## A 2 Seasonal or cyclical nature of operations

The revenue and earnings are impacted by the production of fresh fruit bunches ('ffb') and volatility of the selling prices of ffb, crude palm oil ("CPO") and palm kernel ("PK").

The production of ffb depends on weather conditions, production cycle of the palms and the age of the palms.

# A 10 Material events subsequent to second financial quarter

There were no material events subsequent to the second financial quarter that have not been reflected in the financial statements for the financial quarter ended 29 February 2020, other than as discussed below:-

#### COVID-19

The unprecedented COVID-19 pandemic throughout the country and the world has a severe impact on the overall economies. In Malaysia, to contain the spread of COVID-19, the Malaysian Government imposed Movement Control Order ("MCO") from 18 March to 12 May 2020, and Conditional MCO from 13 May to 9 June 2020. However, the Malaysian Government has relaxed the MCO on industries providing essential services including the oil palm industry.

Subject to certain operating conditions, the estates and mills of the Group are able to operate. The Group has also implemented remote work arrangements.

The severity of the Covid-19 impact on business is unprecedented. The scale and duration of the economic uncertainties could not be reasonably estimated at this juncture.

## **B1** Review of performance

(a) Current financial quarter under review compared with preceding financial year corresponding financial quarter

Revenue in the current financial quarter under review decreased by 19.39% to RM23,729,000 from RM29,438,000. The sales volume of ffb, CPO and PK were substantially lower. The average selling prices of ffb, CPO and PK improved substantially. Overall, the substantial decrease in revenue was mainly due to the substantial reduction in sales volume.

Production and purchase of ffb were substantially lower. Correspondingly, the production of CPO and PK were substantially lower. The decrease in production was mainly due to the effect of the dry weather experienced in 2019.

Cost of sales increased mainly due to increases in the plantation operating expenses, and net changes in inventories, even though purchase of ffb decreased.

The decrease in revenue and increase in cost of sales has resulted in a decrease in gross profit.

Interest income and dividend income were higher. Other income was substantially higher mainly due to fair value gain of consumable biological assets amounting to RM1,048,000.

Share of results of associates reversed from a profit to an overall loss mainly due to losses incurred by the Group's investments in oil palm plantation in Indonesia.

Since previous financial years, the unrest in the surrounding villages located in the vicinity of the plantations in Lampung Province, Indonesia has caused the disruption in routine harvesting of ffb. The oil palm plantations have since commenced harvesting activities and mill operations. Total area accessed is approximately 53% of the total planted.

However, as reported previously, harvesting of the mature fields in the oil palm plantation of the joint venture located in South Sumatera Province, Indonesia has been delayed due to the unrest in the villages neighbouring the estate. Commencement of harvesting is pending clearance by the relevant authorities. In the current financial quarter under review, the Group recorded a profit in its share of results of the joint venture mainly due to gain on foreign currency translation.

Overall, profit net of tax decreased by 61.75% to RM3,270,000 from RM8,549,000 mainly due to the reasons mentioned above.

#### Notes to the interim financial report - 29 February 2020

#### B 1 Review of performance (cont'd.)

(b) Six months period under review compared with preceding financial year corresponding cumulative period

Revenue in the current six months period under review decreased by 2.76% to RM56,966,000 from RM58,585,000. The sales volume of ffb, CPO and PK were substantially lower. The average selling prices of ffb and CPO improved substantially, however, the average selling price of PK was substantially lower. Overall, the decrease in revenue was mainly due to the substantial reduction in sales volume.

Production and purchase of ffb were substantially lower. Correspondingly, the production of CPO and PK were substantially lower. The decrease in production was mainly due to the effect of the dry weather experienced in 2019.

Cost of sales increased mainly due to increases in the plantation operating expenses, and net changes in inventories.

The decrease in revenue and increase in cost of sales has resulted in a decrease in gross profit.

Interest income and dividend income were higher. Other income was substantially higher mainly due to fair value gain of consumable biological assets amounting to RM573,000.

Share of results of associates reversed from a profit to an overall loss mainly due to losses incurred by the Group's investments in oil palm plantation in Indonesia.

Since previous financial years, the unrest in the surrounding villages located in the vicinity of the plantations in Lampung Province, Indonesia has caused the disruption in routine harvesting of fresh fruit bunches. The oil palm plantations have since commenced harvesting activities and mill operations. Total area accessed is approximately 53% of the total planted.

However, as reported previously, harvesting of the mature fields in the oil palm plantation of the joint venture located in South Sumatera Province, Indonesia has been delayed due to the unrest in the villages neighbouring the estate. Commencement of harvesting is pending clearance by the relevant authorities. In the current financial quarter under review, the Group recorded a profit in its share of results of the joint venture mainly due to gain on foreign currency translation.

Overall, profit net of tax decreased by 37.78% to RM11,081,000 from RM17,808,000 mainly due to the reasons mentioned above.

### B 3 Prospects for financial year ending 31 August 2020

Restricted movements imposed by many governments around the world to curb the spread of Covid-19 has significantly reduced the demand for palm oil from key consuming countries resulting in weaker export of palm oil.

The proactive actions taken by the Malaysian Government to support the commodity sector through 100% export duty exemption from 1 July 2020 to 31 December 2020 for CPO augurs well for the palm oil industry.

Overall, the financial results of the Group in the second half of the FY2020 would be impacted by the volatile trend of the selling prices of CPO.
