Part A - Explanatory Notes Pursuant to FRS 134

2. Significant Accounting Policies (cont'd)

(a) Adoption of New and Revised FRSs, IC Interpretations and Amendments to FRS (cont'd)

The impact on the financial performance and results of the Group arising from the adoption of FRS 10 is discussed below:

FRS 10 replaces part of FRS 127 Consolidated and Separate Financial Statements that deals with consolidated financial statements and IC Interpretation 112 Consolidation - Special Purpose Entities.

Under FRS 10, an investor controls an investee when (a) the investor has power over an investee, (b) the investor has exposure, or rights, to variable returns from its investment with the investee, and (c) the investor has ability to use its power over the investee to affect the amount of the investor's return. Under FRS 127 Consolidated and Separate Financial Statements, control was defined as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

FRS 10 includes detailed guidance to explain when an investor that owns less than 50 per cent of the voting shares in an investee has control over the investee. FRS 10 requires the investor to take into account all relevant facts and circumstances, particularly the size of the investor's holding of voting rights relative to the size and dispersion of holdings of the other vote holders.

The application of FRS 10 affected the accounting for the Group's equity interest in Kuchai Development Berhad ("KDB") and Sungei Bagan Rubber Company (Malaya) Berhad ("SBB").

Under FRS 10 which was effective on 1 January 2013, the directors assessed that the Group has control of KDB and SBB even though it has less than 50% of the voting rights in both companies. The Group is the major shareholder of KDB with 41.91% equity interest and SBB with 42.89% effective equity interest as at 30 June 2013. Given the dispersed nature of the shareholdings in KDB and SBB not held by the Group, the directors consider that the shareholders who are likely to attend the shareholders' meetings of KDB and SBB are unlikely to out vote the Group in any resolution and that therefore, the Group has control over KDB and SBB.

The change in accounting policy has been accounted for retrospectively in accordance with the transitional provision of FRS 10.

Following the adoption of FRS 10, certain comparatives have been restated as follow:

2. Significant Accounting Policies (cont'd)

(b) Revised FRS and IC Interpretation issued and not yet effective (cont'd)

Malaysian Financial Reporting Standards (MFRS Framework)

On 19 November 2011, the Malaysian Accounting Standards Board (MASB) issued a new MASB approved accounting framework, the Malaysian Financial Reporting Standards (MFRS Framework).

The MFRS Framework is to be applied by all Entities Other Than Private Entities for annual periods beginning on or after 1 January 2012, with the exception of entities that are within the scope of MFRS 141 Agriculture (MFRS 141) and IC Interpretation 15 Agreements for Construction of Real Estate (IC 15), including its parent, significant investor and venturer (herein called 'Transitioning Entities').

Transitioning Entities are allowed to defer the adoption of the new MFRS Framework when it is mandated by MBSB and may in the alternative, apply Financial Reporting Standards (FRS) as its financial reporting framework.

The Group falls within the scope definition of Transitioning Entities and accordingly, will be required to prepare financial statements using the MFRS Framework in its first MFRS financial statements when the MFRS Framework is mandated by MASB. In presenting its first MFRS financial statements, the Group will be required to restate the comparative financial statements to amounts reflecting the application of MFRS Framework. The majority of the adjustments required on transition will be made, retrospectively against opening retained earnings.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices), and

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	Level 1 RM'000	Level 2 RM'000	Level 3 RM'000	Total RM'000

16. Performance Review

The Group recorded revenue of RM10.25 million and RM27.83 million for the current quarter and financial year ended 30 June 2014 respectively. These were higher as compared to the preceding year's corresponding quarter and a year ago, mainly due to the increased production of fresh fruit bunches of oil palm ("FFB") and higher average selling prices of FFB. Dividend and interest income were also higher.

For the current quarter, the Group reported an after-tax profit of RM8.24 million. This was significantly lower than last year's corresponding quarter's RM14.40 million despite higher fair value gain of RM7.50 million arising from the revaluation of the Group's investment properties and the unrealised exchange difference was gain of RM697,000 as compared to last year's loss of RM1.04 million. This was due to:-

- 1) Share of the financial results of its associates was a loss of RM5.52 million which was significantly higher than last year's corresponding quarter's loss of RM2.30 million.
- 2) The quarter a year ago benefitted from the reversal of temporary difference of deferred tax of RM6.24 million on account of the revised basis of recognition of capital gain tax for its investment property located overseas while there was no such reversal for the current quarter.

The Group ended the financial year with an after-tax profit of RM22.31 million. This was slightly better than the profit a year ago of RM22.29 million despite there was no reversal of prior years' provision of deferred tax during the current financial year. This was mainly due to:-

- 1) Higher revenue achieved.
- 2) The foreign exchange gain of RM1.36 million was higher than last year's gain of RM425,000.
- 3) The fair value gain of RM7.50 million arising from the revaluation of the Group's investment properties was higher than last year's RM5.16 million.
- 4) Share of the financial results of its associates was a profit of RM369,000 for the current year while it was loss of RM361,000 a year ago.

17. Comment on Material Change in Profit Before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter

For the quarter under review, the Group's revenue of RM10.25 million was significantly higher than the immediate preceding quarter of RM3.84 million. This was due to the receipt of dividend income of RM5.89 million while only RM38,000 was received in the preceding quarter. Crop sales and interest income were higher too.

The Group reported a pre-tax profit of RM9.52 million for the current quarter. This was significantly higher than the immediate preceding quarter's RM1.58 million despite share of financial results of its associates was a loss of RM5.52 million as compared to the immediate preceding quarter's profit of RM334,000. This was mainly due to:-

- 1) Higher revenue achieved.
- 2) Higher foreign exchange gain.
- 3) Recognition of the fair value gain of RM7.50 million arising from the revaluation of the Group's investment properties while there was none for the immediate preceding quarter.

18. Commentary on Prospects

For the next financial year ending 30 June 2015, higher crop is expected. However, palm trees of different age group will respond differently to the climatic changes while the global edible oil and its related markets, and global economic conditions impact CPO prices. The Group's performance for financial year ending 30 June 2015 is expected to remain profitable.

The results of the associated companies may be further affected by the market valuation of their investments and currency fluctuations.
