B11. PROSPECTS

Malaysia’s gross domestic product (“GDP”) is expected to have moderate growth between 4% to 5% in 2023 rising to 4.6% in 2024 amid challenging external environment, with domestic demand continuing to drive growth, supported by the continued improvement in the labour market and the realisation of multi-year investment projects.

Similar to previous recent years, the General Insurance business in the Philippines, held by MAAGAP, is poised to continue with premium growth and improved profit margins in 2024 by capturing a wider market share in the Philippines through agencies expansion, venture to innovative digital transformation and management efficiency while preserving its prudent selection of risk and underwriting principles. Baring other unforeseen circumstances like natural disasters which Philippines is most vulnerable to and the market driven stock performance, the Group is cautiously optimistic and expects MAAGAP to improve its revenue and financial performance in 2024.

The Group’s Education Services’ operating units namely Kasturi, SJI Group and Imperium Edumaax will continue to intensify their marketing efforts to increase student enrolment, diversify program offerings and continue with cost control measures for 2024.

The Credit Services segment of the Group comprises of Money Lending and Debt Factoring business activities.
