1. Basis of preparation (continued)

The accounting policies and presentation adopted for this Unaudited Condensed Consolidated Interim Financial Information are mainly consistent with those of the Group's audited financial statements for the

The adoption of the above do not have any significant impact to the Group other than as discussed below.

(a) MFRS 16: Leases

MFRS 16 replaces MFRS 117 Leases, IC Interpretation 4 Determining whether an Arrangement contains a Lease, IC Interpretation 115 Operating Leases-Incentives and IC Interpretation 127 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. MFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under MFRS 117. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees is also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognise the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under MFRS 16 is substantially unchanged from accounting under MFRS 117. Lessors will continue to classify all leases using the same classification principle as in MFRS 117 and distinguish between two types of leases: operating and finance leases.

The Group has adopted MFRS 16 using the modified retrospective method. Accordingly, the Group has not restated the comparative information. The Group has elected to apply the standard to contracts that were previously identified as leases applying MFRS 117 and IC Interpretation 4. The Group therefore has not applied the standard to contracts that were not previously identified as containing a lease applying MFRS 117 and IC Interpretation 4.

The summary of the impact (increase/(decrease)) from MFRS 16 adoption on the statement of financial position as at 1 July 2019 is as follows:

	Note	RM'000
Assets		1,390
Right-of-use assets	a	1,390

Lease liabilities	b	1,390

1. Basis of preparation (continued)

The accounting policies and presentation adopted for this Unaudited Condensed Consolidated Interim Financial Information are mainly consistent with those of the Group's audited financial statements for the financial year ended 30 June 2019, except for the following: (continued)

(b) MFRS 16: Leases (continued)

- a) Recognition of right-of-use asset at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments immediately before the date of initial application.
- b) Recognition of lease liability at the date of initial application, measured at the present value of remaining lease payments, discounted at the Group's weighted average incremental borrowing rate of 5.00%.

Reconciliation of lease liabilities recognised from operating lease obligations:
