in the region, third behind the Thai Baht and Chinese Yuan.</p> <p>The KLCI closed flattish m.o.m, down by 0.6% to 1,856 but outperformed the broader market (FTSE Emas Index) and small caps (FTSE Small cap Index) which fell by 1.1% and 2.1% respectively. Foreigners turned net sellers (RM1.2 bil) vs. net buyers of RM3.4 bil in Jan and RM10.8 bil in 2017. Ringgit depreciated 0.9% m.o.m against the USD, while 10Y MGS rose 7bps m.o.m at 4.03. Brent oil closed lower at USD66/barrel (-4.1% m.o.m).</p> <p>Malaysia's 4Q17 GDP expanded at a healthy 5.9% y.o.y, although slowing from 6.2% y.o.y pace in 3Q17, mainly on some moderation in exports, while domestic demand remaining resilient. Expansion was driven primarily by private consumption, which contributed 3.6% to headline growth, followed by government consumption (1.1%), fixed investment (1.0%), and net exports (0.5%).</p> <p>The KLCI closed flattish, up 0.4% m.o.m. Despite seemingly calm market indicated by KLCI, FTSE Bursa Malaysia Mid Cap 70 index declined 3.2% m.o.m and FTSE Bursa Malaysia Small Cap Index declined 11.1% m.o.m. Foreigners net selling eased to RM61 mil (vs Feb18: - RM1.1 bil). YTD foreign net buying is down to RM2.2 bil. Ringgit appreciated 1.6% m.o.m against the USD. Brent oil closed 6.6% m.o.m higher at USD70/barrel.</p> <p>Bank Negara Malaysia (BNM) kept the OPR unchanged at its 7 Mar 2018 meeting, stating that the degree of policy accommodation is consistent with the policy stance to ensure the domestic economy continues on a steady growth path amid lower inflation.</p> <p>The disinflation trend allowed BNM to keep the OPR unchanged to support the ongoing household deleveraging. Inflation for Feb 2018 continued to be weaker than expected at 1.4% y.o.y from 2.7% y.o.y in Jan 2018 and also lower than consensus expectations of 1.9% y.o.y. The lower inflation was mainly due to softer-than-expected food inflation, despite the Chinese New Year festivities. Concurrently, core inflation hit a record low of 1.8% y.o.y.</p>

Market Outlook	<p>The global market volatility continued in March since it started in early February this year, which has spilled over to the local market sentiment. During the month, there was a clear switch in local market interest where investors were moving from smaller cap/speculative stocks to mid-large cap/defensive stocks to ride through this volatile period. Foreign fund flows continued to be weak where March's net outflow was RM61 mil although YTD it was RM2.2 bil of net inflow. Market remained cautious during the month mainly due to 1) Trump's announcement on the import tariff decision on steel and aluminum; 2) concerns over increased trade protectionism on the sudden dismissal of US Secretary of State, Rex Tillerson who is a free trade advocate; and 3) additional tariffs on Chinese goods announced by US was reciprocated by China's proposed tariffs on 128 US products that could lead to a trade war. On a m.o.m basis, the KLCI closed slightly higher and this has brought KLCI to be the best performing index in USD term YTD in the region. Although global markets are expected to remain volatile in the near term, we remain cautiously optimistic on the local front due to the following reasons: 1) continuing strong macro-economic data – BNM recently projected GDP growth for 2018 at 5.5% to 6.0%; 2) Stronger Ringgit outlook – this will provide cost savings to certain local corporates and encourage foreign fund flows; 3) oil price recovery - a clear-cut beneficiary for a net export country like Malaysia which will boost government revenues and improve fiscal balance; 4) election sentiment boost – given that during the three of the past four election years, KLCI had risen in the 12-month period leading elections; and 5) cheapest market in terms of valuation relative to its peers in ASEAN market except Singapore. In Malaysia, we remain positive in sectors such as financial, oil & gas, consumer staples, thematic plays for the upcoming GE14 and certain bottom-up defensive stocks.</p>

NOTES TO THE FINANCIAL STATEMENTS

1. GENERAL INFORMATION

FBM KLCI etf (“the Fund”) was established pursuant to a Deed dated 18 January 2007 as amended by the Deeds Supplemental thereto (“the Deed”), between AmFunds Management Berhad as the Manager, HSBC (Malaysia) Trustee Berhad as the Trustee and all unitholders.

On 6 July 2009, the Fund’s benchmark, FTSE Bursa Malaysia Large 30 Index (“FBM30”) has been renamed to FTSE Bursa Malaysia KLCI and concurrent with this change, the Fund also announced the change of name to FTSE Bursa Malaysia KLCI etf (short name: FBM KLCI etf). The Fund’s change of its name is pursuant to the Third Supplemental Deed dated 29 June 2009.

The Fund was set up with the objective to achieve a price and yield performance, before fees, expenses and tax, that is generally similar to that of the benchmark index, FTSE Bursa Malaysia KLCI, balanced with the need to facilitate liquidity provision. As provided in the Deeds, the “accrual period” or financial year shall end on 31 December and the units in the Fund were first offered for sale on 7 June 2007.

2. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The financial statements of the Fund have been prepared in accordance with Malaysian Financial Reporting Standards (“MFRS”) as issued by the Malaysian Accounting Standards Board (“MASB”) and are in compliance with International Financial Reporting Standards.

The financial statements of the Fund have been prepared under the historical cost convention, unless otherwise stated in the accounting policies.

Standards effective during the financial period

The adoption of MFRS which have been effective during the financial period did not have any material financial impact to the financial statements.

MFRS 9 Financial Instruments

MFRS 9 reflects International Accounting Standards Board’s (“IASB”) work on the replacement of MFRS 139 Financial Instruments: Recognition and Measurement (“MFRS 139”). MFRS 9 effective for financial year beginning on or after 1 January 2018. Based on the Fund’s preliminary assessment, there is a minimal impact on the classification and measurement of the Fund’s investments as the investments will continue to be measured at FVTPL. Further, there is no impact on the classification and measurement of the Fund’s other financial assets and financial liabilities.

3. SIGNIFICANT ACCOUNTING POLICIES

Income recognition

Income is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the income can be reliably measured. Income is measured at the fair value of consideration received or receivable.

Dividend income is recognised when the Fund's right to receive payment is established. Interest income on short-term deposits is recognised on an accrual basis using the effective interest method.

Application fee is recognised at pre-determined amount upon the creation or redemption of units or the cancellation of such requests.

Income tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

Functional and presentation currency

Functional currency is the currency of the primary economic environment in which the Fund operates that most faithfully represents the economic effects of the underlying transactions. The functional currency of the Fund is Ringgit Malaysia which reflects the currency in which the Fund competes for funds, issues and redeems units. The Fund has also adopted Ringgit Malaysia as its presentation currency.

Statement of cash flows

The Fund adopts the direct method in the preparation of the statement of cash flows.

Cash equivalents are short-term, highly liquid investments that are readily convertible to cash with insignificant risk of changes in value.

Distribution

Distributions are at the discretion of the Fund. A distribution to the Fund's unitholders is accounted for as a deduction from realised reserves. A proposed distribution is recognised as a liability in the period in which it is approved.

Unitholders' capital

The unitholders' capital of the Fund meets the definition of puttable instruments and is classified as equity instruments under MFRS 132 Financial Instruments: Presentation ("MFRS 132").

Financial assets

Financial assets are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss, directly attributable transaction costs.

The Fund determines the classification of its financial assets at initial recognition, and the categories applicable to the Fund include financial assets at fair value through profit or loss (“FVTPL”) and loans and receivables.

(i) Financial assets at FVTPL

Financial assets are classified as financial assets at FVTPL if they are held for trading or are designated as such upon initial recognition. Financial assets held for trading by the Fund include equity securities acquired principally for the purpose of selling in the near term.

Subsequent to initial recognition, financial assets at FVTPL are measured at fair value. Changes in the fair value of those financial instruments are recorded in ‘Net gain or loss on financial assets at fair value through profit or loss’. Dividend revenue and interest earned elements of such instruments are recorded separately in ‘Gross dividend income’ and ‘Interest income’ respectively.

For investments in quoted securities, market value is determined based on the closing price quoted on Bursa Malaysia Berhad. Unrealised gains or losses recognised in profit or loss are not distributable in nature.

On disposal of investments, the net realised gain or loss on disposal is measured as the difference between the net disposal proceeds and the carrying amount of the investments. The net realised gain or loss is recognised in profit or loss.

(ii) Loans and receivables

Financial assets with fixed or determinable payments that are not quoted in an active market are classified as loans and receivables.

Subsequent to initial recognition, loans and receivables are measured at amortised cost using the effective interest method. Gains and losses are recognised in profit or loss when the loans and receivables are derecognised or impaired, and through the amortisation process.

Impairment of financial assets

The Fund assesses at each reporting date whether there is any objective evidence that a financial asset is impaired.

(i) Loans and receivables carried at amortised cost

To determine whether there is objective evidence that an impairment loss on financial assets has been incurred, the Fund considers factors such as the probability of insolvency or significant financial difficulties of the debtor and default or significant delay in payments.

If any such evidence exists, the amount of impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The impairment loss is recognised in profit or loss.

The carrying amount of the financial asset is reduced through the use of an allowance account. When loans and receivables become uncollectible, they are written off against the allowance account.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed to the extent that the carrying amount of the asset does not exceed its amortised cost at the reversal date. The amount of reversal is recognised in profit or loss.

Financial liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

Financial liabilities, within the scope of MFRS 139, are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

The Fund's financial liabilities are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the effective interest method.

A financial liability is derecognised when the obligation under the liability is extinguished. Gains and losses are recognised in profit or loss when the liabilities are derecognised, and through the amortisation process.

Classification of realised and unrealised gains and losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period's unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the reporting period.

Realised gains and losses on disposals of financial instruments classified at fair value through profit or loss are calculated using the weighted average method. They represent the difference between an instrument's initial carrying amount and disposal amount.

Significant accounting estimates and judgments

The preparation of the Fund's financial statements requires the Manager to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability in the future.

The Fund classifies its investments as financial assets at FVTPL as the Fund may sell its investments in the short-term for profit-taking or to meet unitholders' cancellation of units.

No major judgments have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period.

13. DISTRIBUTIONS

No distribution was declared by the Fund for the financial periods ended 31 March 2018 and 31 March 2017.

14. MANAGEMENT EXPENSE RATIO (“MER”)

The Fund’s MER is as follows:

	1-1-2018 to 31-3-2018 % p.a.	1-1-2017 to 31-3-2017 % p.a.
Manager’s fee	0.50	0.50

Licence fee	0.04	0.05
Fund’s other expenses	0.47	0.54
Total MER	<u>1.07</u>	<u>1.15</u>

The MER of the Fund is the ratio of the sum of annualised fees and expenses incurred by the Fund to the average net asset value of the Fund calculated on a daily basis.

15. PORTFOLIO TURNOVER RATIO (“PTR”)

The PTR of the Fund, which is the ratio of average total acquisitions and disposals of investments to the average net asset value of the Fund calculated on a daily basis, is 0.03 (2017: nil).

16. SEGMENTAL REPORTING

In accordance with the objective of the Fund, substantially all of the Fund’s investments are made in the form of quoted equity securities in Malaysia. The Manager is of the opinion that the risk and rewards from these investments are not individually or segmentally distinct and hence the Fund does not have a separately identifiable business or geographical segments.

17. TRANSACTIONS WITH FINANCIAL INSTITUTION

Details of transactions with financial institutions for the financial period ended 31 March 2018 are as follows:

Financial institutions	Transaction value		Brokerage fee, stamp duty and clearing fee	
	RM	%	RM	%
AmInvestment Bank Berhad*	<u>194,421</u>	<u>100.00</u>	<u>1,174</u>	<u>100.00</u>

* A financial institution related to the Manager. The Manager and the Trustee are of the opinion that the above transactions have been entered in the normal course of business and have been established under terms that are no less favourable than those arranged with independent third parties.

The above transactions were in respect of listed securities.

18. FINANCIAL INSTRUMENTS

(a) Classification of financial instruments

The significant accounting policies in Note 3 describe how the classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the financial assets and liabilities of the Fund in the statement of financial position by the class of financial instrument to which they are assigned, and therefore by the measurement basis.

(b) Financial instruments that are carried at fair value

The Fund's financial assets and liabilities at FVTPL are carried at fair value.

The Fund uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair values are observable; either directly or indirectly; or

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The following table shows an analysis of financial instruments recorded at fair value by the level of the fair value hierarchy:

	Level 1 RM	Level 2 RM	Level 3 RM	Total RM
31 March 2018				
Financial assets at FVTPL	<u>3,179,679</u>	<u>-</u>	<u>-</u>	<u>3,179,679</u>
31 December 2017				
Financial assets at FVTPL	<u>3,095,109</u>	<u>-</u>	<u>-</u>	<u>3,095,109</u>

(c) Financial instruments that are not carried at fair value and whose carrying amounts are reasonable approximation of fair value

The following are classes of financial instruments that are not carried at fair value and whose carrying amounts are reasonable approximation of fair value due to their short period to maturity or short credit period:

- Dividends receivable
- Cash at banks
- Amount due to Manager

(Forward)

- Amount due to Trustee
- Amount due to index provider
- Distributions payable
- Sundry payables and accrued expenses

There are no financial instruments which are not carried at fair values and whose carrying amounts are not reasonable approximation of their respective fair values.

19. RISK MANAGEMENT POLICIES

The Fund is exposed to a variety of risks that include market risk, credit risk, liquidity risk, single issuer risk, regulatory risk, management risk and non-compliance risk.

Risk management is carried out by closely monitoring, measuring and mitigating the above said risks, careful selection of investments coupled with stringent compliance to investment restrictions as stipulated by the Capital Market and Services Act 2007, Securities Commission's Guidelines on Exchange Traded Funds and the Deed as the backbone of risk management of the Fund.

Market risk

Market risk, in general, is the risk that the value of a portfolio would decrease due to changes in market risk factors such as equity prices, foreign exchange rates, interest rates and commodity prices.

(i) Price risk

Price risk refers to the uncertainty of an investment's future prices. In the event of adverse price movements, the Fund might endure potential loss on its quoted investments. In managing price risk, the Manager actively monitors the performance and risk profile of the investment portfolio.

The result below summarised the price risk sensitivity of the Fund's NAV due to the movements of price by -5.00% and +5.00% respectively.

Percentage movements in price by:	Sensitivity of the Fund's NAV	
	2018 RM	2017 RM
-5.00%	(158,984)	(149,542)
+5.00%	<u>158,984</u>	<u>149,542</u>

Credit risk

Credit risk is the risk that the counterparty to a financial instrument will cause a financial loss to the Fund by failing to discharge an obligation. Credit risk applies to short-term deposits and dividends receivable. The issuer of such instruments may not be able to fulfil the required interest payments or repay the principal invested. These risks may cause the Fund's investments to fluctuate in value.

Cash at banks are held for liquidity purposes and are not exposed to significant credit risk.

Liquidity risk

Liquidity risk is defined as the risk of being unable to raise funds or borrowings to meet payment obligations as they fall due. This is also the risk of the Fund experiencing large redemptions, when the Investment Manager could be forced to sell large volumes of its holdings at unfavorable prices to meet redemption requirements.

The Fund maintains sufficient level of liquid assets, after consultation with the Trustee, to meet anticipated payments and cancellations of units by unitholders. Liquid assets comprise of deposits with licensed financial institutions and other instruments, which are capable of being converted into cash within 5 to 7 days. The Fund's policy is to always maintain a prudent level of liquid assets so as to reduce liquidity risk.

Single issuer risk

Internal policy restricts the Fund from investing in securities issued by any issuer of not more than a certain percentage of its net asset value. Under such restriction, the risk exposure to the securities of any single issuer is diversified and managed based on internal/external ratings.

Regulatory risk

Any changes in national policies and regulations may have effects on the capital market and the net asset value of the Fund.

Management risk

Poor management of the Fund may cause considerable losses to the Fund that in turn may affect the net asset value of the Fund.

Non-compliance risk

This is the risk of the Manager, the Trustee or the Fund not complying with internal policies, the Deed of the Fund, securities law or guidelines issued by the regulators. Non-compliance risk may adversely affect the investments of the Fund when the Fund is forced to rectify the non-compliance.

20. CAPITAL MANAGEMENT

The primary objective of the Fund's capital management is to ensure that it maximises unitholders' value by expanding its fund size to benefit from economies of scale and achieving growth in net asset value from the performance of its investments.

The Fund manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Fund may issue new or bonus units, make distribution payment, or return capital to unitholders by way of redemption of units.

No changes were made in the objective, policies or processes during the financial periods ended 31 March 2018 and 31 March 2017.
