**GENTING PLANTATIONS BERHAD
NOTES TO THE INTERIM FINANCIAL REPORT
- THIRD QUARTER ENDED 30 SEPTEMBER 2012**

I) Compliance with Financial Reporting Standard (“FRS”) 134 : Interim Financial Reporting

a) *Accounting Policies and Methods of Computation*

The interim financial report has been prepared in accordance with Financial Reporting Standard (“FRS”) 134: “Interim Financial Reporting” and paragraph 9.22 of the Bursa Malaysia Securities Berhad (“Bursa Securities”) Listing Requirements. The financial information for the nine months period (“financial period”) ended 30 September 2012 have been reviewed by the Company’s auditor in accordance with the International Standards on Review Engagements (“ISRE”) 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the financial year ended 31 December 2011. The accounting policies and methods of computation adopted for the interim financial statements are consistent with those adopted for the annual audited financial statements for the financial year ended 31 December 2011 except for the adoption of new FRSs, amendments and IC interpretations that are mandatory for the Group for the financial year beginning 1 January 2012. The adoption of these FRSs, amendments and interpretations do not have a material impact on the interim financial information of the Group.

Malaysian Financial Reporting Standards (MFRS Framework)

On 19 November 2011, the Malaysian Accounting Standards Board (“MASB”) issued a new MASB approved accounting framework, the Malaysian Financial Reporting Standards (“MFRS Framework”).

The MFRS Framework is to be applied by all Entities Other Than Private Entities for annual periods beginning on or after 1 January 2012, with the exception of entities that are within the scope of MFRS 141 “Agriculture” and IC Interpretation 15 “Agreements for the Construction of Real Estate”, including its parent, significant investor and venturer (herein called “Transitioning Entities”). Transitioning Entities were originally allowed to defer adoption of the new MFRS Framework for an additional year. However, on 30 June 2012, MASB decided to allow Transitioning Entities to further defer the adoption of the MFRS Framework for another year, thereby making the adoption of the MFRS Framework by Transitioning Entities mandatory for annual periods beginning on or after 1 January 2014.

The Group falls within the scope definition of Transitioning Entities and accordingly, will adopt the MFRS Framework for the financial year ending 31 December 2014. In presenting its first MFRS financial statements, the Group will be required to restate the comparative financial statements to amounts reflecting the application of MFRS Framework. Adjustments required on transition, if any, will be made retrospectively against opening retained earnings.

b) *Seasonal or Cyclical Factors*

The Group's revenue for the current quarter ("3Q 2012") and nine months ended 30 September 2012 was lower than for the corresponding periods of the previous year, mainly on account of lower palm product selling prices.

Notwithstanding the weather-induced shortfall in world supplies of palm and soybean products, palm oil prices were softer year-on-year, coming under particularly pronounced pressure in the latter half of 3Q 2012 amid a confluence of negative developments including a general downtrend in world commodity prices, concerns over a deteriorating global economic outlook, and slower Chinese imports of palm products.

1) *Performance Analysis (Continued)*

The 3Q 2012 period saw crop yields in Malaysia normalise as the lagged effects of the 2010 drought that had curtailed FFB production in the previous quarter had subsided. This recovery, along with the increase in production from our Indonesia operations, underpinned a 3% year-on-year growth in Group FFB production during the quarter. Furthermore, the turnaround experienced in 3Q 2012 helped cut the year-on-year deficit in cumulative Group FFB production from a 13% contraction in 1H 2012 to a 7% decline for the nine-month period ended 30 September 2012.

	Current Quarter			Year-To-Date		
	2012	2011	Change %	2012	2011	Change %
Average Selling Price/tonne (RM)						
o Crude palm oil	2,858	3,097	-8	3,060	3,340	-8
o Palm kernel	1,534	1,940	-21	1,765	2,443	-28
Production (MT'000)						
o Fresh Fruit Bunches	381	371	+3	934	1,006	-7

EBITDA margin for the plantation segment in Malaysia narrowed to 42% in the first nine months of the year compared with 54% registered in the same period a year ago due to the impact of lower palm products selling prices, higher labour cost and materials price inflation.

The Indonesia plantation segment posted a higher loss in 3Q 2012 and for the first nine months of the year mainly on account of less favourable local market dynamics for FFB producers.

The property segment continued to register a notable year-on-year growth in EBITDA on the back of sustained demand for its property offerings.

The biotechnology segment posted a higher loss in 3Q 2012 and nine months to 30 September 2012 compared with the previous year's corresponding periods in tandem with the intensification of its research and development activities.

2) *Material Changes in Profit Before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter*

Pre-tax profit for 3Q 2012 was higher quarter-on-quarter primarily driven by the notable increase in FFB production, although this was tempered by the softer palm product selling prices.

	3Q 2012	2Q 2012	Change %
Average Selling Price/tonne (RM)			
o Crude palm oil	2,858	3,206	-11
o Palm kernel	1,534	1,890	-19
Production (MT'000)			
o Fresh Fruit Bunches	381	276	+38

3) *Prospects*

The Group's performance prospects for the remaining period of the year will be closely connected to the direction of palm product prices and contingent on FFB production volumes. Market sentiment continues to be dominated by nervousness over the increasing risks to the world economy stemming from the weakening economic conditions in China, the unresolved European financial crisis and the threat posed by a looming fiscal cliff on the stuttering U.S. recovery. Nevertheless, with the traditionally stronger year-end festival-oriented demand season approaching and given palm oil's abnormally steep discount to competing oils, the downside for palm oil prices should be cushioned.

On the FFB production front, the Group anticipates the better harvest experienced in 3Q 2012 to continue into 4Q 2012, thus, raising the prospects of combined full year production from Malaysia and Indonesia recovering from the slow start to reach a marginally lower level from the record achieved in 2011.

3) *Prospects (Continued)*

The Group's total landbank has been enlarged to approximately 228,000 hectares from 165,500 hectares following the completion of the latest joint venture for the development and cultivation of an area of some 62,500 hectares in Kalimantan Tengah. The continuing expansion of the Group's presence in Indonesia through the addition of new areas complementing the ongoing development works in existing sites paves the way for sustainable production growth and returns.

Furthermore, the recent completion of the Group's maiden palm oil mill facility in West Kalimantan is timely as it will help boost operational efficiency by minimising the Group's exposure to the systemic market disadvantages faced by producers of FFB.

With sustained demand for its residential, commercial and industrial products, the property segment will continue to focus its marketing efforts on capturing the growing interest in Iskandar Malaysia and replenish the array of property offerings both in Kulajaya and Batu Pahat.

Biotechnology segment will continue to pursue its research and development programmes in crop improvement and microbial solutions while upgrading its laboratory facilities to move ahead in terms of speed and volume.
