16. Performance Review

The Group's revenue for the current quarter of RM1.61 million was lower than the corresponding quarter ended 30 September 2011 by RM275,000 despite interest income was higher by RM9,000. This shortfall was due to lower crop sales arising from lower FFB prices and lower fresh fruit bunches production.

For the current quarter, the Group reported an after-tax profit of RM3.1 million which was a positive turnaround from the after-tax loss of RM334,000 suffered a year ago. This was mainly due to the unrealised exchange gain of RM425,000 as compared to the corresponding quarter's unrealised exchange loss of RM742,000. Share of associates' profit of RM2.32 million for the current quarter was also a positive turnaround from the loss of RM150,000 reported a year ago.

17. Comment on Material Change in Profit Before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter

For the quarter under review, the Group's revenue of RM1.61 million was higher than the immediate preceding quarter's RM1.52 million despite no dividend income was received while RM100,000 was received during the immediate preceding quarter. This was mainly due to higher crop sales as the harvested tonnage of fresh fruit bunches increased by about 43% partially offset by the fall of 12% in FFB prices.

The Group reported a pre-tax profit of RM3.24 million for the current quarter which was an improvement from the immediate preceding quarter's RM2.53 million by RM711,000. This was mainly due to:-

- 1) The unrealised foreign exchange gain of RM425,000 for the current quarter was higher than the immediate preceding quarter's RM11,000.
- 2) Share of associates' profit of RM2.32 million for the current quarter was higher than the immediate preceding quarter by RM308,000.

18. Commentary on Prospects

With the recruitment of additional employees, the labour shortage problem has been resolved. However, the performance for the rest of the financial year is expected not to be better than last year due to the following reasons:-

- 1) The labour cost is expected to increase as the Government is implementing the minimum wage policy with effect from January 2013.
- 2) Currently, there is an over supply of CPO and this may result in lowering the FFB prices.

The results of the associated companies may be further affected by the market valuation of their investments and currency fluctuations.
