# Part B - Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

#### 16. Performance Review

The Company's revenue of RM921,000 for the current quarter ended 30 September 2012 was lower than last year's corresponding quarter of RM969,000 by RM48,000. This was mainly due to the exchange difference arising from the conversion of the revenue in SGD functional currency to RM reporting currency. In term of the functional currency, current quarter's interest income was in fact higher by SGD1,500 while dividend and rental income remained the same level as last year's corresponding quarter.

For the current quarter, the Company achieved an after-tax profit of RM25.24 million which was a positive turnaround from last year's corresponding quarter's after-tax loss of RM26.14 million. This was due to:-

- 1) The revaluation of its long-term investment in securities for the current quarter was a fair value gain of RM18.08 million as compared to the fair value loss of RM17.52 million reported for the corresponding quarter a year ago.
- 2) Share of associate's financial results was a profit of RM6.49 million while last year's corresponding quarter was a loss of RM9.35 million.

# 17. Comment on Material Change in Profit Before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter

The Company posted a pre-tax profit of RM25.26 million for the current quarter ended 30 September 2012 as compared to the immediate preceding quarter's pre-tax loss of RM6.76 million despite lower revenue reported for the current quarter. This was due to:-

- 1) The revaluation of its long-term investment in securities was a gain of RM18.08 million for the current quarter while the immediate preceding quarter was a loss of RM6.96 million partially offset by the fair value gain of RM1.79 million arising from the revaluation of the Company's investment properties.
- 2) Share of associate's financial results was a profit of RM6.49 million while the immediate preceding quarter was a loss of RM1.63 million.

# 18. Commentary on Prospects

The Company's results for the rest of the financial year ending 30 June 2013 will be dependent on dividend income receivable from investments, the effect of exchange rate fluctuations and the market valuation of its investments.

The results of the associated company may be affected by the plantation contribution and market valuation of its investments. The plantation is not expected to perform better than the last financial year due to the Government's implementation of minimum wage policy and over supply of CPO.
