GENTING PLANTATIONS BERHAD
NOTES TO THE INTERIM FINANCIAL REPORT
- FOURTH QUARTER ENDED 31 DECEMBER 2018

I) Compliance with Financial Reporting Standard (“FRS”) 134: Interim Financial Reporting
(a) Accounting Policies and Methods of Computation

The interim financial report has been prepared in accordance with MFRS 134 “Interim Financial Reporting” and paragraph 9.22 of Bursa Malaysia Securities Berhad (“Bursa Securities”) Listing Requirements. The figures for the cumulative period have been audited.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the financial year ended 31 December 2017. For the periods up to and including the financial year ended 31 December 2017, the Group prepared its financial statements in accordance with Financial Reporting Standards (“FRS”). The accounting policies and methods of computation adopted for the interim financial report are consistent with those adopted for the annual audited financial statements for the financial year ended 31 December 2017. The effect of the transition from FRSs to MFRSs and the adoption of new MFRSs, amendments to standards and IC Interpretations are disclosed below.

The interim financial report of the Group for the current quarter and twelve months ended 31 December 2018 is prepared in accordance with the MFRS Framework, including MFRS 1 “First-time Adoption of Malaysian Financial Reporting Standards”. Subject to certain transition elections and effects of adoption of MFRS 141 “Agriculture” as disclosed below, the Group has consistently applied the same accounting policies in its opening MFRS statement of financial position as at 1 January 2017, being the transition date, and throughout all periods presented, as if these policies had always been in effect.

(A) Transition from FRSs to MFRSs

(i) MFRS 1 exemption options

As provided in MFRS 1, first time adopters of MFRSs can elect optional exemptions from full retrospective application of MFRSs. The Group has elected the following exemptions:

(a) Exemption for business combinations

The Group has elected to apply MFRS 3 “Business Combinations” prospectively from the date FRS 3 “Business Combinations” was adopted, i.e. 1 January 2011. Business combinations that occurred prior to that date have not been restated. In addition, the Group has also applied MFRS 10 “Consolidated Financial Statements” on the same date as FRS 3. This election does not have any impact to the Group.

(b) Property, plant and equipment – previous revaluation as deemed cost exemption

Under FRS, valuation adjustments on certain property, plant and equipment were incorporated into the financial statements. The Group has elected to use the previous revaluation as deemed cost under MFRS. Accordingly, the carrying amounts of these property, plant and equipment of RM46.6 million as at 1 January 2017 have not been restated. The revaluation reserve of RM18.1 million as at 1 January 2017 was reclassified to retained earnings.

(a) Accounting Policies and Methods of Computation *(Continued)*

(A) Transition from FRSs to MFRSs *(Continued)*

(i) MFRS 1 exemption options *(Continued)*

(c) MFRS 9 “Financial Instruments”

The Group has elected the exemption in MFRS 1 which allows the Group not to restate comparative information in the year of initial application. The Group continues to apply FRS 139 “Financial Instruments: Recognition and Measurement” and FRS 7 “Financial Instruments: Disclosures” for the comparative information. Any adjustments to align the carrying amounts of financial assets and financial liabilities under the previous FRS 139 with MFRS 9 are recognised in retained earnings and other reserves as at 1 January 2018.

(d) MFRS 15 “Revenue from Contracts with Customers”

The Group has elected the exemption in MFRS 1 which allows the Group not to restate any contracts that are completed as at the date of transition of 1 January 2017.

(e) Assets and liabilities of subsidiaries, joint ventures and associates

The assets and liabilities of subsidiaries, joint ventures and associates which have adopted the MFRS Framework or International Financial Reporting Standards (“IFRS”) earlier than the Group shall remain at the same carrying amounts as in the financial statements of these subsidiaries, joint ventures and associates, after adjusting for consolidation adjustments.

The optional exemptions elected by the Group that have an impact on the reported financial positions prepared in accordance with FRSs have been applied in the opening MFRS statement of financial position as at 1 January 2017 and throughout all periods presented in the interim financial report.

(ii) Effects of adoption of MFRS 141 “Agriculture”

Prior to the adoption of MFRS 141 “Agriculture”, produce growing on bearer plants was not recognised. Following the adoption of these MFRSs, produce growing on bearer plants are measured at fair value less costs to sell with fair value changes recognised in profit or loss as the produce grows. The produce growing on bearer plants of the Group comprises fresh fruit bunches (“FFB”) prior to harvest. Management has deliberated on the oil content of such unharvested FFB, which is unripe and concluded that since the oil content of unharvested FFB accrues exponentially up to 15 days prior to harvest, such unharvested FFB more than 15 days are excluded from the valuation as their fair values are considered negligible. The fair value of unharvested FFB is computed based on market approach which takes into consideration the market prices of FFB, adjusted for estimated oil content of unharvested FFB less harvesting, transport and other costs to sell.

(iii) **MFRS 9 “Financial Instruments”**

MFRS 9 replaces MFRS 139 and amends the previous requirements in three main areas: (a) classification and measurement of financial assets; (b) impairment of financial assets, mainly by introducing a forward looking expected loss impairment model; and (c) hedge accounting including removing some of the restrictions on applying hedge accounting in MFRS 139. The impact of MFRS 9 adoption is described below:

a) Classification and measurement

Under MFRS 9, financial assets are classified according to their cash flow characteristics and the business model which they are managed. The Group has categorised its financial assets as financial assets measured at amortised cost, fair value through profit or loss (“FVTPL”) and fair value through other comprehensive income (“FVOCI”).

The Group has made an irrevocable election to classify RM91.8 million of the Group’s equity investments previously classified as available-for-sale as FVOCI. Fair value changes on equity investments at FVOCI are presented in other comprehensive income (“OCI”) and are not subsequently transferred to profit or loss. Upon sale of equity investments at FVOCI, the cumulative gain or loss in OCI is reclassified to retained earnings.

Certain available-for-sale investments in debt instruments of RM2.7 million and income funds of RM500.0 million that do not meet the criteria for classification either as FVOCI or at amortised cost have been classified as FVTPL. Accordingly, RM502.7 million has been reclassified as financial assets at FVTPL.

The other financial assets held by the Group include trade and other receivables, other non-current assets, amounts due from joint ventures, associates and other related companies currently accounted for at amortised cost will continue to meet the conditions for classification as amortised cost under MFRS 9.

There is no impact on the Group for financial liabilities as the new requirements only affect the accounting for financial liabilities that are designated at FVTPL and the Group does not have such liabilities.

b) Impairment

MFRS 9 changes the recognition of impairment provision for financial assets by introducing an expected credit loss model. Upon the adoption of MFRS 9, the Group has revised its impairment methodology which depends on whether there has been a significant increase in credit risk. The Group assesses possible increase in credit risk for financial assets measured at amortised cost at the end of each reporting period. The impairment provision is estimated at an amount equal to a 12 months expected credit loss at the current reporting date if there has not been a significant increase in credit risk. Based on the assessment undertaken, the Group does not expect any significant impact arising from adopting this model under MFRS 9.

c) Hedge accounting

The new hedge accounting guidance in MFRS 9 aligns the hedge accounting treatment more closely with the Group’s risk management practices. The Group has applied the new hedge accounting requirements prospectively. The adoption of the new accounting requirements did not have any material impact on the reporting period.

The Group has elected the exemption in MFRS 1 which allows the Group not to restate comparative information in the year of initial application of MFRS 9.

(a) **Accounting Policies and Methods of Computation** (Continued)

(iv) MFRS 15 “Revenue from Contracts with Customers”

With the adoption of MFRS 15, revenue is recognised by reference to each distinct performance obligation in the contracts with customer. Transaction price is allocated to each performance obligation on the basis of the relative standalone selling prices of each distinct good or service promised in the contract. Depending on the substance of the contract, revenue is recognised when the performance obligation is satisfied, which may be at a point in time or over time. The Group has applied this standard retrospectively and has elected the exemption in MFRS 1 not to restate contracts that were completed before 1 January 2017.

The Group has also elected the following practical expedients upon the adoption of MFRS 15:

- (a) completed contracts that began and ended in the same comparative reporting period as well as completed contracts as at transition date, are not restated; and
- (b) for all reporting periods presented before the first MFRS reporting period, the amount of transaction price allocated to the remaining performance obligation and an explanation of when the Group expects to recognise the amount as revenue are not disclosed.

The effects from adoption of MFRS 15 are:

- (i) Property development costs and land held for property development will be measured at the lower of costs and net realisable value in accordance with MFRS 102 “Inventories”. Arising therefrom, a write down of RM5.6 million had been provided for land held for property development.
- (ii) The provision for foreseeable losses on the development of affordable housing previously recognised under FRSIC 17 “Development of Affordable Housing” amounting to RM9.1 million as at 31 December 2017 had been reversed and the comparatives are restated.

(B) Changes to comparatives – Reclassifications and adjustments

- (i) Purchase Price Allocation (“PPA”) on the acquisition of Knowledge One Investment Pte Ltd

As reported in the previous financial year ended 31 December 2017, AsianIndo Holdings Pte Ltd (“AsianIndo”), a 100% indirect subsidiary of the Company, had on 10 October 2017 completed the acquisition of 100% equity interest in Knowledge One Investment Pte Ltd which in turn holds 85% equity interest in PT Kharisma Inti Usaha (“PKIU”). As allowed under MFRS 3 Business Combination, the Group had twelve months from the date of acquisition to complete the PPA.

During the financial year, the Group has concluded the PPA exercise within the stipulated time period and had adjusted the fair values of certain identifiable assets and liabilities of PKIU. This revision has been accounted for retrospectively.

The following summarises the adjustments made:

	Preliminary Assessment	Adjustment	Final Assessment
	RM’000	RM’000	RM’000

(B) Changes to comparatives – Reclassifications and adjustments (Continued)

(ii) The Group had reclassified provision for retirement benefits and interest payable from Trade and other payables to Provisions and Borrowings (current) respectively to conform with the current year's presentation.

(iii) The Group had reclassified rental income deriving from investment properties and fees from management services provided to plasma cooperatives from other income to revenue to better reflect the nature and substance of the transactions.

g) Segment Information

The segments are reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker whereby the Group’s business is considered based on the nature of the products and services, specific expertise and technology requirements of individual reportable segments. The performance of the operating segments is based on a measure of adjusted earnings before interest, tax, depreciation and amortisation (“EBITDA”). Items not forming part of the adjusted EBITDA include net fair value gain or loss on financial assets, gain or loss on disposal of assets, assets written off, gain or loss on derecognition/dilution of shareholding in associates and impairment losses.

n) Fair Value of Financial Instruments

The Group uses the following hierarchy for determining the fair value of all financial instruments carried at fair value:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

As at 31 December 2018, the Group's financial instruments measured and recognised at fair value on a recurring basis are as follows:

RM'000	Level 1	Level 2	Level 3	Total
Financial assets				
Financial assets at fair value through profit or loss	-	350,016	3,073	353,089
Derivative financial instruments	-	2,217	-	2,217
	-----	-----	-----	-----
	-	352,233	3,073	355,306
	=====	=====	=====	=====
Financial liabilities				
Derivative financial instruments	-	3,605	-	3,605
	=====	=====	=====	=====

The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared with the previous financial year ended 31 December 2017.

The following table presents the changes in financial instruments classified within Level 3:

	RM'000
As at 1 January 2018, as restated	94,548
Fair value changes – recognised in OCI	(94,159)
Interest income	262
Foreign exchange differences	2,422

As at 31 December 2018	3,073
	=====

There have been no transfers between the levels of the fair value hierarchy during the current financial year ended 31 December 2018.

1) Performance Analysis

The Group recorded lower year-on-year revenue for the quarter ended 31 December 2018 (“4Q 2018”) with the impact of the weaker palm products selling prices outweighing the increase in FFB production. The Property segment also registered a decline in revenue from lower sales. On the other hand, the Downstream Manufacturing segment registered a marginal improvement in revenue on the back of higher offtake from both its biodiesel and refinery operations, which more than offset the softer selling prices.

The Group’s revenue for the full year of 2018 (“FY 2018”) improved year-on-year, on account of the higher offtake of biodiesel and refinery products from the Downstream Manufacturing segment along with progressive completion of works by the Property segment. However, the Plantation segment posted lower year-on-year revenue as the effect of the softer palm products selling prices outstripped the higher FFB output.

Group FFB production in 4Q 2018 and FY 2018 improved by 15% and 11% year-on-year respectively, underpinned by the growth from its Indonesia operations from an increase in mature areas and better age profile, while production from its Malaysia operations dropped due to the delayed effects of adverse weather conditions in the preceding two years along with a decline in mature areas from replanting activities.

Palm products prices continued to soften in 4Q 2018, burdened by a convergence of adverse factors including weak demand, record high inventory levels and weaker soybean prices. As a result, the Group achieved notably lower year-on-year CPO prices of RM1,848/mt and RM2,117/mt in 4Q 2018 and FY 2018 respectively. Likewise, PK prices also declined from a year ago, averaging at RM1,357/mt and RM1,681/mt for 4Q 2018 and FY 2018 respectively.

	Current Quarter			Full Year		
	2018	2017	Change %	2018	2017	Change %
Average Selling Price/tonne (RM)						
○ Crude Palm Oil	1,848	2,577	-28	2,117	2,715	-22
○ Palm Kernel	1,357	2,537	-47	1,681	2,443	-31
Production (MT’000)						
○ Fresh Fruit Bunches	613	535	+15	2,083	1,884	+11

Reflective of the weaker palm products selling prices, EBITDA for the Plantation segment for 4Q 2018 and FY 2018 were lower year-on-year.

EBITDA for the Property segment for 4Q 2018 and FY 2018 were higher year-on-year, on the back of progressive completion of works and improved profit margins.

The Biotechnology segment’s losses widened, in line with its research and development activities.

The Downstream Manufacturing segment’s EBITDA was lower year-on-year for both 4Q 2018 and FY 2018 as the weaker selling prices compressed profit margins.

Changes in the “Others” category reflects the changes in foreign currency translation position of the Group’s US Dollar denominated cash reserves and borrowings arising from foreign exchange fluctuations.

2) **Material Changes in Profit before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter**

Share of results in joint ventures and associates	12.8	9.9	+2.9	+29
Profit before tax	14.8	25.1	-10.3	-41
	=====	=====		

Pre-tax profit for 4Q 2018 was lower than the immediate preceding quarter mainly due to lower contribution from the Property segment from lower sales along with higher depreciation and amortisation and finance cost mainly arising from an increase in matured areas in the Group's plantation operations.

	4Q 2018	3Q 2018	Change %
Average Selling Price/tonne (RM)			
○ Crude Palm Oil	1,848	2,043	-10
○ Palm Kernel	1,357	1,620	-16
Production (MT'000)			
○ Fresh Fruit Bunches	613	505	+21

3) *Prospects*

The Group's prospects for 2019 will largely be contingent on the performance of its Plantation segment, which in turn reflects the movements in palm products selling prices and the Group's FFB production. Palm prices are influenced by factors such as the underlying demand and supply dynamics of palm oil and other substitute oils and fats, weather patterns, currency exchange fluctuations, global economic conditions as well as relevant government policies and regulations such as biodiesel mandates and import/export tax and duty regimes.

The Group's FFB production for 2019 is expected to see further upward trajectory on prospects of higher crop output from its Indonesia operations, bolstered by additional areas coming into maturity and better age profile.

For the Property segment, the Group will continue to focus on residential offerings which cater to the broader market. The Premium Outlets is expected to continue performing well in 2019 with the full year contribution from the third phase of the Johor Premium Outlets®, which commenced operations in November 2018.

The Biotechnology segment will continue its efforts on developing commercial solutions and applications to enhance the yield and productivity of oil palm.

The implementation of the mandatory B10 biodiesel for the transportation sector and B7 biodiesel for the industrial sector is expected to shore up local demand for the Group's biodiesel operations in 2019 while offtake for discretionary biodiesel blending is underpinned by the viability of the palm oil gas oil spread.

The Group's refinery operations will continue to focus on improving its market reach and offtake.

4) *Variance of Actual Profit from Forecast Profit*

The Group did not issue any profit forecast or profit guarantee for the year.

5) *Taxation*

Tax charge for the current quarter and for the financial year-to-date are set out below:

	Current Quarter 4Q 2018 RM'000	Current Financial Year-To-Date RM'000
Current taxation:		
- Malaysian income tax charge	15,709	64,108
- Foreign income tax charge	304	305
- Deferred tax credit	(10,715)	(2,909)
