# Part A - Explanatory Notes Pursuant to Malaysian Financial Reporting Standard ("MFRS") 134 and Policy Document on Financial Reporting Issued by Bank Negara Malaysia

#### A1. Basis of Preparation

The unaudited condensed interim financial statements for the 2nd quarter and financial half year ended 30 June 2024 have been prepared under the historical cost convention except for the following assets and liabilities which are stated at fair values: financial assets at fair value through profit or loss ("FVTPL"), financial investments at fair value through other comprehensive income ("FVOCI"), derivative financial instruments and investment properties.

The unaudited condensed interim financial statements have been prepared in accordance with MFRS 134: Interim Financial Reporting issued by the Malaysian Accounting Standards Board ("MASB") and Chapter 9, Part K of the Listing Requirements of Bursa Malaysia Securities Berhad. The unaudited condensed interim financial statements should be read in conjunction with the annual audited financial statements of the Group and of the Bank for the financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group and of the Bank since the financial year ended 31 December 2023.

The unaudited condensed interim financial statements incorporated those activities relating to the Islamic banking business which have been undertaken by the Group. Islamic banking business refers generally to the acceptance of deposits and granting of financing under the principles of Shariah.

The material accounting policies and methods of computation applied in the unaudited condensed interim financial statements are consistent with those adopted in the most recent annual financial statements for the financial year ended 31 December 2023.

The following Malaysian Financial Reporting Standards ("MFRSs") and Amendments to MFRSs have been issued by MASB that are applicable to the Group and the Bank but are not yet effective:

Effective for annual periods commencing on or after 1 January 2025

- Lack of Exchangeability (Amendments to MFRS 121 The Effects of Changes in Foreign Exchange Rates)

Effective for annual periods commencing on or after 1 January 2026

- Amendments to the Classification and Measurement of Financial Instruments (Amendments to MFRS 9 Financial Instruments and MFRS 7 Financial Instruments: Disclosures)

Effective for annual periods commencing on or after 1 January 2027

- MFRS 18 Presentation and Disclosure in Financial Statements
- MFRS 19 Subsidiaries without Public Accountability: Disclosures

Effective date of these Amendments to Standards has been deferred, pending further announcement

- Amendments to MFRS 10 Consolidated Financial Statements and MFRS 128 Investments in Associates and Joint Ventures - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

Lack of Exchangeability (Amendments to MFRS 121 The Effects of Changes in Foreign Exchange Rates) - The amendments provide guidance on the spot exchange rate to use when a currency is not exchangeable into another currency and the disclosures entities need to provide to enable users of financial statements to understand the impact of a currency not being exchangeable.

Amendments to the Classification and Measurement of Financial Instruments (Amendments to MFRS 9 Financial Instruments and MFRS 7 Financial Instruments: Disclosures) - The amendments provided clarification on the classification of financial assets with environmental, social and corporate governance ("ESG") linked features via additional guidance on the assessment of contingent features. The amendments also clarify the date on which a financial asset or financial liability is derecognised. In addition, the amendments permit a company to derecognise a financial liability before it delivers cash on the settlement date if specified criteria are met.

New disclosure requirements are also introduced for financial instruments with contingent features and equity instruments classified at fair value through other comprehensive income.

#### A1. Basis of Preparation (continued)

**MFRS 18 Presentation and Disclosure in Financial Statements** - the new standard introduces new requirements on presentation within the statement of profit or loss. It also requires disclosure of management-defined performance measures and includes enhanced principles on aggregation and disaggregation of financial information which apply to the primary financial statements and the notes.

**MFRS 19 Subsidiaries without Public Accountability: Disclosures** - MFRS 19 is an optional, disclosure-only Standard which allows eligible subsidiaries to provide reduced disclosure when applying MFRS Accounting Standards in their financial statements.

Amendments to MFRS 10 Consolidated Financial Statements and MFRS 128 Investments in Associates and Joint Ventures - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - The amendments clarify that a full gain or loss is recognised when a transaction involves a business (whether it is housed in a subsidiary or not), as defined in MFRS 3 Business Combinations. A partial gain or loss is recognised when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary.

The adoption of the above MFRSs and amendments to MFRSs is not expected to have any financial impact on the financial statements of the Group and of the Bank.

## A28. Derivative Financial Instruments (continued)

ii) The Group's and the Bank's derivative financial instruments are subject to market, credit and liquidity risk, as follows:

## <u>Market Risk</u>

Market risk on derivatives is the potential loss to the value of these contracts due to changes in price of the underlying items such as equities, interest rates, foreign exchange, credit spreads, commodities or other indices. The notional or contractual amounts provide only the volume of transactions outstanding at the reporting date and do not represent the amounts at risk. Exposure to market risk may be reduced through offsetting items from on and off-balance sheet positions.

## Credit Risk

Credit risk arises from the possibility that a counterparty may be unable to meet the terms of a contract in which the Group and the Bank have a gain in a contract. As at the reporting date, the amounts of credit risk in the Group and the Bank, measured in terms of the cost to replace the profitable contracts, were RM273,742,000 (2023: RM414,811,000) and RM261,720,000 (2023: RM409,372,000) respectively. These amounts will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

## Liquidity Risk

Liquidity risk on derivatives is the risk that the derivative position cannot be closed out promptly. Exposure to liquidity risk is reduced through contracting derivatives where the underlying items are widely traded.

iii) Cash Requirements of the Derivatives

Cash requirements of the derivatives may arise from margin requirements to post cash collateral with counterparties as the fair value moves beyond the agreed upon threshold limits in the counterparties' favour, or upon downgrade in the Bank's credit ratings. As at the reporting date, the Group and the Bank had posted cash collateral of RM97,424,000 (2023: RM54,095,000) on their derivative contracts.

- iv) There have been no changes since the end of the previous financial year in respect of the following:
  - a) the types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
  - b) the risk management policies in place for mitigating and controlling the risks associated with these financial derivative contracts; and
  - c) the related accounting policies.

The above information, policies and procedures in respect of derivative financial instruments of the Group and of the Bank are discussed in the annual audited financial statements for the financial year ended 31 December 2023 and Pillar 3 Disclosures section of the 2023 Annual Report.

#### A29. a) Fair Value Measurements

#### Determination of Fair Value and Fair Value Hierarchy

The Group and the Bank classify financial instruments and non-financial assets which are measured at fair value according to the following hierarchy, reflecting the significance of inputs used in making the fair value measurements:

- Level 1 Quoted market prices: quoted prices (unadjusted) in active markets for identical instruments;
- Level 2 Fair values based on observable inputs: inputs other than quoted prices included within Level 1 that are observable for the instrument, whether directly (i.e. prices) or indirectly (i.e. derived from prices), are used; and
- Level 3 Fair values derived using unobservable inputs: inputs used are not based on observable market data and the unobservable inputs may have a significant impact on the valuation of the financial instruments and non-financial assets.

The following tables show the Group's and the Bank's financial instruments and non-financial assets which are measured at fair value at the reporting date analysed by the various levels within the fair value hierarchy:

#### A29. a) Fair Value Measurements (continued)

#### Determination of Fair Value and Fair Value Hierarchy (continued)

For financial instruments measured at fair value, where available, quoted and observable market prices in an active market or dealer price quotations are used to measure fair value. These include listed equity securities, price quotations from Bond Pricing Agency Malaysia and broker quotes on Bloomberg/Reuters.

Where such quoted and observable market prices are not available, fair values are determined using appropriate valuation techniques, which include the use of mathematical models, such as discounted cash flow models and option pricing models, comparison to similar instruments for which market observable prices exist and other valuation techniques. The valuation techniques used incorporate assumptions regarding discount rates, interest/profit rate yield curves, estimates of future cash flows and other factors, as applicable. Changes in these assumptions could materially affect the fair values derived. The Group and the Bank generally use widely recognised valuation techniques with market observable inputs, if available, for the determination of fair value, which require minimal management judgment and estimation, due to the low complexity of the financial instruments held.

The fair values of investment properties located in Malaysia are determined using comparison method by reference to the recent sales prices of comparable properties, adjustments are made where dissimilarities exist. The fair values of investment properties located in Hong Kong are determined using comparison method by reference to recent sales prices of comparable properties on a price per square meter basis. A significant change in the price per square meter will result in a significant change in the fair value of the investment properties in Hong Kong.

#### b) Gains/Losses Arising from Fair Value Changes of Financial Liabilities

Other than derivative financial instruments where the fair value changes are recognised as derivative financial assets or liabilities, as disclosed in Note A28, there were no gains or losses arising from fair value changes of other financial liabilities.

The capital adequacy ratios of the Bank consist of total capital and risk-weighted assets derived from the Bank and from its wholly-owned offshore banking subsidiary company, Public Bank (L) Ltd.

The total risk-weighted assets of the Group and of the Bank are computed based on the following approaches:

- (i) Standardised Approach for Credit Risk;
- (ii) Standardised Approach for Market Risk; and
- (iii) Basic Indicator Approach for Operational Risk.

## A30. Capital Adequacy (continued)

a) The capital adequacy ratios of the Group and of the Bank (continued):

#### Regulatory capital requirements

The capital adequacy ratios of the Group and of the Bank are computed in accordance with BNM's Capital Adequacy Frameworks on Capital Components and Basel II - Risk-Weighted Assets. The minimum regulatory capital adequacy ratios before including capital conservation buffer ("CCB"), countercyclical capital buffer ("CCyB") and higher loss absorbency ("HLA") requirement for CET I capital ratio, Tier I capital ratio and total capital ratio are 4.5%, 6.0% and 8.0% respectively.

Banking institutions are also required to maintain a CCB of 2.5% and a CCyB above the minimum regulatory capital adequacy ratios. A CCyB is required to be maintained if this buffer is applied by regulators in countries which the Group and the Bank have exposures to, determined based on the weighted average of prevailing CCyB rates applied in those jurisdictions. The Group and the Bank have applied CCyB on their private sector credit exposures outside Malaysia in line with the respective jurisdictions' requirement to maintain their CCyB. The CCyB is not a requirement for exposures in Malaysia yet but may be applied by regulators in the future.

HLA requirement is applicable to financial institutions designated as domestic systemically important banks ("D-SIBs"). Arising from this, the Group which is designated as a D-SIB by BNM is required to maintain an additional capital buffer of 0.5% to the regulatory capital requirements in line with the BNM's D-SIB Framework.

b) The breakdown of risk-weighted assets by each major risk category of the Group and of the Bank is as follows:
