(collectively, the “**Establishment Costs**”).

### **1.3 Other Information**

The Deed is dated 21 February 2020 and has been entered into between the Manager and the Trustee.

**Please refer to the relevant sections and pages of this Prospectus as set out above for additional specific information on the respective items on the Fund.**

**As the above strictly represents a summary of the salient information of the Fund, please read and understand the entire Prospectus before making investment decisions or investing in the Units.**

## 2. RISK FACTORS

An investment in the Units involves risk. Prospective investors should rely on their own evaluation and carefully consider the following risk factors in addition to other information contained elsewhere in this Prospectus, before investing in the Fund.

Unless specified or quantified in the relevant risk factors set out herein, the Manager is not in a position to quantify the financial or other implications of any of the risks described in this Section. The following risk factors may not be exhaustive, and additional risks and uncertainties not presently known to the Fund or the Manager, or which are currently deemed to be immaterial may become material in the future, which could have a material adverse effect on the Fund or the price of the Units.

Unit Holders should be aware that the price of the Units may fluctuate. Investors should also note that they may not recoup their original investment fully or at all.

### 2.1 General Risks of Investing in ETFs and the Fund in Particular

#### ➤ **Market Risk**

General movements in the local market and factors that affect the investment climate and investor sentiment could affect the level of trading and therefore the market price of the Units, which can go down in price as well as up. These risks are generally applicable to any investment in listed securities. These risks include market fluctuations caused by factors such as economic and political developments.

#### ➤ **Capital and Returns Not Guaranteed**

Investors should be aware that by investing in the Fund, there is no guarantee of any returns or capital appreciation. Unlike fixed deposits placed directly by the investors into any Financial Institution which carry a specific rate of return, this Fund does not provide a fixed rate of return. There is no guarantee that investors will enjoy any capital appreciation or will not experience any loss of capital invested in the Fund.

#### ➤ **Inflation Risk**

Inflation is one of the long term risks as it creates uncertainty over the future value of the investments. Any investment is subject to the risk that the investments may not grow proportionately with the inflation rate. A return on investment which is lower than inflationary rate would reduce Unit Holder's purchasing power per MYR even though the value of the investment in monetary terms has increased.

#### ➤ **Liquidity Risk**

Although the Units are listed for trading on the Bursa Securities, there is no assurance that an active trading market for such Unit will develop or be maintained. There is no certain basis for predicting the actual price levels at, or volume in which, the Units may trade. Accordingly, if a Unit Holder needs to sell his Units at a time when no active market for them exists, the price he receives for his Units (assuming he is able to sell them) is likely to be lower than the price received if an active market did exist. Whilst the market maker has been appointed by the Manager, there can be no assurance that such liquidity risk will be fully mitigated.

Investors should note, however, that the liquidity in the market for the Units may be adversely affected if the market maker fails or ceases to fulfil its role as a market maker. It is the Manager's intention that there will always be at least one market maker for the Fund.

#### ➤ **Units may Trade other than at Net Asset Value**

The trading prices of the Units on Bursa Securities may deviate significantly from the NAV per Unit particularly during periods of market volatility or when there is any suspension of creations or redemptions of Units. The NAV per Unit of the Fund is calculated at the end of each Dealing Day and fluctuates with changes in the market value of the Fund Assets. The trading prices of the Units fluctuate continuously throughout the trading hours based on market supply and demand and economic conditions in Malaysia, rather than the Net Asset

Value. Any of these factors may lead to the Units trading at a premium or discount to its Net Asset Value. On the basis that Units can be created and redeemed by the Participating Dealer in Creation Unit Blocks or Redemption Unit Blocks at the Net Asset Value, it is not anticipated that the market price of Units will have large deviations from the NAV per Unit, or even if there is, such deviations will not be sustained. If the Manager suspends creations and/or redemptions of Units, larger deviations to the Net Asset Value are expected.

Further, the role of the market maker is intended to minimise the difference between the trade prices on Bursa Securities and the NAV per Unit of the Fund.

➤ **Trading in Units on Bursa Securities may be Suspended or Units may be De-Listed**

Unit Holders and potential Unit Holders will not be able to buy, nor will Unit Holders be able to sell Units on Bursa Securities during any period in which trading of the Units is suspended. Bursa Securities may suspend the trading of Units pursuant to Bursa Securities' rules and policies whenever Bursa Securities determines that it is appropriate in the interests of a fair and/orderly market to protect Unit Holders. The creation and redemption of Units may also be suspended if the trading of Units is suspended.

Further, Bursa Securities imposes certain requirements for the continuous listing of securities, including the Units, on Bursa Securities. Investors cannot be assured that the Fund will continue to meet the requirements necessary to maintain the listing of the Units on the Main Market or that Bursa Securities will not change the Listing Requirements. The Fund may be terminated if its Units are de-listed from Bursa Securities.

➤ **Suspension of Creations and/or Redemptions**

Dealings of Units on Bursa Securities may not necessarily be suspended in the event that the creation and/or redemption of Units is temporarily suspended by the Manager in accordance with the terms of the Deed. If the creation and/or redemption of Units is temporarily suspended, the trading price of the Units may be adversely affected and differ from the market value of the Fund's underlying assets.

➤ **Legal and Regulatory Risks**

The Fund must comply with regulatory constraints or changes in the laws affecting it or its investment restrictions which might require a change in the investment policy and objective followed by the Fund. Furthermore, such change in the laws may have an impact on the market sentiment which may, in turn, affect the performance of the Fund. It is impossible to predict whether such an impact caused by any change of law will be positive or negative for the Fund. In the worst case scenario, a Unit Holder may lose all of his investment in the Fund.

➤ **Reliance on Participating Dealer**

- The creation and redemption of Units may only be effected through the Participating Dealer. As at the date of this Prospectus, the Manager has entered into a Participating Dealer Agreement with the Participating Dealer. This enables the Participating Dealer to request the creation of new Units and/or require the redemption of existing Units. If the existing participating dealer were to withdraw at any time and no new or additional participating dealer is appointed and/or enters into a Participating Dealer Agreement with the Manager, no Units may then be created or redeemed.
- Although the Participating Dealer has agreed, pursuant to the Participating Dealer Agreement with the Manager, that it will create and redeem for investors, whether or not a participating dealer agrees with the investors to create and to redeem Units for them has to be agreed between the relevant investor and that participating dealer. The Participating Dealer may charge a fee for providing this service. The Participating Dealer will not be able to create or redeem Units during a suspension period.

## 2.2 Specific Risks of Investing in the Fund

### ➤ **Equity Investment Risk**

The buying and selling of equities carry a number of risks. The most important being the volatility of the capital markets on which those securities are traded and the general insolvency risk associated with the issuers of the equities. The value of equities investment depends on its earnings potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund.

### ➤ **Minimum Redemption Size**

Units can only be redeemed in a Redemption Unit Block (or whole multiples thereof). Investors who do not hold Redemption Unit Blocks will only be able to realise the value of their Units by selling their Units on Bursa Securities at the trading market prices. As set out in this Prospectus, the market prices of Units traded on Bursa Securities may deviate from the NAV per Unit.

### ➤ **Tracking Error Risk**

There may not be perfect Correlation between the NAV with the Benchmark. Factors such as fees and expenses of the Fund, Transaction Costs, liquidity of the market, imperfect Correlation of returns between Fund's assets and the securities constituting the Benchmark, the rounding of share prices, changes to the underlying indices and regulatory policies may affect the Manager's ability to achieve close Correlation with the Benchmark and to rebalance the Fund's holdings of Index Securities and/or non-Index Securities in response to changes in the constituents of the Benchmark. Further, the Fund may receive income (such as interests and dividends) from its assets while the Benchmark does not have such sources of income. There is no guarantee or assurance of exact or identical replication at any time of the performance of the Benchmark.

Although the Manager regularly monitors the tracking error of the Fund, there can be no assurance that the Fund will achieve any particular level of tracking error relative to the performance of its Benchmark.

### ➤ **Risks Related to the Benchmark**

There may be changes in the constituent securities of the Benchmark from time to time. For example, a constituent security may be de-listed or a new eligible security may be added to the Benchmark. In such circumstances, in order to achieve the investment objective of the Fund, the Manager may rebalance the composition of the Fund. The price of the Units may rise or fall as a result of these changes. Thus, an investment in Units will generally reflect the Benchmark as its constituents change from time to time, and not necessarily the way it is comprised at the time of an investment in the Units.

The process and the basis of computing and compiling the Benchmark and any of its related formula, constituent companies and factors may also be changed or altered by the Index Licensor at any time without notice. There is also no warranty, representation or guarantee given to the investors as to the accuracy or completeness of the Benchmark, its computation or any information related thereto.

The Manager has been granted a licence by the Index Licensor to use the Benchmark in connection with the Fund. The Manager is unlikely to be able to fulfil the investment objective in the event that the licence is terminated or if the Fund is unable to use the Benchmark for any reason whatsoever. The licence is valid until terminated in accordance with the terms of the licence.

### ➤ **Passive Investment Management**

The Fund is not actively managed. The Fund invests in the Index Securities and/or non-Index Securities included in or reflecting its Benchmark regardless of their investment merit. The Manager does not attempt to select securities individually or to take defensive positions in declining markets. Accordingly, the lack of discretion to adapt to market changes due to the inherent investment nature of the Fund means that falls in the Index Securities and/or non-Index Securities are expected to result in a corresponding fall in the NAV of the Fund.

➤ **Securities Lending Transactions Risk**

As the Fund may participate in the lending of securities within the meaning of the Securities Borrowing and Lending Guidelines (SBL Guidelines), the Fund may be exposed to additional risks. For example, the borrower may fail to return the securities in a timely manner or may encounter operational difficulty which may result in a delay or failure of settlement. And as a result, it may impact the Fund's ability to meet payment obligations from redemption requests. To mitigate this risk, the Manager will take necessary steps to ensure that not all of the Fund's assets are loaned out at any one point during the lifetime of the Fund. In addition, the Fund may also suffer a loss as a result of the delay in recovering the securities lent out. While, the Manager will receive collateral for the loan where it seeks to replace the loaned securities in an occurrence of a default event by the borrower, there is no assurance that this risk could be mitigated all together. Further information regarding Securities Borrowing and Lending can be found in Section 3.10 of this Prospectus.

### **3. ABOUT TRADEPLUS DWA MALAYSIA MOMENTUM TRACKER**

The Fund is an exchange traded fund that is established under the terms of the Deed and the Fund is governed by the laws of Malaysia.

#### **3.1 Investment Objective**

The Fund aims to provide investment results that closely correspond to the performance of the Benchmark.

Any material change to the Fund's investment objective will require the approval of the Unit Holders by way of a resolution of not less than two-thirds of all Unit Holders at a Unit Holders' meeting duly convened and held in accordance with the Deed.

#### **3.2 Investor's Profile**

The Fund is suitable for investors who:

- seek exposure to companies that demonstrate powerful relative strength characteristics listed on Bursa Securities; and
- have a high risk tolerance level.

#### **3.3 Asset Allocation**

- A minimum of 90% of the Fund's NAV is to be invested in Authorised Securities.
- The remaining balance of the Fund's NAV is to be invested in money market instruments, money market collective investment schemes and/or deposits.

#### **3.4 Investment Strategy**

To achieve the investment objective of the Fund, the Manager will primarily adopt a full replication strategy. Under the full replication strategy, the Manager will invest substantially in the Index Securities in the same approximate weightings or proportions as they appear in the Benchmark.

However, if the Manager believes that the full replication technique is not the most efficient method to track the Benchmark, the Manager may utilize a representative sampling strategy. Under the representative sampling strategy, the Manager will invest in a representative sample of securities consisting of the Index Securities and non-Index Securities selected by the Manager using amongst others, a quantitative analytical model in a technique known as "portfolio sampling". The non-Index Securities selected shall have a high Correlation (i.e. positive correlation coefficient of at least 0.7) with one or more of the Index Securities which it is substituting, and where it is expected to mirror the performance of those of the Index Securities to be substituted.

For liquidity purposes, the remaining balance of the Fund's NAV will be invested in money market instruments, money market collective investment schemes and/or deposits. The Fund will be passively managed, leaving the Fund to be highly invested at all times, irrespective of the outlook on the underlying assets.

#### **3.5 The Benchmark**

##### **Introduction**

The Benchmark is an equally weighted index which is designed to measure the performance of the top 20 Malaysian listed companies that demonstrates powerful relative strength i.e. the top 20 Malaysian listed companies with the highest momentum movement in pricing measured based on historical price activity. Relative strength will be based on the "Point & Figure Relative Strength Charting", which is a technical analysis tool that

measures a security's performance relative to other securities, benchmarks or broad market indices i.e the Nasdaq Malaysia Index. The Relative Strength momentum technique relies on unbiased, unemotional, objective data, rather than biased forecasting and subjective research. It is an investing technique that seeks to determine the strongest performing securities by measuring certain factors, such as a security's relative performance against the broad market index, which is derived from comparing the rate of increase of the security's price as compared to that of a benchmark index.

The Benchmark is compiled, calculated, maintained and published by the Index Licensor. It was launched with a base date of 12 June 2020 and was constructed based on a reference value of 1,000.

The Benchmark is a price return index where the performance of the index constituents is calculated without adjustments for regular cash dividends.

The end of the day index values are available through Bloomberg DWMYMYR Index and the Fund's website at [www.tradeplus.com.my](http://www.tradeplus.com.my).

The Index Licensor is not a related corporation of the Manager.

### Constituents of the Benchmark

To be eligible for inclusion in the Benchmark, the securities must satisfy the following criteria:

- Be a member of NASDAQ Malaysia Index which is a free float-adjusted market capitalization weighted index constructed on 3 December 2012 designed to track the performance of securities assigned to Malaysia;
- Have a minimum average daily volume of USD1 million for 30 days period prior to evaluation;
- One security per issue is permitted. If an issuer has multiple securities, the security selected for possible inclusion into the Benchmark will be based on <sup>1</sup>Dorsey Wright & Associates Model's proprietary screening;
- May not have entered into a definitive agreement or other arrangement which would likely result in the security no longer being eligible to be included in the Benchmark;
- May not have annual financial statements with an audit opinion that is currently withdrawn.

Each eligible security is assigned a relative strength score based on Dorsey Wright's Relative Strength Point & Figure Charting methodology. In this methodology, the eligible securities are narrowed down using a model that focuses and provides scoring based on the momentum of the respective eligible securities price movement when compared against the broader index. The top 20 securities with the highest momentum score will then be added to the Benchmark and will be weighted equally.

<sup>1</sup>Dorsey Wright & Associates Model's proprietary screening will be based on the security's liquidity, which the security's free float will be taken into account. Free float is the proportion of the total amount of share capital available to ordinary investors compared to the total number of listed shares of a company.

NASDAQ calculates the free float adjusted market capitalization of each Index Security in order to reflect its investable weight in the index by adjusting the total shares outstanding by its free float.

This table details the top ten (10) constituents of the Benchmark and the respective weightings, as at the LPD:-

No.	Company Name	Weightings (%)
1	Supermax Corporation Bhd	11.2
2	Top Glove Corporation Bhd	6.9
3	Kossan Rubber Industries Bhd	6.2
4	Hartalega Holdings Bhd	5.6
5	Dialog Group Bhd	4.9
6	QL Resources Bhd	4.7
7	Westports Holdings Bhd	4.6

No.	Company Name	Weightings (%)
8	IHH Healthcare Bhd	4.5
9	MISC Bhd	4.5
10	IGB REIT	4.4

Source: Nasdaq

**There is no guarantee or assurance of exact or identical replication at any time of the performance of the Benchmark.**

**Composition of the Benchmark may change and securities may be de-listed. Investments of the Fund may be concentrated in a particular market or sector.**

**There is a lack of discretion for the Fund to adapt to market changes due to the inherent investment nature of exchange-traded funds and that falls in the Benchmark are expected to result in corresponding falls in the value of the Fund.**

#### **Review and Rebalancing of the Benchmark**

The Benchmark is reviewed on an on-going basis and will have the following changes implemented:

- Quarterly reconstitution  
The Benchmark is reconstituted quarterly on the last day of each calendar quarter (i.e. March, June, September and December). The changes are made effective after the close of the last trading day in March, June, September and December. However, the date of given rebalancing may be changed for the reasons including market holidays occurring on or around the scheduled reconstitution date. Any change will be announced with proper advanced notice where possible.
- Changes to Benchmark composition, weight adjustments and deletion  
In order to account for corporate events such as mergers, takeovers, acquisitions, de-listings or bankruptcies, the Benchmark composition and its related weight could be adjusted or removed entirely from the Benchmark between rebalancing. Any change will be announced with proper advanced notice where possible.

#### **Replacement of the Benchmark**

In accordance to the Deed, the Manager may, after taking into account the interests of the Unit Holders and subject to the approval of the SC, replace the Benchmark with another index in the event any of the following occurs:

- The Benchmark ceases to exist;
- A release of a new index replacing the Benchmark;
- The Index Licensor increases its licence fee that is considered too high by the Manager; or
- All or part of the securities forming the Benchmark has become difficult, illiquid or impossible for the Manager to invest.

The Manager may change the name of the Fund if the Benchmark is replaced. Replacement of the Benchmark would require the SC's prior approval.

**The Benchmark may be replaced in the event of cessation of the availability of the Benchmark.**

### **Further Information on the Benchmark**

Latest information and other important news on the Benchmark will be published on Nasdaq Dorsey Wright Indexes website at <https://business.nasdaq.com/intel/indexes/smart-beta/dorsey-wright-indexes> (for index ground rules and methodology) and the Fund's website at [www.tradeplus.com.my](http://www.tradeplus.com.my) (for end of day index values).

### **3.6 Tracking Error & Strategies to Minimise such Tracking Error**

**Investors should note that there is no guarantee or assurance that the investment results of the Fund will exactly correspond to the performance of the Benchmark.**

Tracking errors may occur when comparing the performance of the Fund against the Benchmark. Although the Fund's primary investment strategy is to adopt a full replication strategy, there is no assurance that the replication can be perfect. The Fund may also adopt a representative sampling strategy if the Manager believes that the full replication technique is not the most efficient method to track the Benchmark. As such, the difference between the Fund's portfolio compositions with the Benchmark's compositions would result in a high tracking error. Additionally, expenses of the Fund would also contribute to tracking error.

In order to minimize tracking error, the Manager shall closely monitor the Fund's performance, its Correlation with the Benchmark and the Fund's portfolio with the Benchmark constituents and will make adjustments to rebalance the Fund's portfolio when necessary.

### **3.7 Risk Management Strategies & Techniques**

The risk management strategies and techniques employed by the Manager include the use of full replication strategy or representative sampling strategy, as well as rebalancing the Fund's portfolio when required, to achieve the investment objective of the Fund and to minimize tracking error.

### **3.8 Policy on Rebalancing the Investment Portfolio**

The rebalancing of the Fund's portfolio will primarily be performed during the scheduled rebalancing date for the Benchmark. However, the rebalancing of the Fund's portfolio could also be performed when there is creation and/or redemption of Units or when the Manager believes that there is a need to rectify the divergence in tracking error.

### **3.9 Permitted Investments & Investment Restrictions**

#### **Permitted Investments:**

- Authorised Securities;
- Units or shares in collective investment schemes;
- Money market instruments;
- Deposits; and
- Any other investments permitted by the SC from time to time.

#### **Investment Restrictions:**

The Fund may invest in units or shares in collective investment schemes ("**Target Fund**") provided that the value of the Fund's investments in units or shares of any collective investment scheme must not exceed twenty (20%) of the NAV of the Fund based on the most up-to-date value of the Fund Assets and the Target Fund must:

- be regulated by a regulatory authority;
- (if the Target Fund is constituted in Malaysia) be approved or authorised by the SC;
- (if the Target Fund is constituted outside of Malaysia) be registered or authorised or approved by the relevant regulatory authority in its home jurisdiction; and
- operate on the principle of prudent spread of risk and its investments do not diverge from the general investment principles of the ETF Guidelines.

Where the Fund invests in a Target Fund operated by the Manager or its related corporation, the Manager must ensure that:-

- there is no cross-holding between the Fund and the Target Fund;
- all initial charges on the Target Fund are waived; and
- the management fee must only be charged once, either at the Fund or the Target Fund.

The value of the Fund's placement in deposits with a single institution must not exceed 20% of the Fund's NAV.

The value of the Fund's investment in money market instruments issued by a single issuer must not exceed 15% of the Fund's NAV.

The value of the Fund's investments in money market instruments issued by any group of companies must not exceed 20% of the Fund's NAV.

The Fund may not make investments in foreign markets where the regulatory authority is not an ordinary or associate member of the International Organization of Securities Commissions (also known as IOSCO).

The Fund may enter into any other form of investments as may be permitted by the SC from time to time that is in line with the Fund's objectives.

The abovementioned restrictions and limits will be complied with at all times based on the up-to-date value of the Fund, and the value of its investments and instruments. The Manager must notify the SC, within seven Business Days, of any breach of investment limits and restrictions with the steps taken to rectify and prevent such breach from recurring. However, any breach as a result of any:-

- (a) appreciation or depreciation in the value of the Fund's underlying investments;
- (b) redemption of Units or payments made from the Fund;
- (c) change in capital of a company in which the Fund has invested in; or
- (d) downgrade in or cessation of a credit rating,

need not be reported to the SC but must be rectified as soon as practicable in accordance with the ETF Guidelines.

The Trustee may decide to extend the period if it is in the best interest of Unit Holders and such extension must be subject to at least a monthly review by the Trustee.

### **3.10 Securities Lending & Borrowing**

#### **Securities Lending**

The Fund may participate in the lending of securities within the meaning of the Securities Borrowing and Lending Guidelines ("SBL Guidelines"), with the objective of earning additional income for the Fund. Securities may be lent out to qualified institutional borrowers through the Fund's appointed lending agents, with processes and procedures as well as terms that are acceptable to the Trustee on the advice of the Manager.

## Policy and Procedures

The Fund, shall appoint a lending agent to facilitate activities in relation to the lending of securities. The lending agent shall be authorised to perform the following functions such as but not limited to:

- (a) negotiate lending fees with borrowers;
- (b) collect and hold the cash collateral pledged by the borrowers in custody;
- (c) collect or arrange for the collection of any interest, dividends, other distributions / payments on the loaned securities and pay the same to the Fund

The functions of the lending agent shall be reviewed and agreed by the Trustee, in consultation with the Manager and shall be governed by the Securities Lending Agency Agreement.

The total value of securities to be lent out will be capped at a value not exceeding 50% of the Fund's total NAV, or such other value agreed upon by the Trustee on the advice of the Manager.

The loaned securities may be recalled by the Fund at any point in time, and are required to be secured at all times by a cash collateral equivalent to a minimum of 105% of the market value of the loaned securities. The market value of the loaned securities is determined at the close of each Business Day of the Fund. In the event of market fluctuation, the cash collateral received by the lending agent on the behalf of the Fund would be required to be increased.

The Fund will be entitled to securities lending income, represented by the lending fees earned from the borrower, less cost incurred. These costs may include, but will not be limited to, fees due to the lending agent, as well as operational costs incurred by the Manager in relation to the lending activities of the Fund. As accepted by the Trustee on the advice of the Manager, the lending agent shall receive a maximum of 30% of the lending fees, whilst the Manager shall retain a maximum of 10% of the lending fees as operational costs. The Fund will retain a minimum 70% of the lending fees as lending income.

During the term of the loan, the Fund is also entitled to all distributions made on, or in respect of the loaned securities, along with all other economic benefits due to the owner of the loaned securities.

## Risk Management

### i) Securities lending risk

The Fund may engage in securities lending, which exposes the Fund to the risk of financial losses caused by the lending agent's failure to return the loaned securities on a timely manner. The Fund is also exposed to the risk of losing money in the event collateral for the loaned securities are not at market value and a default occurs.

To mitigate this risk, the Fund would only be transacting with the lending agent, who will in turn, be carrying out the necessary due diligence process with the borrowers. As such, the Fund would only be lending out its securities to a prequalified list of counterparties. The borrowers are also required to meet the cash collateral requirement, which shall be no less than the market value of the loaned securities at the close of each Business Day of the Fund.

### ii) Liquidity risk from securities lending

This risk may arise from the risk of delay in obtaining the loan securities upon recall. Under such circumstances, the lending agent may utilise the cash collateral put forth by the borrower to purchase identical securities to that of the loaned securities to be returned to the Fund.

### iii) Operational dependency on lending agent risk from securities lending

This risk may arise from the dependency that the Fund has toward the lending agent where ownership of loaned securities is transferred during the tenure of the loan, while the Fund continues to maintain economic benefits of owning the loaned securities.

To mitigate this risk, the Manager has ensured that its valuation agent has in place internal systems to cross reference securities that are lent out by the Fund. Processes are also put in place to ensure that the lending agent obtains adequate cash collateral for all loaned securities to ensure that the Fund has the necessary recourse if required.

iv) Risk of conflict of interest from securities lending

This risk may arise from the Manager investing into securities for the Fund with the intention of lending the securities to increase the Fund's revenue. This risk is mitigated as the Fund stipulates within its investment strategy that it will only invest into securities to replicate the Benchmark's component securities, and to replicate as closely as possible the weightage of the Benchmark. Furthermore, as an exchange-traded fund, the Fund's securities are also not actively traded, and will be maintained in the portfolio over the medium-to-longer term, or until the next rebalancing exercise for the Benchmark by the Index Licensor.

**Borrowing**

The Fund is not permitted to borrow cash or other assets (including the borrowing of securities within the meaning of the SBL Guidelines) in connection with its activities.

### 3.11 Income Distribution Policy

The Fund will distribute income at least once a year (subject to income availability), after the end of its first financial year.

The Fund's income distributions are non-guaranteed and may not be the same as the yield of the Benchmark.

Details of the entitlement dates, distribution amounts, ex-entitlement dates and payment dates for the distributions will be published on Bursa Securities' website at [www.bursamalaysia.com](http://www.bursamalaysia.com).

Income distribution (if any) will be made in the following manner:

- By way of eDividend;
- By way of a cheque sent to the Unit Holder's postal address; or
- Such other method to be determined by the Manager and the Trustee, and allowed under the relevant rules and regulations in Malaysia.

Please note that all income distributions will be paid in Ringgit Malaysia only. If the distribution available is too small or insignificant, any distribution may not be of benefit to the Unit Holders as the total cost to be incurred in any such distribution may be higher than the amount for distribution.

### 3.12 Valuations of the Fund Assets

The Manager will ensure that the valuation of the Fund is carried out in a fair manner in accordance with the relevant laws and ETF Guidelines. The Manager will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance with the Malaysian Financial Reporting Standard 9, issued by the Malaysian Accounting Standards Board.

The valuation bases for the permitted investments of the Fund are as below:

**Listed Securities**

Valuation of listed securities will be based on the market price i.e. closing bid price. Where no market price is publicly available or where the use of the quoted market value is inappropriate, or where no market price is available, including in the event of suspension in the quotation of the securities for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such investments are valued at fair value as determined

in good faith by the Manager or its delegate, based on the methods or bases approved by the Trustee after appropriate technical consultation.

#### **Money Market Instruments**

The valuation of MYR denominated money market instruments will be done using the price quoted by a Bond Pricing Agency registered with the SC. For foreign money market instruments, valuation will be done using the average indicative yield quoted by 3 independent and reputable institutions.

#### **Deposits**

Deposits placed with Financial Institutions are valued by reference to the principal value of such investments and the interests accrued thereon for the relevant period.

#### **Collective Investment Schemes**

An unlisted collective investment schemes will be valued based on its last published repurchase price. For listed collective investment schemes, the valuations shall be done in the same manner as listed securities described above.

#### **Any Other Investment**

The valuation will be at fair value as determined in good faith by the Manager, on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

### **3.13 Valuation Point for the Fund**

The Fund will be valued at the official close of trading of Bursa Securities, currently being 5.00 p.m. (Malaysian time) on each Business Day other than where there is a suspension of calculation of the NAV of the Fund.

### **3.14 Listing of the Fund**

The approval for admission to the Official List and the listing of and quotation for up to 1,000,000,000 Units on the Main Market of Bursa Securities was obtained from Bursa Securities on 23 March 2020.

The Units will be admitted to the Official List and official quotation for the Units on the Main Market of Bursa Securities will commence upon receipt of confirmation from Bursa Depository that the respective CDS Accounts of the Manager have been duly created.

**Pursuant to Section 14 (1) of the Central Depositories Act, Bursa Securities has prescribed the Units as a prescribed security. In consequence thereof, the Units offered through this Prospectus will be deposited directly with Bursa Depository and any dealings in these Units will be carried out in accordance with the Central Depositories Act and the rules of Bursa Depository.**

## 5.8 Trading of the Units on Bursa Securities (secondary market)

After Listing, Units of the Fund can be bought and sold on Bursa Securities throughout the trading day like any other publicly-traded shares. Units are generally purchased and sold in "board lots" of 100 Units. However, brokerage firms may permit investors to purchase or sell Units in smaller "odd-lots", although prices of Units traded in "odd-lots" may differ from Units purchased and sold in "board lots".

**However, investors should note that transactions in the secondary market on Bursa Securities will occur at quoted market prices which may differ from the daily NAV per Unit due to market demand and supply, liquidity and trading spread for the Units in the secondary market. As a result, the market price of the Units in the secondary market may be higher or lower than the daily NAV per Unit.**

When buying or selling Units through a broker, investors will incur customary brokerage and clearing fees.

Pursuant to Section 14(1) of the Central Depositories Act, Bursa Securities has prescribed the Units as a prescribed security. In consequence thereof, the Units will be deposited directly with Bursa Depository and any dealings in these Units will be carried out in accordance with the Central Depositories Act and the rules of Bursa Depository.

As an investor, the Unit Holder is the beneficial owner of the Units as shown in the records of Bursa Depository. Bursa Depository serves as the securities depository for all Units of the Fund. The Unit Holder is not entitled to receive physical delivery of Unit certificates or to have Units registered in its name, and it is not considered a registered owner of Units. Therefore, to exercise any right as the beneficial owner of Units, the Unit Holder must rely upon the procedures of Bursa Depository. These procedures are the same as those that apply to securities listed on Bursa Securities.

## **5.9 Unit Trading Prices**

The trading prices of Units on Bursa Securities may differ from their daily NAV per Unit and IOPV per Unit and can be affected by market forces such as supply and demand, economic conditions and other factors. Unit Holders may keep track of the current market price of the Units via Bursa Securities' website at [www.bursamalaysia.com](http://www.bursamalaysia.com) on a daily basis.

## **5.10 Market Making**

It is the intention of the Manager to facilitate the provision of liquidity for Unit Holders through the appointment of the market maker who is required to maintain a market for the Units. In maintaining a market for Units, the market maker may realise profits or sustain losses. Any profit made by the market maker may be retained by it for its absolute benefit and it shall not be liable to account to the Fund in respect of such profits.

Although the market maker may buy and sell Units just like retail investors via Bursa Securities, there is no guarantee or assurance as to the price at which a market for the Units will be made. Additional market maker(s) may be appointed in future by the Manager. A list of market makers appointed by the Manager for the Fund may be obtained from Bursa Securities' website at [www.bursamalaysia.com](http://www.bursamalaysia.com) and on the Fund's website at [www.tradeplus.com.my](http://www.tradeplus.com.my). Dear Sirs

## **TradePlus DWA Malaysia Momentum Tracker Taxation of the Fund and Unit Holders**

1. This letter has been prepared for inclusion in the Prospectus (hereinafter referred to as "the Prospectus") in connection with the offer of units in the TradePlus DWA Malaysia Momentum Tracker (hereinafter referred to as "the Fund").

The following is general information based on Malaysian tax law in force at the time of lodging the Prospectus with the Securities Commission Malaysia ("SC") and investors should be aware that the tax law may be changed at any time. To an extent, the application of tax law depends upon an investor's individual circumstances. The information provided below does not constitute tax advice. The Manager therefore recommends that an investor consult his accountant or tax adviser on questions about his individual tax position.

## **2. Taxation of the Fund**

### **2.1 Income Tax**

As the Fund's Trustee is resident in Malaysia, the Fund is regarded as resident in Malaysia. The taxation of the Fund is governed principally by Sections 61 and 63B of the Malaysian Income Tax Act, 1967 ("MITA").

Pursuant to the Section 2(7) of MITA, any reference to interest shall apply, mutatis mutandis, to gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah. The effect of this is that any gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah, will be accorded the same tax treatment as if they were interest.

The income of the Fund in respect of dividends, interest or profits from deposits and other investment income (other than income which is exempt from tax) derived from or accruing in Malaysia is liable to income tax. The Fund may be receiving income such as exit fee which will be subject to tax at the prevailing tax rate applicable on the Fund. Gains on disposal of investments by the Fund will not be subject to income tax.

The income tax rate applicable to the Fund is 24%.

Tax exempt interest as listed in the Appendix attached received by the Fund are not subject to income tax.

With effect from 1 January 2014, Malaysia has fully moved to a single-tier income tax system. The Fund is not liable to tax on any Malaysia sourced dividends paid, credited or distributed to the Fund under the single tier tax system, where the company paying such dividend is not entitled to deduct tax under the MITA. The tax deductibility of other deductions by the Fund against such dividend income will be disregarded in ascertaining the chargeable income of the Fund.

In addition to the single-tier dividend that may be received by the Fund, the Fund may also receive Malaysian dividends which are tax exempt from investments in companies which had previously enjoyed or are currently enjoying the various tax incentives provided under the law. The Fund is not subject to income tax on such tax exempt dividend income.

The Fund may also receive dividends, profits and other income from investments outside Malaysia. Income derived from sources outside Malaysia and received in Malaysia by a unit trust is exempted from Malaysian income tax. However, such income may be subject to foreign tax in the country from which the income is derived.

The tax treatment of hedging instruments would depend on the particular hedging instruments entered into. Generally, any gain or loss relating to the principal portion will be treated as capital gain or loss. Gains or losses relating to the income portion would normally be treated as revenue gains or losses. The gain or loss on revaluation will only be taxed or claimed upon realisation. Any gain or loss on foreign exchange is treated as capital gain or loss if it arises from the revaluation of the principal portion of the investment.

Generally, income from distribution by the Malaysia Real Estate Investment Trusts ("REIT") will be received net of withholding tax of 10%. No further tax will be payable by the Fund on the distribution. Distribution from such income by the Fund will also not be subject to further tax in the hands of the Unit Holders.

Expenses being manager's remuneration, maintenance of register of Unit Holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postage, which are not allowed under the general deduction rules, qualify for a special deduction, subject to a minimum of 10% and a maximum of 25% of such expenses pursuant to Section 63B of the MITA.

## **2.2 Gains on Disposal of Investments**

Gains on disposal of investments by the Fund will not be subject to income tax but where the investments represent shares in real property companies, such gains may be subject to Real Property Gains Tax ("RPGT") under the RPGT Act, 1976. A real property company is a controlled company which owns or acquires real properties or shares in real property companies with a market value of not less than 75% of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

## **2.3 Goods and Services Tax ("GST") and Service Tax**

The Goods and Services Tax Act 2014 was repealed effective from 1 September 2018 and replaced by the Sales Tax and Service Tax which was reintroduced from 1 September 2018.

Should the Fund provide any taxable services within the scope of the Service Tax Regulations 2018 (e.g. management and consulting services) with an aggregate value of RM500,000 or more in a 12 months period, the Fund would be required to register for Service Tax and charge Service Tax on the said services at the prevailing rate of 6%. If the Fund does not make any taxable services it would not be required to register for Service Tax.

The issuance of units by the Fund to investors will not be subject to Service Tax, and no Service Tax would be included in the price of the units. Any distributions made by the Fund to unitholders are also not subject to Service Tax.

The provision of management services are within the scope of the Service Tax and is a prescribed taxable service under the Service Tax Regulations 2018. However, the provision of management services by a person licensed or registered with the Securities Commission Malaysia for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007 are specifically excluded from the scope of management services. The Fund would not be required to pay Service Tax on the acquisition of fund management services from the Fund Manager.

To the extent that the Fund invests in any financial services products (e.g. securities, derivatives, units in a fund or unit trust), the acquisition of these interests will also not be subject to Service Tax.

If the Fund acquires any imported taxable services for a service provider outside of Malaysia, these services would be subject to 6% Service Tax. The Fund would be required to file an SST-02A return on an adhoc basis and report and pay this amount of tax to the Royal Malaysian Customs Department

### 3. Taxation of Unit Holders

#### 3.1 Taxable Distribution

Unit Holders will be taxed on an amount equivalent to their share of the total taxable income of the Fund to the extent such income is distributed to them. Unit Holders are also liable to pay income tax on the taxable income distributions paid by the Fund. Taxable income distributions carry a tax credit in respect of the tax chargeable on that part of the Fund. Unit Holders will be subject to tax on an amount equal to the net taxable income distribution plus attributable underlying tax paid by the Fund.

Income distributed to Unit Holders is generally taxable as follows in Malaysia :-

<b>Unit Holders</b>	<b>Malaysian Tax Rates for Year of Assessment 2019</b>	<b>Malaysian Tax Rates for Year of Assessment 2020</b>

The tax credit that is attributable to the income distributed to the Unit Holders will be available for set off against tax payable by the Unit Holders. There is no withholding tax on taxable distributions made to non-resident Unit Holders.

Non-resident Unit Holders may also be subject to tax in their respective jurisdictions and depending on the provisions of the relevant tax legislation and any double tax treaties with Malaysia, the Malaysian tax suffered may be creditable in the foreign tax jurisdictions.

### **3.2 Tax Exempt Distribution**

Tax exempt distributions made out of gains from realisation of investments and other exempt income earned by the Fund will not be subject to Malaysian tax in the hands of Unit Holders, whether individual or corporate, resident or non-resident. All Unit Holders do not pay tax on that portion of their income distribution from the Fund's distribution equalisation account.

### **3.3 Distribution Voucher**

To help complete a Unit Holder's tax returns, the Manager will send to each Unit Holder a distribution voucher as and when distributions are made. This sets out the various components of the income distributed and the amount of attributable income tax already paid by the Fund.

### **3.4 Sale, Transfer or Redemption of Units**

Any gains realised by a Unit Holder on the sale, transfer or redemption of his units are generally tax-free capital gains unless the Unit Holder is an insurance company, a financial institution or a person trading or dealing in securities. Generally, the gains realised by these categories of Unit Holders constitute business income on which tax is chargeable.

### **3.5 Reinvestment of Distribution**

Unit Holders who receive their income distribution by way of investment in the form of the purchase of new units will be deemed to have received their income distribution after tax and reinvested that amount in the Fund.

### **3.6 Unit Splits**

Unit splits issued by the Fund are not taxable in the hands of the Unit Holders.

Yours faithfully

**Chee Pei Pei**  
Executive Director
