MANAGER'S REPORT

FUND OBJECTIVE AND POLICY

What is the investment objective of the Fund?

The Fund aims to provide investment results that closely correspond to the performance of the Financial Times Stock Exchange ("FTSE") China 50 Index ("Benchmark Index"), regardless of its performance.

Has the Fund achieved its objective?

For the financial period under review, the Fund has met its objective to closely correspond to the performance of the Benchmark Index.

What are the Fund investment policy and principal investment strategy?

A passive strategy whereby the Manager may adopt either a Replication Strategy or a Representative Sampling Strategy.

Replication Strategy

In managing the Fund, the Manager will generally adopt a Replication Strategy. Using a Replication Strategy, the Fund will invest in substantially all the Index Securities in substantially the same weightings (i.e. proportions) as the Benchmark Index (to the extent possible). If the Manager is of the opinion there exists liquidity constraints with the Index Securities, the Fund may substitute the Index Securities (in part or in whole) with one or more derivatives of the Index Securities which are likely to behave in a manner consistent with the investment objective of the Fund as determined by the Manager.

Representative Sampling Strategy

The Manager may decide to adopt a Representative Sampling Strategy if various circumstances make it impossible or impracticable to adopt a Replication Strategy.

MARKET REVIEW (1 JANUARY 2018 TO 31 MARCH 2018)

For the financial period under review, the FTSE China 50 Index (the "Index") posted a negative return of 3.55% in Malaysian Ringgit ("MYR") terms.

In January 2018, China printed better than expected data for both M2 money supply which was at 8.6% and new loans growth which was at RMB2,900 billion. However, the trade balance was better than expected at RMB264 billion. During the World Economic Forum in Davos, attended by world leaders, China's delegation defended global trade and stressed on China's high-quality development, adherence to supply-side reform, tackling shadow banking and hidden local government debts, commitment to globalization and inclusiveness. They also said reform measures will exceed expectations of the international community.

In February 2018, People's Bank of China acknowledged the tailwinds from the synchronized global economic growth to China's development potential in possible acknowledgement of a move away from quantitative growth targets. On the other hand, Earnings Per Share ("EPS") upward revision continued at 2.7% for 2017 and 2018 respectively in the past 3 months. Trade balance was reported at RMB262 billion (better than expected) and industrial production remained high at 6.2%. The current Price-to-Earnings ("PE") ratio and Price-to-Book ("PB") ratio was higher than the historical 5-year valuation.

In March 2018, the National People's Congress ("NPC") laid out its economic targets for 2018, with Gross Domestic Product ("GDP") growth about 6.50% (actual 6.90% in 2017), Consumer Price Index ("CPI") growth about 3%, M2 growth about 8%, total social financing growth about 12% (same as last year's), retail sales growth about 10% (was 9.4% in 2017) and a fiscal deficit of 2.6% (was 3% in 2017). Growth stability and policy calibration to address systemic risks remained as economic priorities. Financial sector regulation was streamlined by combining the securities and insurance regulators into one (headed by Shuo Shuqing, the current China Banking Regulatory Commission head). Yi Gang was appointed People's Bank of China governor, implying continuity in monetary policy thought process. Liu He was made the Vice Premier, with control over financial and economic affairs. Trusted veteran Wang Qishan was brought back into administration as Vice President. The NPC also repealed presidential term limits, paving the way for President Xi to remain in office for a long period.

For the financial period under review, the Fund lost 4.24%, while the benchmark lost 3.55%.

The last available published market price of the Fund quoted on Bursa Malaysia was RM1.60. This represents a decrease of 3.61% for the financial period.

FUND PERFORMANCE (CONTINUED)**Changes in NAV**

	31.03.2018	31.03.2017	Changes %
NAV (RM Million)	15.38	16.22	(5.18)
NAV/Unit (RM)	1.5779	1.4682	7.47

For the 1-year period, the Fund's total NAV decreased by 5.18%, while the NAV per unit gained 7.47%. The higher NAV per Unit was due to positive investment performance of the Chinese equities as partly described in the Market Review section.

Performance data represents the combined income and capital return as a result of holding units in the Fund for the specified length of time, based on NAV to NAV price. The performance data assumes that all earnings from the Fund are reinvested and are net of management and trustee fees. Past performance is not reflective of future performance and income distributions are not guaranteed. Unit prices and income distributions, if any, may fall and rise. All performance figures for the financial period have been extracted from Lipper.

MARKET OUTLOOK*

China's CPI in March 2018 was at 2.1% (versus 2.9% in February 2018) and Producer Price Index ("PPI") was at 3.1% (versus 3.7% in February 2018). The PPI has been trending down, as expected, due to a slowdown in the Chinese economy. However, we expect the PPI to remain at around 3%. The first quarter GDP growth for 2018 came in at a comfortable level of 6.8%. We continue to be positive on China and we believe that the GDP growth momentum will continue in 2018.

INVESTMENT STRATEGY

As this is an ETF, the Fund will continue to remain fully invested in the Benchmark Index stocks with minimal cash kept for liquidity purposes in order to track the performance of the benchmark.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL PERIOD FROM 1 JANUARY 2018 TO 31 MARCH 2018****1. THE FUND, THE MANAGER AND ITS PRINCIPAL ACTIVITY**

CIMB FTSE China 50 (the "Fund") is governed by a Deed dated 19 April 2010, a First Supplemental Deed dated 8 December 2010, and a Second Supplemental Deed dated 30 July 2014 (collectively referred to as the "Deeds") between CIMB-Principal Asset Management Berhad (the "Manager") and Deutsche Trustees Malaysia Berhad (the "Trustee").

The Manager may adopt either a Replication Strategy or a Representative Sampling Strategy. In managing the Fund, the Manager will generally adopt a Replication Strategy. Using a Replication Strategy, the Fund will invest in substantially all the Index Securities in substantially the same weightings (i.e. proportions) as the Benchmark Index (to the extent possible). If the Manager is of the opinion there exists liquidity constraints with the Index Securities, the Fund may substitute the Index Securities (in part or in whole) with one or more derivatives of the Index Securities which are likely to behave in a manner consistent with the investment objective of the Fund as determined by the Manager. Meanwhile, the Manager may decide to adopt a Representative Sampling Strategy if various circumstances make it impossible or impracticable to adopt a Replication Strategy.

All investments are subjected to the SC Guidelines on ETFs, SC requirements, the Deeds, except where exemptions or variations have been approved by the SC, internal policies and procedures and the Fund's objective.

The Manager, a company incorporated in Malaysia, is a subsidiary of CIMB Group Sdn Bhd and regards CIMB Group Holdings Berhad as its ultimate holding company. The Manager is also an associate of Principal International (Asia) Limited, which is a subsidiary of Principal Financial Group Inc. The principal activities of the Manager are the establishment and management of unit trust funds and fund management activities.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements:

(a) Basis of preparation

The financial statements have been prepared in accordance with the provisions of the Malaysian Financial Reporting Standards ("MFRS") and International Financial Reporting Standards ("IFRS").

The financial statements have been prepared under the historical cost convention, as modified by financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period.

It also requires the Manager to exercise their judgment in the process of applying the Fund's accounting policies. Although these estimates and judgment are based on the Manager's best knowledge of current events and actions, actual results may differ.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(a) Basis of preparation (continued)

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(k).

Standards, amendments to published standards and interpretations to existing standards that are effective:

The Fund has applied the following amendments for the first time for the financial year beginning 1 July 2017:

- Amendments to MFRS 107 “Statement of Cash Flows - Disclosure Initiative” (effective from 1 January 2017) introduce an additional disclosure on changes in liabilities arising from financing activities.

The adoption of this amendment did not have any impact on the current financial period or any prior financial period and is not likely to affect future financial periods.

The standards, amendments to published standards and interpretations to existing standards that are applicable to the Fund but not yet effective and have not been early adopted are as follows:

(i) Financial year beginning on/after 1 July 2018

- MFRS 9 “Financial Instruments” (effective from 1 January 2018) will replace MFRS 139 “Financial Instruments: Recognition and Measurement”.

MFRS 9 retains but simplifies the mixed measurement model in MFRS 139 and establishes three primary measurement categories for financial assets: amortised cost, fair value through profit or loss and fair value through Other Comprehensive Income (“OCI”). The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are always measured at fair value through profit or loss with an irrevocable option at inception to present changes in fair value in OCI (provided the instrument is not held for trading). A debt instrument is measured at amortised cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest.

For liabilities, the standard retains most of the MFRS 139 requirements. These include amortised cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The main change is that, in cases where the fair value option is taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in OCI rather than the income statement, unless this creates an accounting mismatch.

MFRS 9 introduces an expected credit loss (“ECL”) model on impairment that replaces the incurred loss impairment model used in MFRS 139. The expected credit loss model is forward-looking and eliminates the need for a trigger event to have occurred before credit losses are recognised.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**(a) Basis of preparation (continued)****(i) Financial year beginning on/after 1 July 2018 (continued)**

The Fund has reviewed its financial assets and liabilities and has assessed the following impact from the adoption of the new standard on 1 January 2018:

There will be no impact on the Fund's accounting for financial assets as the Fund's equity investments currently measured at fair value through profit or loss will continue to be measured on the same basis under MFRS 9.

There will be no impact on the Fund's accounting for financial liabilities as the new requirements only affect the accounting for financial liabilities that are designated at fair value through profit or loss and the Fund does not have any such liabilities.

The new impairment model requires the recognition of impairment provisions based on ECL rather than only incurred credit losses as is the case under MFRS 139. It applies to financial assets classified at amortised cost. Based on the assessments undertaken to date, the Fund does not expect any loss allowance to be recognised upon adoption of MFRS 9.

(b) Financial assets and financial liabilities**Classification**

The Fund designates its investments in foreign quoted securities as financial assets at fair value through profit or loss at inception.

Financial assets are designated at fair value through profit or loss when they are managed and their performance evaluated on a fair value basis.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and have been included in current assets. The Fund's loans and receivables comprise cash and cash equivalents, and dividends receivable.

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

The Fund classifies accrued management fee, amount due to Trustee, and other payables and accruals as other financial liabilities.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets and financial liabilities (continued)

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade date, the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value. Transaction costs are expensed in the statement of comprehensive income.

Financial liabilities, within the scope of MFRS 139, are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Unrealised gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss are presented in the statement of comprehensive income within net gain or loss on financial assets at fair value through profit or loss in the financial period which they arise.

Dividend income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income as part of gross dividend income when the Fund's right to receive payments is established.

Foreign quoted securities are valued at the last traded market price quoted on the respective foreign stock exchanges at the close of the business day of the respective foreign stock exchanges.

If a valuation based on the market price does not represent the fair value of the quoted securities, for example during abnormal market conditions or when no market price is available, including in the event of a suspension in the quotation of the quoted securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the quoted securities are valued as determined in good faith by the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation.

Loans and receivables and other financial liabilities are subsequently carried at amortised cost using the effective interest method.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets and financial liabilities (continued)

Impairment for assets carried at amortised costs

For assets carried at amortised cost, the Fund assesses at the end of the reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The asset's carrying amount is reduced and the amount of the loss is recognised in statement of comprehensive income. If 'loans and receivables' has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

As a practical expedient, the Fund may measure impairment on the basis of an instrument's fair value using an observable market price.

If, in a subsequent financial period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in statement of comprehensive income.

When an asset is uncollectible, it is written off against the related allowance account. Such assets are written off after all the necessary procedures have been completed and the amount of the loss has been determined.

(c) Foreign currency

Functional and presentation currency

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional and presentation currency.

Due to mixed factors in determining the functional currency of the Fund, the Manager has used its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions and have determined the functional currency to be in MYR primarily due to the following factors:

- i) Units of the Funds are denominated in MYR.
- ii) Significant portion of the Fund's expenses are denominated in MYR.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**(c) Foreign currency (continued)**Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in statement of comprehensive income.

(d) Income recognition

Dividend income is recognised on the ex-dividend date when the right to receive payment is established.

Realised gain or loss on disposal of quoted securities is accounted for as the difference between the net disposal proceeds and the carrying amount of quoted securities, determined on a weighted average cost basis.

(e) Cash and cash equivalents

For the purpose of statement of cash flows, cash and cash equivalents comprise bank balances which are subject to an insignificant risk of changes in value.

(f) Taxation

Current tax expense is determined according to Malaysian tax laws at the current rate based upon the taxable profit earned during the financial period.

Tax on dividend income from foreign quoted securities is based on the tax regime of the respective countries that the Fund invests in.

(g) Transactions costs

Transaction costs are costs incurred to acquire or dispose financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs, when incurred, are immediately recognised in the statement of comprehensive income as expenses.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(h) Unit holders' capital

The unit holders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's NAV;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at the Participating Dealer's option at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

(i) Segment information

Operating segments are reported in a manner consistent with the internal reporting used by the chief operating decision-maker. The chief operating decision-maker is responsible for allocating resources and assessing performance of the operating segments.

(j) Realised and unrealised portions of net income after tax

The analysis of realised and unrealised net income after tax as presented on the statement of comprehensive income is prepared in accordance with SC Guidelines on ETFs.

(k) Critical accounting estimates and judgments in applying accounting policies

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgment are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the SC Guidelines on ETFs.

However, the Manager is of the opinion that in applying this accounting policy, no significant judgment was required.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES

The investment objective of the Fund is to provide investment results that closely correspond to the performance of the Benchmark Index, regardless of its performance.

The Fund is exposed to a variety of risks which include market risk (inclusive of price risk and currency risk), credit risk and liquidity risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the Deeds and SC Guidelines on ETFs.

(a) Market risk

(i) Price risk

This is the risk that the fair value of an investment in quoted securities will fluctuate because of changes in market prices (other than those arising from currency risk). The value of quoted securities may fluctuate according to the activities of individual companies, sector and overall political and economic conditions. Such fluctuation may cause the Fund's NAV and prices of units to fall as well as rise, and income produced by the Fund may also fluctuate.

The very nature of an ETF, however, helps mitigate this risk because a fund would generally hold a well-diversified portfolio of securities from different market sectors so that the collapse of any one security or any one market sector would not impact too greatly on the value of the Fund.

(ii) Currency risk

Currency risk is associated with investments that are quoted and/or priced in foreign currency denomination. Foreign currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Manager will evaluate the likely directions of a foreign currency versus RM based on considerations of economic fundamentals such as interest rate differentials, balance of payments position, debt levels, and technical chart considerations.

(b) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligation resulting in financial loss to the Fund.

The credit risk arising from cash and cash equivalents is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations.

The Manager manages this risk by maintaining sufficient level of liquid assets to meet anticipated payments and cancellations of the units by unit holders. Liquid assets comprise bank balances, which is capable of being converted into cash within 7 business days. This is expected to reduce the risks for the entire portfolio without limiting the Fund's growth potentials.

(d) Capital Risk Management

The capital of the Fund is represented by equity consisting of unit holders' capital of RM8,331,964 (30.06.2017: RM8,331,964) and retained earnings of RM7,052,938 (30.06.2017: RM6,117,510). The amount of capital can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns to unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

(e) Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(e) Fair value estimation (continued)

(i) Fair value hierarchy (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The Fund does not adjust the quoted prices for these instruments. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

- (ii) The carrying values of cash and cash equivalents, dividends receivable and all current liabilities are a reasonable approximation of their fair values due to their short term nature.

4. MANAGEMENT FEE

In accordance with the Deeds, the Manager is entitled to a management fee of up to 3.00% per annum calculated and accrued daily based on the NAV of the Fund.

For the financial period ended 31 March 2018, the management fee is recognised at a rate of 0.60% per annum (31.03.2017: 0.60% per annum).

There will be no further liability to the Manager in respect of management fee other than the amount recognised above.

5. TRUSTEE'S AND CUSTODIAN FEES

In accordance with the Deeds, the Trustee is entitled to a fee not exceeding a maximum of 0.20% per annum, calculated daily based on the NAV of the Fund, subject to a minimum fee of RM12,000 per annum (31.03.2017: RM12,000 per annum), excluding foreign sub-custodian fees and charges.

For the financial period ended 31 March 2018, the Trustee's fee is recognised at a rate of 0.08% per annum (31.03.2017: 0.08% per annum).

There will be no further liability to the Trustee in respect of Trustee's and custodian fees other than the amounts recognised above.

MER	<u>0.25</u>	<u>0.31</u>

MER is derived from the following calculation:

$$\text{MER} = \frac{(A + B + C + D + E) \times 100}{F}$$

A	=	Management fee
B	=	Trustee’s and custodian fees
C	=	Audit fee
D	=	Tax agent’s fee
E	=	Other expenses excluding GST on transaction costs
F	=	Average NAV of the Fund calculated on a daily basis

The average NAV of the Fund for the financial period calculated on daily basis is RM16,489,780 (31.03.2017: RM15,984,645).

16. SEGMENT INFORMATION

The internal reporting provided to the chief operating decision-maker for the Fund's assets, liabilities and performance is prepared on a consistent basis with the measurement and recognition principles of MFRS and IFRS. The chief operating decision-maker is responsible for the performance of the Fund and considers the business to have a single operating segment located in Malaysia. Asset allocation decisions are based on a single, integrated investment strategy and the Fund's performance is evaluated on an overall basis.

The investment objective of the Fund is to provide investment results that closely correspond to the performance of the Benchmark Index, regardless of its performance. In managing the Fund, the Manager attempts to achieve a high positive correlation and a low tracking error between the NAV of the Fund's portfolio and the Benchmark Index. The reportable operating segment derives its income by seeking investments to achieve targeted returns consummate with an acceptable level of risk within the portfolio. These returns consist of dividend income earned from investments and gains on the appreciation in the value of investments, which is derived from the 50 largest and most liquid Chinese stocks (Red Chips, H shares and P Chips) listed and trading on the Hong Kong Exchanges and Clearing Limited ("HKEx"), Hong Kong.

There were no changes in reportable operating segment during the financial period.
