Notes to the interim financial report - 28 February 2011

A Explanatory notes - FRS 134 : Interim Financial Reporting

A 1 Basis of preparation

The interim financial report has been prepared in accordance with FRS 134: Interim Financial Reporting and Chapter 9 Part K of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad.

The interim financial report is unaudited and should be read in conjunction with the audited financial statements for the financial year ended 31 August 2010.

The same accounting policies and methods of computation are followed in the interim financial report as compared with the annual financial statements for the financial year ended 31 August 2010 except for the adoption of new standards, amendments to standards and IC interpretations that are mandatory for the Group for the financial year beginning 1 September 2010. The adoption of these standards, amendments and interpretations do not have a material impact on the interim financial information of the Group except for FRS 139: Financial Instruments, Recognition and Measurement, FRS 101 (Revised): Presentation of Financial Statements, Amendment to FRS 117: Leases and FRS 7: Financial Instruments: Disclosures.

The principal changes in accounting policies and effects resulting from the adoption of the abovementioned FRSs and Amendment to FRS are discussed below.

(a) FRS 139: Financial Instruments, Recognition and Measurement

FRS 139 sets out the requirements for the recognition and measurement of financial instruments.

The Group classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables, held-to-maturity, and available-for-sale. The classification depends on the nature of the asset and the purpose for which the asset was acquired. Financial instruments are recorded initially at fair value. Subsequent measurement of those instruments at statement of financial position date reflects the designation of the financial instrument. The Group determines the classification at initial recognition and at each financial year end, the Group reevaluate this designation except for those financial instruments measured at fair value through profit or loss.

(i) Loans and receivables

Prior to 1 September 2010, loans and receivables were stated at gross proceeds receivables less provision for doubtful debts. Under FRS 139, loans and receivables are initially measured at fair value and subsequently at amortised cost using the effective rate method. Gains and losses are recognised in profit or loss when the loans and receivables are derecognised, impaired or through the amortisation process.

(ii) Available-for-sale financial assets

Prior to 1 September 2010, available-for-sale financial assets i.e non-current investments were stated at cost less impairment losses. Under FRS 139, available-for-sale financial assets is measured initially at fair value plus transactions costs and subsequent changes in fair value are recognised in equity until the investment is derecognised or impaired or at cost if the unquoted equity investment is not carried at fair value because its fair value cannot be measured reliably.

Changes in fair values of available-for-sale equity securities are recognised in other comprehensive income, together with the related currency translation differences. A significant or prolonged decline in the fair value of the security below its cost is considered as an indicator that the asset is impaired. If any such evidence exists, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss previously recognised in profit or loss, is removed from equity and recognised in profit or loss. Impairment losses recognised in profit or loss on equity instruments classified as available-for-sale are reversed through other comprehensive income and not through profit or loss.

When securities classified as available-for-sale are sold, the accumulated fair value adjustments recognised in other comprehensive income are included in profit or loss.

Notes to the interim financial report - 28 February 2011

A 1 Basis of preparation (cont'd.)

(iii) Held-to-maturity

Prior to 1 September 2010, held-to-maturity financial assets i.e non-derivative financial assets with fixed or determinable payments and fixed maturities were accounted for at cost less impairment losses. Under FRS 139, held-to-maturity financial assets is measured at fair value initially and subsequently at cost using the effective interest rate method. Gains and losses are recognised in the profit or loss when the investments are derecognised, impaired or through the amortisation process.

(iv) Fair value through profit or loss

Derivative financial instruments were not previously recognised in the financial statements on inception. These are now recognised and measured at fair value on the date a derivative contract is entered into and are subsequently remeasured at fair value with changes recognised in profit or loss at each reporting date.

(v) Financial liabilities

Financial liabilities are classified as financial liabilities at fair value through profit or loss and loans and borrowings. The Group determines the classification of its financial liabilities at initial recognition. Financial liabilities are recognised initially at fair value and in the case of loans and borrowings, directly attributable transaction costs. Subsequent measurement for financial liabilities at fair value through profit or loss are recognised in the income statement whereas for loans and borrowings are measured at amortised cost using the effective interest method. Gains and losses are recognised in the profit or loss when the liabilities are derecognised through amortisation process.

In accordance with the transitional provisions of FRS 139, the above changes are applied prospectively and comparatives are not restated. All financial assets and financial liabilities are reclassified and remeasured as of 1 September 2010 and the related effects are adjusted against the opening retained profits and fair value reserves as appropriate. The effects of the changes are disclosed in Note A1(e).

(b) FRS 101 (Revised): Presentation of Financial Statements

The new FRS 101 requires owner and non-owner changes in equity to be presented separately. The statement of changes in equity will include only details of transactions with owners, with all non-owner changes in equity presented as a single line item. In addition, the revised standard introduces the statement of comprehensive income: it presents all items of income and expense recognised in profit or loss, together with all other items of recognised income and expense, either in one single statement, or in two linked statements. This is a disclosure standard with no impact on the financial position or financial performance of the Group. The Group has elected to present in two linked statements.

(c) FRS 7: Financial Instruments: Disclosures

FRS 7 requires extensive disclosures of qualitative and quantitative information about exposure to risks from financial instruments. Such disclosures will be made in the audited annual financial statements of the Group.

(d) Amendment to FRS 117: Leases

Leasehold land is classified as a finance lease if the Group has substantially all the risks and rewards incidental to ownership. Previously, leasehold land was classified as an operating lease under prepaid land lease payments unless title is expected to pass to the lessee at the end of the lease term. Following the Amendment to FRS 117, the classification of leasehold land has been changed from operating to finance lease. The effect of the change is adjusted for retrospectively as disclosed in Note A1(e).

^{*} Changes from the adoption of FRS 139 are adjusted against the opening retained profits and fair value reserve as at 1 September 2010. Comparatives are not restated.

The Group has adopted all the revised FRSs, Amendments to FRS and Interpretations which became effective beginning 1 September 2010. The relevant standards have no significant impact on the financial statements of the Group upon the initial application except for the changes from adoption of FRS 139, FRS 7 and FRS 101 which are disclosed above.

A 2 Seasonal or cyclical nature of operations

The revenue and earnings are impacted by the production of fresh fruit bunches and volatility of the selling prices of fresh fruit bunches, crude palm oil and palm kernel.

The production of fresh fruit bunches depends on weather conditions, production cycle of the palms and the age of the palms.

The plantation statistics are as follows:

Average planted area for six months ended 28 February 2011:

B 1 Review of performance

(a) Second financial quarter ended 28 February 2011

During the second financial quarter under review, the average selling prices of ffb, crude palm oil and palm kernel were substantially higher than those in the previous corresponding financial quarter resulting in an increase of 25.92% in revenue even though the production of ffb, crude palm oil and palm kernel were significantly lower.

Share of profit of associates was higher due mainly to an increase in profit contribution from the joint ventures engaged in oil palm plantation.

Overall profit for the period increased by 36.34%.

(b) Six months ended 28 February 2011

During the six months under review, the average selling prices of ffb, crude palm oil and palm kernel were substantially higher than those in the previous corresponding period resulting in an increase of 13.88% in revenue even though the production of ffb, crude palm oil and palm kernel were significantly lower.

Other income was substantially higher due mainly to an amount of gain on foreign exchange and an increase in interest income.

Share of profit of associates was higher due mainly to an increase in profit contribution from the joint ventures engaged in oil palm plantation.

Overall profit for the period increased by 22.17%.

B 2 Material change in the profit before taxation for the second financial quarter compared with the immediate preceding quarter

Revenue in the second financial quarter under review decreased by 6.67% when compared with the immediate preceding financial quarter due mainly to lower production of ffb, crude palm oil and palm kernel even though the average selling prices were higher.

Other income was substantially lower due mainly to decreases in an amount of gain on foreign exchange and an amount of replanting incentive received.

Share of profit of associates was higher due mainly to an increase in profit contribution from the joint ventures engaged in oil palm plantation.

Overall profit before taxation decreased by 19.45%.
