The interim financial statements are unaudited and should be read in conjunction with the audited financial statements for the financial year ended 31 December 2020.

The interim financial statements are prepared under the same accounting policies and methods of computation as compared with the annual financial statements for the financial year ended 31 December 2020, except for the adoption of those standards and amendments that are issued and effective for annual periods beginning on or after 1 January 2021. Adoption of those standards and amendments did not have any effects on the financial performance or the financial position of the Group.

The Group has not adopted those standards and amendments that have been issued but not yet effective. The directors expect that the adoption of those standards and amendments will not have a material impact on the financial statements in the period of initial application.

A 2 Seasonal or cyclical nature of operations

The revenue and earnings are impacted by the production of fresh fruit bunches ("ffb") and volatility of the selling prices of ffb, crude palm oil ("CPO") and palm kernel ("PK").

The production of ffb depends on weather conditions, production cycle of the palms and the age of the palms.

First financial quarter and three months ended 31 March 2021

Revenue in the current financial quarter under review increased by 40.58% to RM18,896,000 from RM13,441,000 a year ago. The average selling prices of ffb, CPO and PK improved substantially. The sales volume of CPO and PK were higher, however, the sales volume of ffb was lower. Overall, the increase in revenue was mainly due to the substantial improvement in the average selling prices of ffb, CPO and PK.

Cost of sales was higher mainly due to an increase in plantation operating expenses.

Gross profit improved substantially mainly due to the substantial increase in revenue even though cost of sales increased.

Interest income was lower. However, dividend income was higher.

Other income was higher mainly due to an increase in fair value gain of consumable biological assets and an amount of gain on foreign currency translation.

Share of results of an associate and joint ventures reversed to an overall profit from an overall loss mainly due to profit recorded by an associate engaged in the trading of shares and stocks. In the previous year corresponding financial guarter, the associate incurred loss.

As reported previously, harvesting of mature fields in the oil palm plantation of the joint venture in Indonesia has been delayed due to the unrest in the villages neighbouring the estate. Commencement of harvesting is pending clearance by the relevant authorities. This has resulted in the joint venture incurring losses.

Overall, the Group recorded profit net of tax of RM6,143,000 compared with loss net of tax of RM923,000 a year ago mainly due to the reasons mentioned above.
