Notes to the Interim Financial Report

A1) Accounting Policies and Basis of Preparation - continued

Other than for the application of FRS 101, FRS 117 and FRS 139, the application of the above FRS, Amendments to FRS and Interpretations did not result in any significant changes in the accounting policies and presentation of the financial results of the Group.

a) FRS 101: Presentation of Financial Statements (FRS 101)

Prior to 1 January 2010, the components of a set of financial statements consisted of a balance sheet, income statement, statement of changes in equity, cash flow statement and notes to the financial statements.

Upon the adoption of the revised FRS 101, a set of financial statements shall now comprise a statement of financial position, statement of comprehensive income, statement of changes in equity, statement of cash flow and notes to the financial statements. The statement of comprehensive income consists of profit or loss and other comprehensive income for the period. All non-owner changes in equity previously presented in the consolidated statement of changes in equity are now presented in the statement of comprehensive income as components in other comprehensive income.

The comparative financial information on the consolidated statement of comprehensive income have been re-presented as summarized below so that it is in conformity with the revised standard:

(RM '000)	Consolidated Income Statement as previously reported	Effects on adoption of FRS 101	Consolidated Statement of Comprehensive Income as restated
Profit for the period	280,884	-	280,884
Other comprehensive income: exchange gain on translation of a foreign operation	-	1,813	1,813
Total comprehensive income	-	-	282,697

b) Amendment to FRS 117: Leases

Prior to the adoption of the Amendment to FRS 117, leasehold land that normally had an indefinite economic life and where title was not expected to pass to the lessee by the end of the lease term was treated as an operating lease. The payment made on entering into or acquiring a leasehold land was accounted for as prepaid lease payments that were amortised over the lease term in accordance with the pattern of benefits provided.

Notes to the Interim Financial Report

A1) Accounting Policies and Basis of Preparation - continued

b) Amendment to FRS 117: Leases - continued

Upon the adoption of the Amendment to FRS 117 in relation to classification of lease of land, the Group reassessed the classification of a leasehold land as a finance lease or an operating lease based on the extent of risks and rewards associated with the land. The Group has determined that all leasehold land of the Group in Malaysia are in substance finance leases and has reclassified its leasehold land from prepaid lease payments to property, plant and equipment.

The reclassification has been made retrospectively and does not affect the profit or loss for the current year ended 31 December 2010 and the corresponding year ended 31 December 2009.

The effects of the reclassification on the consolidated statement of financial position as at 31 December 2009 are as follows:

(RM '000)	Consolidated Balance Sheet as previously reported	Effects on adoption of FRS 117	Consolidated Statement of Financial Position as restated
Property, plant and equipment	494,718	351,662	846,380
Prepaid lease payments	382,835	(351,662)	31,173

c) FRS 139: Financial Instruments - Recognition and Measurement (FRS 139)

Prior to 1 January 2010, available-for-sale ("AFS") financial assets such as investments were accounted for at cost adjusted for amortisation of premium and accretion of discount less impairment or at the lower of cost and market value or at net tangible asset value, determined on an aggregate basis. Under FRS 139, AFS financial asset is measured at fair value initially and subsequently with amortisation of premium with accretion of discount and other accrual of income recognised in the income statement and with unrealised gains or losses recognised as other comprehensive income in the AFS reserve until the investment is derecognised, at which time the cumulative gain or loss is recognised in the income statement or determined to be impaired, at which time the cumulative loss is recognised in the income statement and removed from the AFS reserve.

In accordance with the transitional provisions of FRS 139, the above changes are applied prospectively and the comparatives as at 31 December 2009 are not restated. Instead, the changes have been accounted for by restating the following opening balance in the balance sheet as at 1 January 2010. The adoption of FRS 139 does not have any significant impact on the profit for the financial year-to-date.

Notes to the Interim Financial Report

A1) Accounting Policies and Basis of Preparation - continued

c) FRS 139: Financial Instruments - Recognition and Measurement (FRS 139) - continued

The effects of adoption of FRS 139 on the opening reserves of the Group and other items of the consolidated statement of financial position as at 1 January 2010 are as follows:

(RM '000)	Balance as at 1 January 2010 before the adoption of FRS 139	Effects on adoption of FRS 139	Balance as at 1 January 2010 after the adoption of FRS 139
Available-for-sale investment	10,553	2,307	12,860

A2) Audit Report

The auditor's report on the financial statements for the financial year ended 31 December 2009 was not qualified.

A3) Seasonal and Cyclical Nature of Group's Products and Operations

The prices for the Group's products are not within the control of the Group but are determined by the global supply and demand situation for edible oils and it is somewhat related to the price of mineral oil.

Crop production is seasonal. Based on statistics, the Group's production of crude palm oil ("CPO") and palm kernel ("PK") gradually increases from March, peaking around July to September, and then declines from October to February. This pattern can be affected by severe global weather conditions such as El Niño.

The prices obtainable for the Group's products as well as the volume of production, which is cyclical in nature, will determine the profits for the Group.

A4) Exceptional and Extraordinary Items

There were no exceptional or extraordinary items for the current quarter and year-to-date.

A5) Changes in Estimates

There were no material changes to estimates made in prior periods.

Notes to the Interim Financial Report

A6) Equity and Debt Securities

There have been no issue of new shares, share buy-backs, share cancellation, shares held as treasury shares and re-sale of treasury shares for the year.

There were no issuances of debt instruments during the year.

A7) Dividends Paid

The following dividends were paid during the year in respect of the financial year ended 31 December 2009:

	RM '000

Notes to the Interim Financial Report

A9) Valuation of Property, Plant and Equipment

The valuations of land and buildings have been brought forward without amendment from the financial statements for the year ended 31 December 2009.

A10) Events after the Balance Sheet Date

There were no material events after the balance sheet date.

A11) Changes in the Composition of The Group

There were no changes in the composition of the Group for the year including business combination, acquisition or disposal of subsidiaries and long term investments, restructuring and discontinuing operations.

A12) Contingent Liabilities and Contingent Assets

There were no contingent liabilities or contingent assets as at 21 February 2011.

B1) Directors' Review of the Group's Performance

The Group's profit before tax decreased by 6.3% to RM 349.5 million in the current year from RM 372.8 million in 2009 resulting from:

- decreases in the production of CPO and PK by 14.8% and 18.5% for the current year as compared to 2009. The selling prices of CPO and PK increased by 7.4% and 48.6% respectively in the current year as compared to 2009,
- RM 15.96 million unrealized foreign exchange loss on its IDR loans to Indonesian subsidiaries due to the strengthening Ringgit,
- the refinery recorded a surge in profit before tax to RM 16.2 million in the current year from RM 1.2 million in 2009 because of better margins and positive currency and commodity hedging positions.

B2) Comparison of Results with Preceding Quarter

Profit before tax increased by 1.4% from RM 105.9 million in the preceding quarter to RM 107.3 million for the quarter under review. The increase was due to higher CPO and PK selling prices by 18.1% and 37.8% respectively as compared to the preceding quarter which more than off-set the decreases in production of CPO and PKO by 10.8% and 14.6% respectively from the preceding quarter.

Notes to the Interim Financial Report

B3) Prospects and Outlook

Turbulent weather conditions experienced throughout the world have reduced agricultural production significantly during the second half of 2010 and caused tight supply positions for both soybean and palm oil stocks. As a consequence, prices of the major vegetable oils rallied during the 4th quarter of 2010.

The current seasonal low production of FFB in Indonesia and Malaysia is expected to sustain the palm oil prices in the shorter term. Palm Oil production is expected to increase from March/April 2011 based on the uptrend of the biological yield cycle coupled with more favorable climate.

Weather conditions in the South American soybean growing regions have improved lately which is expected to have a bearish impact on the vegetable oil complex during the second half of this year.

Although consumption and demand may be affected by the current unusually high vegetable oil prices, they are unlikely to dampen significantly the longer term price expectations due to an ever increasing world population and the impact of climate change that is affecting production globally.

The Group plans to replant a large area in Malaysia in 2011 in accordance with its replanting policy. Some areas in its Indonesian operations came into maturity in 2010 and more areas will be maturing in 2011. The Indonesian production will compensate somewhat for the crop loss from the replanted areas in Malaysia and as such the total production for the Group for 2011 is expected to be better than 2010.

As a result of the above, the Directors are of the opinion that the Group's results for the current financial year ending 31 December 2011 should be better than last year.

B4) Profit Forecasts

The Group has not issued any profit forecasts for the year under review.

Notes to the Interim Financial Report

B5) Taxation

The charge for taxation for the quarter ended 31 December 2010 comprises:

(RM '000)	Current Quarter	Current year- to-date
Current taxation	22,595	78,504
Deferred taxation	2,518	6,249
	25,113	84,753
Profit before taxation	107,301	349,460
Tax at the statutory income tax rate of 25%	26,825	87,365
Tax effects of expenses not deductible/(income not taxable) in determining taxable profit:		
Depreciation on non-qualifying assets	287	1,150
Claims for reinvestment allowance and research and development	(1,279)	(2,312)
Utilisation of previously unrecognized tax losses and unabsorbed capital allowances	(819)	(4,050)
Effect of taxation on temporary differences excluded on initial recognition	(1,340)	(1,340)
Overprovision of tax expense in prior years	-	(777)
Others	1,439	4,717
Tax expense	25,113	84,753

B6) Profit/Loss on Sale of Unquoted Investments and/or Properties

During the period, 0.4 ha. of idle land was sold at a profit of RM 123,000.

B7) Purchases and Disposal of Quoted Securities

There were no purchase or sale of investments in quoted securities for the year.

B8) Corporate Proposals

There were no corporate proposals which were announced but not completed as at 21 February 2011.

B9) Group Borrowings

All Group borrowings were unsecured, short term and denominated in Ringgit Malaysia only and outstanding balance as at 31 December 2010 was RM 1.487 million.

Notes to the Interim Financial Report

B10) Financial Instruments

The amounts of financial instruments used for hedging purposes and outstanding as at 31 December 2010 were:

Type of Instrument	Currency	---Maturity from reporting date---- Within 1 year RM'000	1-3 years RM'000	Over 3 years RM'000	Total Contract Amount RM'000	Fair Value Amount RM'000	Cash Require-ments RM'000
(i) Forward Foreign Exchange Contracts:							
Sales	USD	123,882	-	-	123,882	2,319	-
Purchases	USD	37,568	-	-	37,568	(1,263)	-
(ii) Commodity Contracts:							
Sales	RM	270,001	23,624	-	293,625	(47,773)	1,586
(iii) Commodity Contracts:							
Purchases	RM	294,624	25,615	-	320,239	49,621	-

Forward foreign exchange sale and purchase contracts were entered into as hedges for committed sales and purchases denominated in foreign currencies to minimize the exposure to fluctuations in foreign exchange rates.

The fair value of the forward foreign currency contracts is the amount that would be payable or receivable on completion/termination of the outstanding position, and is determined by reference to the difference between the contracted rates and the market rates as at the balance sheet date.

The commodity contracts were entered into with the objective of managing and hedging the exposure of the Group's plantation and refining segments to adverse price movements in vegetable oil commodities.

The fair value of the commodity futures contracts is the amount that would be receivable or payable on termination of the outstanding position, and is determined by reference to the difference between the contracted prices and the forward prices as at the balance sheet date.

Credit Risk is controlled by the application of authority and trading limits and dealing with well established counter parties and regular monitoring procedures.

The Group actively manages its cash flows by monthly forecasts of funding requirements. As part of its prudent liquidity management, the Group maintains sufficient levels of cash or cash equivalents, banking facilities of a reasonable level to meet its working capital requirements. As far as possible, the Group funds significant long term investments with internal funding.

Notes to the Interim Financial Report

B10) Financial Instruments - continued

Market Risk is minimized by daily monitoring of financial markets, supply and demand for crude palm oil and world vegetable oils in general. Regular production and sales as well as cash flow forecasts are carried out to establish hedging requirements. There are also 'stop loss' procedures in place to minimize possible losses.

There are no significant credit and market risks posed by the above financial instruments as at 31 December 2010.

B11) Material Litigation

There was no material litigation as at 21 February 2011.

B12) Proposed Dividends
