Explanatory Notes Pursuant to MFRS 134

Notes:

1. Accounting policies and basis of preparation

The interim financial statements are unaudited and have been prepared in accordance with the requirements of MFRS 134: Interim Financial Reporting and paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad.

The interim financial statements should be read in conjunction with the audited financial statements for the year ended 31 December 2018. These explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the year ended 31 December 2018.

The interim financial statements of the Group for the financial period ended 30 June 2019 was prepared in accordance with the Malaysian Financial Reporting Standards ("MFRS") Framework.

The accounting policies applied in this interim financial statements are the same as those applied in the Group's consolidated financial statements as at and for the year ended 31 December 2018, except MFRS 16 Leases which the Group adopted from 1 January 2019.

MFRS 16 supersedes MFRS 117 Leases, IC Interpretation 4, Determining whether an Arrangement contains a Lease, IC Interpretation 115, Operating Leases—Incentives and IC Interpretation 127, Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value.

The Group has applied the standard using the modified retrospective approach, under which the cumulative effect of initial recognition is recognised in the retained earnings.

Lessor accounting under MFRS 16 is substantially unchanged from MFRS 117, therefore did not have an impact for lease where the Group is the lessor.

As for lessee accounting, the adoption of MFRS 16 does not have a material effect on the Group's financial statements. Minor adjustments arising from the initial application of the new lease model in the opening balances as at 1 January 2019 are disclosed as below:

**Impact of adoption of MFRS 16 to
opening balance 1 January 2019
RM'000**

Right of use asset	201,554
Lease liability	<u>(202,014)</u>
	<u>(460)</u>
Retained earnings	<u>460</u>

Any other revised MFRSs, amendments to MFRS and IC Interpretations which are mandatory for companies with financial periods beginning on or after 1 January 2019 did not give rise to any significant effects on the financial statements of the Group.

1. Accounting policies and basis of preparation (cont'd.)

At the date of authorisation of these interim financial statements, the following MFRS, IC Interpretations and Amendments to IC Interpretations were issued but not yet effective and have not been applied by the Group:

MFRS, IC Interpretation and Amendments to IC Interpretations	Effective for annual periods beginning on or after

The operating performance is based on a measure of adjusted earning before interest, tax, depreciation and amortisation (EBITDA). 16. Commentary on the prospects, including the factors that are likely to influence the Group's prospects for the remaining period to the end of the financial year or the next financial year if the reporting period is the last quarter

Plantation

During nine (9) months of 2019, CPO experienced selling pressure from the market with the average price to-date at RM1,998/mt. In July, CPO average selling price dipped to the lowest for the year at RM1,879. The market was pressured due to higher production by 1.3 mil mt (+9%) compared to previous year corresponding period, lower exports during 3rd quarter and higher month end stocks of 2.4 mil mt in Sept 2019.

However, CPO price has seen sharp recovery in the 4th quarter contributed by higher exports to China and other countries, higher Soya Bean and Soya Bean Oil prices in the US, higher Biodiesel mandates from Indonesia (B30) and Malaysia (B20) in 2020 and expectations of lower palm oil production cycle in the first quarter of 2020.

Since 2012, we started our replanting of old palms to rejuvenate our estates in Terengganu which will improve our age profile towards achieving higher yield.

Meanwhile for our Kalimantan plantation - despite of the recent fire incident - the estate is progressing well with the rehabilitation programmes under its Value Creation Plan (VCP).

In addition, we are also undertaking a strategic review of our investment in Kalimantan, which may include a divestment of the asset, and we had, on 2 October 2019, lodged the information memorandum pertaining to Kalimantan asset to the Securities Commission. We are exploring various options to ensure stronger group balance sheet and sustainable growth to the group earnings. If and when there are material developments, the company will, in compliance with the applicable rules, make relevant announcement.

The Group is optimistic on the long term fundamentals of the industry and will remain focused in improving productivity and optimising production cost. We are committed to sustainability agenda, and the RSPO and MSPO certifications to command premiums on the Certified Sustainable Palm Oil (CSPO) and Certified Sustainable Palm Kernel (CSPK) sales.

Healthcare

Challenging economic environment and entry of new players to the industry will continue to weigh on the Healthcare sector. Nevertheless we are optimistic that our Healthcare Division growth will be supported by our capacity expansion and introduction of new service modalities.

The increase in the number of beds in Kuala Terengganu Specialists Hospital to 122 (from the existing 92 beds) and the recent opening of Cathlab in KMC will provide positive contribution to the remaining period of 2019.

The Group is cautiously optimistic of achieving satisfactory operating performance in the financial year ending 2019.
